CANTONMENTS—REGULATIONS.

No. 1310.—In exercise of the powers conferred by section 35 of the Cantonments (House-Accommodation) Act, 1923 (VI of 1923), the Governor General in Council is pleased to make the following rules to carry out the purposes and objects of the said Act :—

Rules.

Short title and extent.

1. (*1*) These rules may be called the Cantonment (House-Accommodation) Rules, 1923. VI of 1923.

(*2*) They extend to all cantonments or parts of cantonments in British India in which the Cantonments (House-Accommodation) Act, 1923, hereinafter referred to as "the Act," is for the time being operative.

Form of notices.

2. (*1*) Every notice prescribed by section 6 or section 7 of the Act shall be in the appropriate form set forth in Schedule A with such variations as the circumstances of each case may require.

(*2*) The lease referred to in section 7 of the Act shall, as nearly as may be, be executed in the form set forth in Schedule B.

Service of notices.

3. Any notice issued under the Act or these rules, if not served by post under section 34 of the Act, may be served by any person authorised by the Commanding Officer of the cantonment in this behalf :—

(*a*) by giving or tendering a duly signed copy thereof to the person to whom it is addressed ; or

(*b*) where the notice cannot be served in the manner specified in clause (*a*), by causing it to be affixed to some conspicuous part of the house to which it relates, and by publishing it in one vernacular and one daily English newspaper published within the Command in which the cantonment is situate.

Petition of appeal.

4. Every petition of appeal under section 30 of the Act shall state the grounds of appeal.

Notice of meetings of Committee of Arbitration.

5. When a Committee of Arbitration, hereinafter referred to as "the Committee", has been duly constituted and each of the members thereof informed by the Commanding Officer of the cantonment of the fact by notice as provided in sub-section (*1*) of section 24 of the Act, the Chairman of the Committee shall, within a week from the receipt of such notice, fix the time and place of meeting and give notice of the same in writing to the other members of the Committee, and, through the Commanding Officer of the cantonment, to the parties concerned.

6. The notice given to the parties under rule 5 shall state the purpose for which the Committee will assemble, and shall contain a direction to them to produce their evidence, oral and documentary, on the date fixed, or if they are unable to do so, to forward to the Chairman at least seven days prior to the day of the meeting, a list of the witnesses whom they desire to be summoned in their behalf, either to give evidence or to produce documents relating to the matter in dispute.

Content of notice.

7. On receipt of the lists of witnesses and documents, if any, the Chairman shall, if he considers the request made for the attendance of the witnesses named and the production of the documents called for to be reasonable, transmit the list to the District Magistrate for issue of the necessary processes under sub-section (*2*) of section 24 of the Act. If he considers the attendance of any witness' named or the production of any documents called for to be unnecessary, he shall inform the party concerned, and the question whether such witness shall be summoned or such document called for shall be determined by the Committee at their first meeting.

Chairman to move District Magistrate for issue of process.

8. It shall be open to the Chairman to call for the attendance of witnesses or the production of documents other than those named by the parties and to transmit a list of such witnesses and documents to the District Magistrate for issue of the necessary process.

Power of Chairman to call additional evidence.

9. (*1*) The Chairman shall record in the award the question for decision, the number of the Station Order convening the Committee, the names and status of the members thereof, and the decision arrived at. The award shall be signed by the Chairman and the members of the Committee, and shall be forwarded by the Chairman in duplicate to the Commanding Officer of the cantonment for disposal.

Record of award.

(*2*) The dissent of any member from any decision of the Committee of Arbitration with his reasons therefor, shall, if such member so requests, be attached by the Chairman to the Proceedings.

10. The Committee shall have power to correct any clerical mistake or error in its award which may have arisen from any accidental error or omission.

Power to correct mistake.

11. The Committee, or any members thereof or any person specially authorised by them in this behalf, may enter into or on any building or land, which is the subject of arbitration ; and may make such inspection and may cause such expert examination to be made as they think fit.

Power of entry and inspection.

12. Every requisition for reference of any question to a Committee of Arbitration shall set forth the grounds upon which the applicant relies.

Content of requisition for reference to Committee.

13. Where any member of the Committee dies or becomes incapable of acting, the officer or owner as the case may be, who nominated him, shall nominate another person in this place within seven days from the date on which he is called upon to do so ; and if he fails to do so, the District Magistrate shall forthwith appoint a member in his place.

Replacement of member dying or becoming unable to act.

14. The Chairman shall furnish a copy of the award to each of the parties free of charge and shall then forward the original to the Commanding Officer of the cantonment.

Supply of copy of award.

15. Any power of entry, inspection, measurement or survey conferred by the Act, or these rules shall be exercised in accordance with the following provisions, namely :—

Limitations on power of entry, etc.

(*a*) such power shall be exercised only between sunrise and sunset ;

(*b*) in the case of an occupied building or occupied land such power shall not, save with the consent of the occupier, be exercised unless twenty-four hours' notice in writing has been given to the said occupier ;

(*c*) when in the exercise of such power a building used as a human dwelling is entered, due regard shall be paid to the social and religious sentiments of the occupiers ; and no appartment in the actual occupancy of a woman shall be entered until she has been informed that she is at liberty to withdraw, and every reasonable facility has been afforded to her for withdrawing.

16. Whoever obstructs any person not being a public servant within the meaning of section 21 of the Indian Penal Code, in any entry, inspection, measurement or survey which such person is authorised to make under the Act or these rules shall be punished with fine which may extend to fifty rupees and in the case of a continuing offence with fine which in addition to such fine as aforesaid may extend to five rupees for every day after the first day during which such offence continues.

Penalty for obstruction.

(g) Observation Lessons (for boys).

Class I—

Observation lessons.—To be begun by conversation lessons on the things in the school such as benches, desks, stools. Children measuring the benches, desks, etc., collecting leaves, flowers and fruits from plants and trees growing in the locality and comparing them as to shape, colour, smell, number, etc. Additional observation lessons should be given in correlation with other class subjects.

Class II—

Observation lessons.—Collection and observation of plants such as may be available in the locality, comparing the different parts of each, root, stem, leaves, bark, flowers and fruits with those of another. Collecting crop plants growing in the season. Conversation about the food materials obtained from each. The organs of our body and their uses; children measuring and comparing the respective length of their arms, legs, fingers and their height. The teacher testing their eye-sight, power of hearing.

Class III—

Observation lessons.—Growth of plants to be observed by growing any kind of pulse and paddy in pots or in small plots. [To observe the roots and seed leaves and mark the difference. Experiments to show the effect of light and moisture on growth Collecting other plants having roots and seed leaves like those grown. Collecting and observing plants having creeping or climbing stems. Plants growing in water, plants producing no flowers. Observing leaf buds and flower buds and parts of a flower.

Class IV—

Nature study based on school gardening. (Recommended for rural schools.—Optional).—Laying out a garden, a plot of 4 to 6 square cubits, for each scholar, or if the compound is not spacious enough, a common plot for all, for purposes of experiment. Seed testing—sowing 50 or 100 seeds of each of several kinds of plants, paddy, pulses,

jute, mustard, according to the time of the year in each plot or separate parts of the common plot. Each scholar to keep a diary in which to note down the date of sowing, the time taken for germination, the percentage of germination, the rate of growth after germination. In each stage of growth the scholars will pull up a specimen and observe the roots, their uses and growth, the stems and leaves and their uses and structure : the flowers—their parts and uses, the methods of fertilization, the fruits and seeds. All these to be noted in the diary. To observe the kinds of soil—clayey, sandy, loamy ; the power of each to absorb and retain moisture. Plant food in the soil. The effect of manures, showing the effect of different manures as cowdung, oilcake, ashes and nitrate of soda on the growth of plants, of phosphates on fruits, etc. The plots should be drawn to scale and all results recorded in the note book.

Class V—

Nature study based on school gardening (optional).—Boys may work in pairs, one of class IV and another of class V if single plots are available, otherwise all on a common plot, one being set apart for boys of class IV for experiments only and another for those of class V. Plans of work to be prepared in September every year ; the plots to be sown with particular seeds should be set out to scale in the note book ; plans should include also indoor work, such as raising early seedlings of onions, cauliflowers, cabbages in pots or boxes. Following operations to be explained :—Digging—its effect, purpose : to sow at depths suitable to various seeds ; to prepare trenches—manuring effect and purpose ; plant, food, seeding crops to be sown—(1) jute, (2) *aus* paddy, (3) maize, (4) *aman* paddy, (5) pulses, (6) mustard, (7) potato, (8) gram, also vegetables—brinjal, radish, turnip, cauliflower, onion, chilli, flowers grown on borders of each plot—arrangements should be made to produce a continuous supply of vegetables throughout the year. Lessons on rotation, on insect pests and insecticides. Record to be kept of the quantity of seed used and of the produce.

N.B.—No text books are required for the use of pupils in the above classes. The following books may be used by teachers for the purpose of oral instruction ;—

Classes I and II—

Prakriti Parichay, Parts I and II. G. Das Gupta and Priyada Ranjan Roy (Ashutosh Library, Calcutta.)

SENATE HOUSE, *the 3rd October 1923.*

The Calcutta Gazette

WEDNESDAY, OCTOBER 3, 1923.

PART II.

Advertisements.

LAND SALE NOTICES.

Advertisement of sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Eastern Bengal Railway, in the district of Rajshahi, will be put up to sale at 1 o'clock on Saturday, the 24th November 1923, corresponding with the 8th Agrahayan 1330 B.S., at Nator Subdivisional office.

The purchasers of the several plots of land will be subject to the following conditions :—

1st.—The purchasers will have no power to make any excavations on the land nearer than fifteen feet from the railway boundary, or to plough the land nearer than three feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once

3rd.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th—The sale will become final on receipt by the Collector of the orders of the Commissioner confirming it, and a regular conveyance will then be granted to the purchaser.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated at miles 5 and 6 of the Ondal Saintha Chord Railway, in the district of Burdwan, will be put up to sale at one o'clock on Monday, the 26th November 1923, corresponding with the 10th Aghrayan 1330 B.S. at the Ondal Railway station.

The purchasers of the several plots of land will be subject to the following conditions :—

1st.—The purchasers will have no power to make any excavations on the land nearer than fifteen feet from the railway boundary or to plough the land nearer than three feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th—The plots of land will be sold revenue-free to the highest bidders.

5th.—The sale will become final on receipt by the Collector of the orders of the Commissioner confirming it, and a regular conveyance will then be granted to the purchaser.

Notice.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted Service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominees predecease them after five years of admission. The second quinquennial valuation of the fund has been completed by the Actuary to the Government of India and his report discloses very favourable results. For forms of application and rules of the Fund apply to the Accountant-General, Central Revenues, Imperial Secretariat Buildings, Calcutta.

FINAL FORECAST OF THE JUTE CROP, 1923.

Consolidated statement for Bengal, Bihar and Orissa, and Assam.

Area.—The estimated area for the three Provinces is 2,312,685 acres, an increase of 512,785 acres over last year's figures.

Yield.—It is estimated that the crop will yield 6,995,807 bales of jute, an increase of 1,509,807 bales over last year's revised returns.

Remarks.—Last year's estimates for all the three Provinces have been revised by the respective Departments.

The consolidated figures are as follows :—

Province.	Area in acres.			Yield in bales.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Jute Crop of Bengal for 1923.

(NOTE.—On an average of the five years ending 1921-22, the area under jute to which this forecast relates represents some 88·2 per cent. of the total area under jute in British India.)

Season.—In the preliminary forecast it was indicated that the season had not been uniformly favourable, and similar conditions have continued to the present. In the Terai tract of North Bengal the heavy pre-monsoon rain gradually merged into the rainy season. More or less similar conditions also prevailed in South-East Bengal, but in the rest of the Province the monsoon was late in arriving especially in West Bengal. The result was that a fair amount of jute in West Bengal was sown too late to make a normal crop. In August, North Bengal and parts of East Bengal experienced a serious drought which, combined with the lowness of the rivers very seriously interfered with cutting and steeping. The result is that an unusually large proportion of the crop is still on the ground waiting to be retted. Good rain and a good rise in river levels since the beginning of September have considerably helped progress in this direction.

Condition of the crop.—It is not good in the Western Bengal, or in the Terai tract of North Bengal. In no district is there exceptionally well-grown jute and with the above reservation the crop may be regarded as fair.

Acreage.—The area under jute is 2,014,615 acres; an increase of 464,615 acres or 30 per cent. over last year's revised final figures. The slight increase over the area given in the preliminary forecast is the algebraic result of numerous small adjustments. The considerable increase over last year's final figures is chiefly due to the high price of the fibre in that year.

Outturn.—As in previous years the percentage figures are calculated on the basis of divisional normals which remain as follows:—Dacca and Chittagong 3·7 each, Rajshahi 3·5, Presidency and Burdwan 3·2 bales per acre.

The total outturn of the crop is estimated at 6,204,516 bales of 400 lbs., as against 4,798,279 bales (revised) in last year's forecast, an increase of 1,406,237 bales.

APPENDIX I.

Final Forecast of the Jute Crop of Bengal, 1923.

District.	Estimated area under jute.		Estimated outturn as a percentage of the normal yield per unit of area.		Estimated total yield.		Date by which harvesting generally commenced and whether that date was early, normal or late.	Remarks by District Officers
	Last year.	This year	Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8	9
	Acres.	Acres.			Bales.	Bales.		
24-Parganas ...	30,436	30,221	51	75	81,413	73,342	Barrackpore—Beginning of September. Late. Elsewhere—End of August. Normal.	The decrease in outturn is due to want of rain in the beginning of the season and to damage caused by insect-pests especially in the Basirhat and Barrackpore subdivisions.
Nadia ...	27,262	59,670	55	70	47,993	150,846	First week of September: Late.	The increase in area is due to expectation of a good market. Some damage was done by insect-pests in parts of the subdivisions of Sadar, Ranaghat and Chuadanga.
Murshidabad ...	7,412	11,063	51	75	12,114	26,551	Middle of September. Late.	The increase in area is due to rise in price of jute last year.
Jessore ...	26,651	59,192	68·4	98	53,841	185,636	End of August: Normal.	The increase in area is due to high price of the fibre in 1922 and to favourable rains at sowing time. The outturn is a little below the normal owing to damage done by insect-pests and defective rainfall.
Khulna ...	3,941	14,164	74	85	9,332	38,636	End of August: Normal.	The increase in area is due to renewed confidence in jute-growing mostly inspired by last year's prices. The outturn is expected to be below the normal because the rains were late Slight damage was also done by insects.
Burdwan ...	1,090	2,500	80	76·8	2,790	6,153	First week of September: Normal.	The increase in area is due mainly to favourable market last year and to expectation of a higher price this year. The yield per acre, though below the normal, is better than the average of last five or six years.
Midnapore ...	4,030	4,343	51·4	50	7,026	6,948	End of September. Late.	The decrease in area compared with the preliminary forecast and also in outturn compared with last year is due to floods in parts of Tumluk and Ghatal subdivisions and to unfavourable weather conditions.
Hooghly ...	10,329	12,156	71·87	78	23,974	30 410	Second week of September. Late.	The increase in area compared with last year is due to—(1) high price of jute last year, (2) resowing of the crop since the submission of the preliminary forecast, and (3) regular distribution of rainfall
Howrah ...	3,567	3,951	80	70	5,707	13,389	Middle of August: Late.	The sowing was somewhat late in consequence of drought, but owing to subsequent favourable weather the crop thrived well and looked promising. During the latter part of the season, however, the crop was partly damaged by floods and partly b insect-pests.
Rajshahi ...	46,462	70,815	71·43	79	116,150	195,803	Last week of July to 2nd week of September.	The increase in area is due to high price at sowing time The weather was not favourable. Scarcity of water was felt for steeping and the harvesting was suspended till September.
Dinajpur ...	35,117	52,500	51·8	80	63,667	147,000		
Jalpaiguri ...	33,229	33,127	100	78·2	116,804	90,668	Middle of August to beginning of September: Late.	Constant rain has caused the fall in outturn
Darjeeling ...	1,688	1,826	87	53	5,156	3,342	Middle of August: Normal.	The increase in area is due to sufficient rain at the beginning and to high price of jute last year The outturn is low owing to uneven distribution of rainfall and to untim ly and heavy rainfall.

Rangpur ...	154,864	223,926	90·31	78	488,730	611,318	The harvesting was in abeyance till September for want of sufficient water.)	The increase in area is due to high price and to favourable weather at sowing time. The weather conditions changed afterwards and these are responsible for the low outturn. Water is insufficient for steeping.
Bogra ...	45,120	67,653	91	86·57	144,344	204,985	The harvesting was suspended till September on account of insufficient water.	High price and favourable weather at sowing time are responsible for the increased area. Though sown late, the crop thrived well in the alluvial tract, but uneven weather has brought down the outturn.
Pabna ...	74,764	95,163	94·3	95	246,732	316,417	Middle of July to August: Normal.	The increase in area is due to favourable market at the sowing time and also to favourable weather.
Malda ...	6,500	11,000	47·7	66	10,850	25,410	End of August: Late	The increase in area is due to high price of the fibre. The weather, though not favourable at sowing time improved afterwards. It could not however force up the outturn.
Dacca ...	130,000	245,300	75	85	365,000	771,468	July: Normal ...	The increase in area is due to favourable weather at sowing time and to high price. In some places there has been a a slight damage to the crop by insect-pests.
Mymensingh ...	298,096	525,169	91	89·69	986,182	1,742,789	End of July ...	
Faridpur ...	89,000	171,600	72	91·7	236,200	581,724	End of July: Normal	The increase in outturn is due to favourable weather condition at sowing time. Though drought interfered with the growth of the crop in the early stage, the weather became favourable since the middle of June. Low rise of river is causing difficulty in steeping jute, especially in Goalundo and in parts of Sadar subdivision.
Bakarganj ...	8,540	27,624	57·8	91	18,292	93,186	Ditto ...	The increase in area is due to high price and to favourable weather at sowing time which has also increased the output.
Chittagong ...	200	200	90	90	660	660	Second week of August	On the whole the weather was favourable throughout the year.
Tippera ...	150,000	236,500	82	86	455,100	752,543	Middle of July: Normal.	The increase in area is due to high price of jute. Unfavourable weather conditions after sowing affected the crop of the Brahmanbaria subdivision.
Noakhali ...	8,333	24,516	75	84·6	23,749	76,735	July and August: Normal.	The abnormal increase in area is due to rise in the price of jute.

NOTE.—The figures given above are the averages for all the rain registering stations in each district.

DEPARTMENT OF AGRICULTURE, BIHAR AND ORISSA.

Final Forecast of the Jute Crop of Bihar and Orissa, 1923.

(NOTE.—On an average of the five years ending 1921-22 the area under jute to which the Bihar and Orissa forecast relates represents about 7·2 per cent. of the total area under jute in British India.)

Acreage.—The final district returns of the seven jute-growing districts of the province show an area under jute of 183,770 acres, or, in round numbers, 183,800 acres, as compared with 165,200 acres reported in the preliminary forecast of 1923 and 146,100 acres or (160,000 acres revised) of last year. The increase in area sown this year is mainly in Purnea, where it is attributed to the further rise in the price of jute. The favourable sowing season and failure of the non-co-operation movement must have greatly increased the area sown this year, independently of the rise in the price of jute.

Weather conditions.—In March light rain fell in the jute districts; the fall was below the normal everywhere. In April and May there was light rain; the fall was above the normal in Champaran and Purnea in April and in Purnea in May, but below the normal elsewhere. There was light to moderate rainfall everywhere in June; the fall was heavy in Purnea. In July and August there was general rain; the fall was below the normal everywhere in July, but heavy in Champaran, the Santal Parganas and Cuttack in August. The season was favourable for the crop on the whole. The outturn was not better in Purnea, owing to lack of rain later. There was a loss of 480 acres in Balasore due to long-standing floods.

Outturn.—In the important districts of Purnea and Cuttack the outturn of the crop has been reported as 70 and 85 per cent., respectively. Champaran, the Santal Parganas, Balasore, Muzaffarpur and Bhagalpur report 95, 96, 91, 80 and 73 per cent., respectively.

On the basis of the area and percentage outturn reported by the District Officers and taking three bales as the normal outturn per acre, the total gross outturn of the crop for the province this year comes to 396,410 bales or, in round numbers, 396,400 bales, against 343,400 bales, the revised estimate for last year.

The average import of raw jute into this province from Nepal during the last three years was equivalent to 72,381 bales. This figure, added to the figure for the province arrived at, gives a total for Bihar and Orissa of 468,791 bales or, in round numbers, 468,800 bales.

Tirhut	Champaran	2,359,840	1,430,200	2,100	1,100	1,300	98	95	3,234	3,705	.....	The weather has not been very favourable in Sadar for want of rainfall, but favourable in Bettiah subdivision. The condition of the crop was poor in Sadar, but fair in Bettiah subdivision. The crop is expected to be a little worse than that of last year for want of rains.

The increase in the area is noticeable at Rajmahal. The cultivators obtained high prices last year and hence a larger area has been sown this year.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

Final Forecast of the Jute Crop of Assam, 1923.

(Note.—On the average of the five years ending 1921, the area under jute in Assam represents 4·3 per cent. of the total area under jute in British India.)

1. **Season.**—The weather at the beginning of the season was, as reported in the preliminary forecast, on the whole favourable, but not so afterwards. In June the rainfall was generally heavy, affecting growth to a certain extent, especially in the Surma Valley, where floods also caused considerable damage to the crop. In July and August rainfall was inadequate, a fact which is also responsible for the low outturn. Damage to a certain extent has also been caused by hailstorms in Goalpara and Garo Hills and by insect-pests in Kamrup and Darrang.

2. **Area.**—The area under jute has been reported by the Deputy Commissioners to be 114,300 acres, against the final figure of 89,900 acres of last year and 106,300 acres of the preliminary forecast of this year. The increase is generally due to the favourable weather at sowing time and the high market price of jute. The areas reported in the preliminary forecast have been revised in three districts, one showing a decrease and two an increase.

3. **Outturn.**—The outturn per acre is estimated to be 81 per cent. of the normal, against 85 per cent. (revised) of the previous year. Taking 3·5 bales of 400 lbs. of jute fibre as the normal yield per acre, the total produce of the crop in this province this year is calculated to be 322,500 bales, against the revised figure of 266,700 bales of last year, or an increase of about 21 per cent.

Director of Land Records and Agriculture, Assam.

	Acres.	Acres.	Acres.						
Cachar ...	300	200	300	58	52	400	500	August. Normal ...	The high price of jute in the market is the cause of the increase in area from that of last year. There was drought at sowing time, but since June there has been too much rain retarding growth of the crop considerably. The crop was also damaged to a certain extent by the flood of June.
Sylhet ...	17,000	10,300	13,600	100	70	36,000	39,300	Beginning of August. Normal.	The condition of the jute market last year was favourable and hence the increase in area. The weather was on the whole favourable, but flood of June last and the somewhat dry weather in July and August are responsible for the fall of outturn below normal.
Goalpara ...	50,000	30,300	44,600	80	70	84,800	109,300	Middle of July: Normal.	The increase in area is due to the high price of jute last year. The weather during the season was not favourable to the crop. Constant rainfall in the early part of the season hampered weeding operations and hailstorms did considerable damage to the crop in the Dhubri subdivision. Hence the outturn is below that of last year.
Kamrup ...	13,700	9,500	10,200	80	85	26,000	30,300	Middle of August Normal.	The weather was favourable at the time of sowing. It was also favourable during growth except that the rainy weather just after germination somewhat hampered the growth of the crop. Some damage was done by insect-pests.
Darrang ...	9,300	10,800	11,000	80	80	30,300	30,800	Middle of July Early.	The weather was favourable at the beginning, but not so afterwards. The scarcity of rain in July and August adversely affected the growth of the crop. Some injury was done to the crop in the Behali Circle by insect-pests.
Nowgong ...	14,700	26,800	31,900	90	100	84,100	111,300	1st July. Early ...	The increase in area is due partly to gradual extension of cultivation by Mymensingh settlers and partly to the high price of jute. The weather was favourable, but water shortage has seriously interfered with retting operations.
Sibsagar ...	300	300	300	75	80	800	800	Middle of August. Normal.	The weather has been rainy during the season and heavy rain retarded growth of the crop to a certain extent.
Lakhimpur ...	200	100	100	92	74	300	300	20th August: Early	The weather was on the whole favourable at first, but not so afterwards owing to flood in June and July and drought in August which damaged the crop and retarded growth to a certain extent.
Garo Hills (Plains).	4,600	1,800	2,400	65	70	4,100	5,900	15th July: Normal ...	The increase is due to favourable weather at sowing time. The weather during growth was unfavourable on account of insufficient rainfall. The crop was also much affected by hailstorms in certain parts of the district.
Total ...	1,110,000	89,900	114,500	85*	81	266,700	322,500

DEPARTMENT OF AGRICULTURE, BENGAL.

Preliminary Forecast of the *Bhadoi* Crops of Bengal, 1923-24.

(NOTE.—On an average of the five years ending 1921-22, the area under autumn rice in Bengal has represented some 66 per cent. of the total area under rice in British India.)

Character of the season.—The distribution of rainfall has been exceptionally uneven. In East Bengal it has been more or less satisfactory throughout, and its effects on the crops have been favourable. In Northern Bengal the early portion of the season was favourable, but adverse conditions in the form of excessive rains in some districts and scanty rainfall in others damaged the crop in the former and retarded their growth in the latter. Local deficiencies in rainfall and exceptionally low water levels in the Brahmaputra were adverse influences in Eastern Bengal. In Western Bengal, especially in Burdwan Division, the crops suffered badly on account of insufficient rainfall. Conditions were improved throughout the province by moderate fall in August and September, and a continuance of this suitable weather would ensure a fair harvest.

Acreage.—The total area sown with the different *bhadoi* crops is reported to be 5,742,200 acres as against 5,902,800 and 5,938,100 acres, respectively, in the corresponding and final forecasts of last year. Of this, the area under autumn rice is estimated at 4,963,000 acres as against 5,126,700 acres and 5,160,200 acres respectively in the corresponding and final forecasts of the last year.

Outturn.—According to the District Officers' estimates the outturn of the different *bhadoi* crops for the Presidency works out at 79 per cent. of the normal as against 76 and 78 reported respectively in the corresponding and the final forecasts of last year. The autumn rice yields an outturn of 77 per cent. of the normal for the province this year as against 76 and 78 per cent. in the corresponding and final forecasts of last year.

24-PARGANAS.	*Bhadoi* paddy (autumn rice).	65,300*	47,400	42,600	67	67	End of March to end of June. Early in some parts and late in others.	The decrease in area is due to unfavourable weather at sowing time for insufficient rain. The weather became favourable after the rain in June. The outturn is expected to fall below the normal owing to damage done by insects and insufficient rain.

NADIA.	*Bhadoi* paddy (autumn rice).	491,100	470,100	462,200	58	83	Latter part of April. Normal.	The decrease in area under *bhadoi* paddy, cereals and pulses is due to increase in area under jute and that under indigo is due to the combination among tenants of Daulatpur thana not to grow this crop. The weather has been fairly favourable. Want of timely rain caused some damage to the crops. Hence the outturn is expected to fall below the normal.

The increase in area is due to revision as well as to cultivation on a larger scale in expectation of higher prices. The effects of weather on the crops have been unfavourable owing to drought in the beginning and heavy rains afterwards. Damage to the extent of 4 annas has been done in Arambagh for want of rain at the sowing time and to low-land crops in the Serampur subdivision due to heavy rain. The outturn for the above reasons is expected to fall below the normal.

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Winter Rice Crop of Bengal, 1923-24.

(NOTE.—On an average of the five years ending 1921-22, the area under winter rice in Bengal has represented some 19·7 per cent of the total area under rice in British India.)

Character of the season.—The season opened favourably with *ante*-monsoon showers in April and May for the preparatory tillage and for the sowing of the early broadcast paddy in the lowland tracts of East and North Bengal. The conditions, however, soon changed for the worse, and the outstanding features of the subsequent period have been late and insufficient monsoon rains with low river levels. The insufficient rains in June in the Burdwan Division and scanty and late monsoon showers elsewhere hampered sowing and preparation of seed-beds. Transplanting, especially in West and North Bengal, could not be commenced till late in July and the first week of August. The operation is still (late in September) in progress. The rains in August improved the West Bengal crops; but in parts of North Bengal and in parts of Mymensingh the prospects were marred by insufficient rainfall in July and August and the exceptionally low water levels in the Brahmaputra. The September rains have helped transplantation forward, though considerable areas in both North and West Bengal still remain untouched. These lands will probably bear a *rabi* crop instead of paddy. In Midnapore about 62,000 acres under transplanted rice was damaged by the recent flood. The season has, on the whole, been fairly favourable in East Bengal and fair for the rest of the province. A fair harvest may be expected for the province as a whole.

Acreage.—According to the figures returned by the District Officers, the total area under winter rice is 14,383,000 acres as compared with 15,574,500 and 16,209,900 acres in the corresponding and final forecasts of last year.

Outturn.—From the summary of the district returns appended it will be seen that four districts expect a normal crop, ten districts 95 to 83, and the rest below 75 per cent. of the normal crop. According to the above estimates the provincial outturn works up to 84 per cent. as against 92 and 98 per cent. of the normal estimated in the first and the final forecasts of last year.

APPENDIX I.

First Forecast of the Winter Rice-Crop of Bengal, 1923-24.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of broadcasted winter rice commenced this year and whether that date was early, normal or late.	Date by which the transplanting of winter rice commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1922-23).	This year (1923-24).	Last year.	This year.			
	Acres.	Acres.	Acres.					
24-Parganas ...	840 600*	713,800	743,100	100	100	End of April to beginning of July. Normal.	End of July. Normal.	The increase in area is due to timely rainfall. The weather has been favourable on the whole.
Nadia ...	186,800	211,700	154,800	75	83	Middle of June. Normal.	Middle of August. Normal.	The decrease in area is due to want of rainfall at the time of sowing. The weather conditions have subsequently become favourable with the setting in of monsoon towards the end of July and facilitated the transplanting operation.
Murshidabad ...	351,400	321,400	244,000	92	67	June. Late ...	July and August. Late.	The decrease in area is due to want of sufficient rainfall and a large area still remains to be transplanted. The weather has not been favourable. Damage to the extent of six annas was caused by drought and the outturn is expected to fall below the normal.
Jessore ...	658,800*	486,000	498,000	75	75	May. Normal	July. Late ...	The increase in area is due to timely rain and absence of flood this year. The weather has been favourable. Blight damage at Jhenidah was caused by drought.
Khulna ...	800,000*	779 000	729,100	100	100	Sadar and Bagerhat, June. Normal. Satkhira, end of June. Late.	Sadar and Bagerhat, middle of July. Normal. Satkhira, end of July. Late.	The decrease in area is due to an abnormal saline inundation in May followed by a late monsoon. The transplantation however is proceeding. The weather which was unfavourable at the sowing time has become favourable subsequently, and a normal outturn is expected.
Burdwan ...	731,100*	713,300	657,400	133	86	Sadar and Kalna, middle of July. Late. Elsewhere, end of May. Late.	End of July. Late.	The decrease in area is due to late rainfall. The weather was unfavourable for early sowing, but since the middle of June with the alternation of rain and sunshine the weather has been an ideal one for paddy and a normal outturn may be expected.
Birbhum ...	604,700	526,000	441,200	100	87	.....	Middle of July	The decrease in area is due to want of rainfall in time and the transplantation is still being continued. The weather has not been favourable.
Bankura ...	644,300*	644,000	595,000	117	83	.....	20th July. Late.	The decrease in area is due to scanty rainfall during the time of sowing and transplantation. The weather was not favourable at the outset but has become good since the end of July. Some damage to seed-beds was caused in the beginning of the season. The outturn is expected to fall below the normal owing to late transplantation.
Midnapore ...	1,837,100	1,484,000	1,520,000	116	88	July. Late ...	August. Late.	The weather has been fair on the whole. About 62,000 acres of land under the crop was destroyed by flood in Tamluk and Ghatal subdivisions. The drought at sowing time and the damage done by floods will cause the outturn to fall be ow the normal.
Hooghly ...	352,100*	204,800	199,400	100	91	End of May. Late.	Middle of July. Late.	The decrease in area is due to want of rainfall at the sowing time. The weather has, however, been favourable subsequently. Damage to the extent of 4 annas crop due to drought was caused in Arambagh subdivision. Some damage was also done to the low-land crop by heavy rains in Serampore subdivision. The outturn is, therefore, expected to fall below the normal.
Howrah ...	117,000	97,400	94,500	71	83	Beginning of June. Late.	Ditto ...	The decrease in area is due to want of rain at the sowing time. The weather though unfavourable at the beginning has now become favourable. The late rainfall is expected to cause the outturn to fall below the normal.
Rajshahi ...	822,700	735,600	541,200	58	67	Middle of August. Late.	August. Late	The decrease in area is due to want of timely rain. The weather has not been favourable. Damage to the extent of 3 annas of the transplanted crop and 2 annas of the broadcast variety was caused in the Natore subdivision. The want of rain has caused the outturn to fall below the normal.
Dinajpur ...	1,036,800*	972.700	621,800	83	55	.....	Middle of June. Early.	The decrease in area is due to drought in July and August. The weather favourable at the outset is not good at present for want of rain which has been retarding the transplantation and growth. The highland crop is mostly getting dried up and about 10 per cent. damage anticipated. The outturn is expected to fall far below the normal.

Bogra	361,200*	450,000	270,000	70	60	April. Late.	July. Normal.	The decrease in area and the fall in outturn is due respectively to increase of area under jute and to unfavourable weather condition due to scarcity of rain.
Pabna	404,200*	387,900	391,900	83	67	Latter part of April. Late.	...	An increased area as compared with that of the last year has been sown owing to damage caused to aus paddy last year by flood. The weather has not been favourable and the continued drought has retarded the growth of the crop and caused damage to the extent of four annas.
Malda	304,000*	270,000	170,000	92	67	June. Late.	August Late.	The decrease in area is due to want of timely rainfall. The weather has not been favourable and some damage was done to the broadcast rice by paucity of rain and flood.
Dacca	672,400*	700,000	681,800	96	95	April. Normal.	August ...	The decrease in area is due to increased cultivation of jute. The weather has been favourable.
Mymensingh ...	1,456,500	1,411,500	1,327,800	85	75	April to June. Normal.	End of August. Late.	The decrease in area is due to want of rain during the sowing time and to increase in area sown with jute. The weather has been unfavourable. The drought caused considerable decrease in Sadar and damage in Kishoreganj subdivision.
Faridpur ...	759,900*	745,200	700,200	67	86	March and April. Normal.	...	The decrease in area is due to increase in area under jute. Damage to the extent of 14 per cent. is due to insufficient rain.
Bakarganj ...	1,300,000*	1,350,000	1,150,000	108	100	April and May. Normal.	July. Normal.	The decrease in area returned is due to the fact that the transplantation is not yet finished The weather though not favourable at the sowing season has now become so. A normal outturn is expected.
Chittagong ...	425,000*	428,800	429,000	108	92	May to July. Normal.	August. Normal.	The weather has been seasonable. Much damage was caused in the Cox's Bazar subdivision by flood and the outturn is therefore apprehended to fall below the normal.
Tippera ...	787,000	806,400	795,800	133	92	April. Normal.	August. Normal.	The decrease in area is due to increase in the cultivation of jute. The weather was not favourable at the sowing time for want of sufficient rain but has improved afterwards and facilitated the growth of the crop. Some damage is reported from Brahmanberia owing to insufficient rain
Noakhali ...	703,000	630,000	630,500	100	100	April and May. Normal.	July and August Normal.	The weather has been favourable.

REPORT ON THE ADMINISTRATION OF THE SALT DEPARTMENT IN BENGAL DURING THE YEAR 1922-23.

NOTIFICATION.

No. 1816S.R.—The 29th September 1923.—The following extracts from the Report of the Commissioner of Excise and Salt, Bengal, on the Administration of the Salt Department in the Presidency of Bengal during the year 1922-23 are published for general information.

A. MARR,
Secretary to the Government of Bengal.

No. 3607E., dated Calcutta, the 2nd August 1923.

From—S. C. MUKERJEE, ESQ., I.C.S., Commissioner of Excise and Salt, Bengal,
To—The Secretary to the Government of Bengal, Finance Department.

I have the honour to submit the following consolidated report on the administration of the Salt Department for the year 1922-23. The report deals with the preventive operations in the saliferous districts of the Presidency, which were under the control of the Commissioner of Excise and Salt, and with the importation and issue of salt under the control of the Customs authorities.

2. **Charge of the Department.**—Rai S. K. Raha Bahadur, Deputy Commissioner of Excise and Salt, was in charge of the Department from the 1st April 1922 to the 23rd May 1922 as Officiating Commissioner during my absence on leave. I returned from leave on the 24th May 1922 and held charge of the Department during the remainder of the year.

CHAPTER I.

3. **Credit system of payment of duty.**—The Collector of Customs, Calcutta, reports that more merchants took advantage of this system during the year under review. There were 98 depositors during the year as compared with 85 in 1921-22 and 67 in the previous year. The amount of duty to be adjusted against securities was Rs. 73·59 lakhs against Rs. 77·18 lakhs in the previous year. No credit system was in force at Chittagong.

4. **Salt golas at Sulkea and Chittagong.**—Several two maunds salt tubs and trestles were purchased at the Sulkea *gola* during the year under review. The Commissioner of the Chittagong Division and the Collector of Customs, Chittagong, report that the salt trade at the port of Chittagong shows a tendency to expand. The importations in October last alone were 665,139 maunds—an abnormally large quantity which led to congestion at the public *golas* and necessitated the licensing of several private warehouses for the storage of the surplus quantity. The removal of the Sadarghat *golas* to Moheshkhal was not undertaken during the year as no allotment of funds was made for the project.

5. **Consumption of duty-free salt for commercial purposes.**—The quantity of salt delivered from the Sulkea *gola* free of duty for commercial purposes, or on which a drawback was subsequently allowed, amounted to 5,311 maunds as compared with 7,250 maunds in 1921-22. There was no such transaction from the Chittagong *gola* during the year under report.

6. **Manufacture of salt in Bengal.**—No license was granted for the manufacture of salt during the year under review.

CHAPTER II.

Stocks, Imports and Clearances.

7. **Accounts of stocks and issues.**—The stocks, imports and clearances of salt in and from the ports of Calcutta and Chittagong for the years 1921-22 and 1922-23 are shown below :—

Stocks, imports, etc.	1921-22.	1922-23.
	Mds.	Mds.
Total of all stocks at the commencement of the year	4,588,528	4,229,106
Total quantity imported during the year ...	12,619,114	14,581,435
Excess found in the *golas*	23,629	18,929
Total ...	17,231,271	18,829,470

Stocks, imports, etc.	1921-22.	1922-23.
	Mds.	Mds.
Quantity of duty-paid salt actually issued during the year	12,609,087	15,136,150
Quantity which passed free of duty for the manufacture of glazed stoneware, etc.	7,250	5,311
Quantity of non-duty paid salt removed under bond to the inland warehouses	287,800	183,358
Quantity written off during the year on account of wastage or otherwise.	98,028	77,290
Total ...	13,002,165	15,402,109
Balance at the close of the year	4,229,106	3,427,361

There was a marked increase both in the import and the clearances of salt during the year under report.

8. **Imports.**— * * * * * * * * * The total imports to Calcutta and Chittagong increased by 10·29 per cent. and 57·39 per cent., respectively. In Calcutta imports from European countries, Egypt and Bombay increased, but those from Massowah, Aden and Madras decreased. In Chittagong, however, the imports from the latter places showed a marked increase and those from the United Kingdom and Egypt decreased.

Out of the total importation of 12,363,719 maunds into the port of Calcutta, 5,093,304 maunds or 41 per cent. were bonded in the Sulkea *golas* as compared with 59 per cent. in the previous year. The Collector of Customs, Calcutta, reports that the decrease in receipts into bond is due to more deliveries for home consumption having been taken *ex*-ship owing to the congestion at the *golas*. During the year under report 126 vessels carrying salt entered the port of Calcutta as compared with 112 in the previous year and 129 in 1920-21.

9. **Sales of imported salt from shipboard and bond.**— * * * * * * * * * * *

In Calcutta the sales direct from shipboard increased by 62·48 per cent. and those from bond decreased by 25·48 per cent. In Chittagong the sales from shipboard and from bond showed increases by 95·5 per cent. and 59·9 per cent. respectively. It has been reported that the abnormal increase in the sales was due to the fact that during the last quarter of the year under report larger deliveries *ex*-ship were taken in anticipation of the probable increase in the rate of duty. There was an increase of 11·68 per cent. in the total sales of imported salt.

10. **Transactions in the golas.**—The total transactions at the *golas* in Calcutta and Chittagong for the past five years are given below :—

Years.	Calcutta Mds.	Chittagong. Mds.
1918-19	14,266,818	2,070,799
1919-20	15,278,108	1,310,126
1920-21	16,504,658	2,979,335
1921-22	13,570,870	2,466,347
1922-23	10,914,216	3,768,997

* * * * * * * * * * *

12. **Inland bonded warehouses.**—There were 4 private bonded warehouses in this Presidency as compared with the same number in the previous year, viz. 1 at Narainganj, 1 at Jhalakati and 2 at Chandpur. The quantity of salt despatched to the above four inland werehouses from shipboard and *golas* in the ports of Calcutta and Chittagong was 183,358 maunds as compared with 287,800 maunds in the previous year, showing a decrease by 36·28 per cent. The decrease was due to more duty-paid salt having been imported direct from Calcutta and Chittagong by the wholesale dealers. No quantity of salt was despatched to the bonded warehcuses in other provinces.

* * * * * * * * * * *

CHAPTER III.

Consumption and Prices.

15. **Consumption.**—The total quantity of salt which passed into consumption during the year under report was 15,114,697 maunds. This is inclusive of 14 maunds imported from Tibet, but exclusive of 23,043 maunds exported to Nepal, Sikkim and Bhutan.

16. **Prices of salt in Bengal generally.**— * * * * * * * * * *

There was an increase of annas 3-6 last year over the previous year's average.

The fluctuations in the price of salt per 100 maunds are given below :—

Description of salt.	1ST QUARTER.		2ND QUARTER.		3RD QUARTER.		4TH QUARTER.	
	Calcutta.	Chittagong.	Calcutta.	Chittagong.	Calcutta.	Chittagong.	Calcutta.	Chittagong.

It will be seen from the above statement that the prices were high during the first half year and fell during the second half. In Calcutta the lowest price recorded was in respect of Aden salt and in Chittagong it was for Madras salt.

CHAPTER V.

Financial results.

19. **Receipts and charges.**— * * * * * * * * * The receipts show an increase by Rs. 28,33,520 or 18·18 per cent. The total charges also show an increase by Rs. 14,614 or 4·71 per cent. The net revenue was Rs. 1,80,86,714 which was larger than that of the previous year by Rs. 28,18,906 or 18·46 per cent. The increase in the receipts occurred mostly under the head "Import duty on salt." The charges do not include any share of the cost of the Customs Preventive Service, which is largely employed in safe guarding the salt revenue. As the Salt Preventive Department under my control has been amalgamated with the Excise Department the whole expenditure of the two departments is debited to the head "6—Excise" in the first instance, a fixed sum of two lakhs being subsequently adjusted under "3—Salt."

CHAPTER VI.

Miscellaneous.

20. **Saltpetre refineries and soda factories.**—There were three licensed saltpetre refineries at Manicktola, Kakurgachi and Sulkea, as compared with five in the previous year. The licenses for the refineries at Bahirsura and Baranagar were not renewed during the year under report. The quantity of refined saltpetre produced during the year was 1,742 maunds as compared with 4,399 maunds in the previous year. The decrease in the production was partly due to the absence of orders from foreign countries and partly to the closure of two refineries. The quantity of salt educed in the process of refinement was 85 maunds as compared with 288 maunds in 1921-22, and the quantity of *sitta* (impure salt) left in the course of refinement was 98 maunds as compared with 244 maunds. Thirty-two maunds of educed salt were sold during the year as compared with 939 maunds in the preceding year. A sum of Rs. 150 was realised as license fee from the three saltpetre refineries.

Secretary to the Government of Bengal.

COMMERCE DEPARTMENT.

NOTIFICATION.

No. 5820Com.—The 4th October 1923.—The following draft of rules which, in exercise of the power conferred by section 29 of the Indian Boilers Act, 1923 (Act V of 1923), the Governor in Council intends to make, is published, as required by sub-section (*1*) of section 31 of the said Act, for general information.

2. The draft will be taken into consideration on or after the 15th November 1923, and any objections or suggestions in respect thereof which may be received by the undersigned on or before that date will be duly considered :—

Rules under section 29 of the Indian Boilers Act, 1923 (V of 1923).

I.—Preliminary.

Definitions.

1. In these rules, unless there is anything repugnant in the subject or context,—

(*a*) "the Act" means the Indian Boilers Act, 1923 (V of 1923).

(*b*) "section" means a section of the said Act.

(*c*) "regulation" means a regulation framed by the Government of India under section 28 of the said Act.

2. A Boiler Commission shall be appointed to consist of the Director of Industries, Bengal, and not less than five other Commissioners to be appointed by the local Government from time to time. The Director of Industries, Bengal, shall be *ex officio* the President of the Commission, and the Chief Inspector shall be *ex officio* the Secretary and a member of the Commission.

3. The Commission shall meet periodically (at least once a month) for the transaction of business.

4. At least four clear days' notice of all meetings shall be given to each member.

The notice shall state the business to be transacted at the meeting, and no business other than that so stated shall be transacted, except with the consent of the majority of the members present.

5. At every meeting of the Commission, three members shall form a quorum.

6. Every meeting shall be presided over by the President of the Commission, or, in his absence, by a member chosen by the members present at the meeting.

7. It shall be the duty of the Commissioners at periodical meetings—

(1) to consider the business stated in the notice of the meeting, and any other business that the members present may consent to consider in accordance with rule 4,

(2) to examine the diaries of the Inspectors, and pass such orders thereon as may seem necessary,

(3) to keep a record of their proceedings in such form as may seem advisable and to submit a copy of the same to the local Government,

(4) to submit an annual budget to the local Government, showing the estimated receipts and disbursements of the Commission for the ensuing year,

(5) to submit an annual report to the local Government reviewing the work done by the Boiler Commission during the calendar year,

(6) to prescribe the registers and accounts which are to be kept up by the Secretary and the office,

(7) to check the statement of receipts of inspection-fees, comparing it with the amount appropriated for inspections completed, *plus* the balance for outstanding inspections which is prepared by the Chief Inspector from the diaries of the Inspectors,

(8) to compare the statement of collections with the cash-book, and the cash-book with the bank book, and

(9) to pass or authorize the President to pass such orders as they or he may think fit for determining the mode of disposal of fees, costs and penalties levied under this Act.

8. The Commissioners shall from time to time prepare and submit, for the sanction of the local Government, a schedule of the establishment and salaries they consider necessary for carrying out the purposes of the Act.

9. After the sanction of the local Government to such schedule the Commissioners shall have the power to appoint clerks, etc., and shall also have the power to select Inspectors for appointment under section 5 of the Act. They shall also have power to suspend or remove such officers as are appointed by them.

10. The Chief Inspector shall submit to the Commission at each meeting the Inspector's reports on the boilers inspected in the form of a diary, which shall be recorded in the office.

11. (*1*) Fees for inspection shall be calculated on the basis of boiler rating, as prescribed in Part II, Chapter I, Regulation 158 of the regulations. The following fees are prescribed :—

Registration fees.—Fees for registration and first inspection of boilers are prescribed in section 159 of the regulations.

Fees for the issue of renewed certificates of boilers shall be charged according to the following scale :—

	Rs.
For boiler rating not exceeding 100 square feet	20
For boiler rating exceeding 100 square feet but not exceeding 300 square feet	25
" " 300 " " " 500 "	30
" " 500 " " " 700 "	35
" " 700 " " " 900 "	40
" " 900 " " " 1,100 "	45
" " 1,100 ...	50

Provided that when any owner is willing to accept a renewed certificate for less than twelve months in order to approximate the date of annual inspection to the date on which other boilers in the locality are inspected, a certificate for such period less than twelve months as may be necessary for such approximation of dates may be granted at a reduced fee to be calculated at one-twelfth of the ordinary fee for each full month a portion of a month not being reckoned.

(*2*) *Second fee in default.*—A second fee will be leviable for re-inspection in any case where the inspection of a boiler is begun but owing to the fault or neglect of the owner or person in charge, is not completed within a period of six months from the date of commencement of inspection.

(*3*) Duplicate certificates for *bona-fide* purposes may be issued to boiler owners under the orders of the Chief Inspector on receipt of a fee of Rs. 3 per copy.

(*4*) An additional fee of Rs. 50 shall be charged for the inspection of a boiler on a Sunday, X'mas Day, New Year's Day, Good Friday and the King's Birthday. Half of the additional fee so charged shall be paid to the Inspector, the other half shall be credited to the "Steam Boiler Inspection Fund."

(*5*) A fee of Rs. 20 may be charged for the examination of drawings or tracings of boilers or steam pipes.

(*6*) In addition to the above fees an Inspector's travelling expenses shall be realized from owners whose boilers are not ready for inspection on the first visit made on their application, for every additional visit paid by the Inspector for the completion of the inspection.

(*7*) The Inspector's travelling expenses may also be charged for boilers in isolated areas in addition to the fees prescribed in this rule.

(*8*) For formula for calculating Boiler rating (see Regulation No. 157).

12. *Fee to cover inspection and tests.*—A fee paid for the inspection of a boiler shall cover thorough inspection, hydraulic test and steam test where such are necessary, subject to the provisions of section 14 (*2*).

II.—Duties of the Chief Inspector.

13. The Chief Inspector is vested with all the powers of an Inspector under the Act. His main duty, however, consists in supervising and controlling the work of the Inspectors, and he should only actually inspect or examine boilers in exceptional cases, or where he considers that the work of an Inspector requires a personal check.

Duty of general control

Specific duties.

14. The Chief Inspector shall—

(*a*) personally check the registration and measurements of all newly registered boilers, for the initial working pressure and enter under his own signature all orders required by section 7,

(*b*) enter under his own signature any subsequent entries required in the registration book,

(*c*) obtain the registration book of boiler which has been registered in another province and where the subsequent transfer of such boiler to this province is reported under clause (*b*) of section 6,

(*d*) fix the area under the control of each Inspector,

(*e*) approve the programme of inspections of all Inspectors subordinate to him with due regard to the convenience of owners generally,

(*f*) examine and countersign the Inspectors' memorandum of inspection book of each boiler after each inspection,

(*g*) examine and pass orders on the diaries and returns of Inspectors,

(*h*) pass orders in all cases in which an Inspector proposes to increase or reduce the pressure allowed for any boiler under proviso (*a*) (*ii*) of section 8 (*5*) or to revoke, cancel or refuse to renew the certificate of a boiler under section 11, or to order important repairs, structural alterations, or renewals in a boiler under section 8,

(*i*) pass orders in all cases in which it is reported that after due notice the boiler has not been properly prepared for inspection,

(*j*) decide all appeals against the order of an Inspector under section 19;

(*k*) sanction prosecutions under the Act,

(*l*) enquire into serious accidents to boilers.

Instructions to owners.

15. It shall be the duty of the Chief Inspector to advise owners as regards the maintenance, working and cleaning of boilers; he shall issue a set of instructions for this purpose. These instructions shall be hung up in each boiler house.

Registers to be kept.

16. The Chief Inspector shall keep in his office—

(*a*) a register in Form A to these rules of all boilers registered in the province, or the registry of which has been transferred from another province,

(*b*) the registration book and memorandum of inspection book of all boilers borne on his register,

(*c*) a register of appeals,

(*d*) a register of accidents, and

(*e*) a register of registration and inspection-fees received.

Control of bills.

17. The Chief Inspector shall be the controlling or countersigning authority in respect of all contingent bills and of travelling allowance bills of officers subordinate to him.

18. The Chief Inspector shall be the head of the office of the Boiler Commission, and shall be responsible for the good order and management of the office. He shall see that all notices are duly served, and that all fees are duly brought to account and paid into the bank. He shall himself verify the balance at credit shown in the accounts of the office of the Director of Industries with the balance in the bank. He shall refer all matters of importance for the orders of the President.

19. When a certificate is required for a boiler application shall be made to the Chief Inspector at the office of the Boiler Commission by the owner or agent in Form B, No. 1 appended to these rules giving at least 14 days' notice of the date on which the boiler will be ready for inspection, and the fee prescribed under rule 11 (1) for inspection shall be paid, with the application, to the office of the Director of Industries, Bengal, and the Chief Inspector on receipt of such application with the receipt by the cashier of the office of the Director of Industries, Bengal, showing that the fee for inspection and the extra fee, if any, chargeable for inspection on a Sunday or other holidays as laid down in rule 11 (4) have been paid, will arrange for the inspection to take place on the date notified, if possible; but should that date not prove suitable, he shall as soon as possible appoint another date and inform the owner or agent accordingly.

III.—Duties of Inspectors.

Subordinate to Chief Inspector.

20. Inspectors shall be directly subordinate to and under the control of the Chief Inspector; they should ordinarily be appointed to take charge of the specific areas

General duties of Inspectors.

21. The main duties of the Inspectors are the inspection and examination of boilers and steam pipes. Inspections shall be carried out in accordance with the regulations.

22. There shall be two kinds of inspection of boilers :—

(*a*) When the certificate granted under this Act is about to expire or when this has been revoked or suspended under section 11 and the owner desires that it shall be renewed, a thorough examination inside and outside, shall be made by one of the Inspectors in person, for which purpose the boilers must be prepared as required by section 150 of the regulations.

(*b*) An ordinary inspection may be made by an Inspector at any time for the purpose of ascertaining whether a certificate should be revoked or suspended under section 11.

Search for unregistered boilers.

23. In addition to the inspection and examination of boilers, it shall be the duty of Inspectors to search for unregistered or uncertificated boilers within their areas, and to see that certificated boilers are worked in accordance with the terms of their certificates.

Advice to be given to owners.

24. At the time of inspection, Inspectors shall advise the owner and the person in charge of the boiler on the management and upkeep of the boiler with special reference to the amount of cleaning required in view of the quality of water used.

Specific duties.

25. Inspectors shall—

(*a*) prepare a programme of inspections with regard to the convenience of owners generally and submit it to the Chief Inspector for approval at such periods as he may fix, at least 14 days before the first date stated in the programme;

(*b*) maintain a memorandum of inspection book for each boiler under their charge and submit it to the Chief Inspector for examination and countersignature after each inspection;

(*c*) keep a diary for monthly submission to the Chief Inspector, showing places visited, boilers registered or inspected, variations from the programme, and any other important particulars;

(*d*) receive applications for registration or inspection under section 7 or 8, proposals for repairs, alterations or renewals under section 12 and 13, reports of accidents under section 18;

(*e*) enquire into accidents to boilers or steampipes and report to the Chief Inspector;

(*f*) report to the Chief Inspector cases of unreported accidents discovered at the time of inspection;

(*g*) submit for the orders of the Chief Inspector—

(*i*) the memorandum of inspection books of all boilers proposed for registration under section 7;

(*ii*) proposals for increasing or decreasing the pressure of a boiler after inspection under proviso (*a*) (*ii*) to section 8 (*5*);

(*iii*) proposals for necessary repairs, structural alterations or renewals to a boiler after inspection under section 8 or 12;

(*iv*) proposals for revoking, cancelling or refusing to renew a certificate under section 8 or 11;

(*v*) report when boilers have not been properly prepared for inspection under section 14;

(*vi*) proposals for prosecutions under the Act.

26. When an inspection under the Act is completed, the Inspector making it shall prepare a declaration in Form No. B 2 appended to these rules in column 8 of which the limit of the working pressure, in pounds per square inch, shall be clearly noted.

General.

27. Upon receipt of the declaration in the office, a certificate shall be prepared in the Form VI prescribed by regulations. Such certificate shall be signed by the Inspector and the Chief Inspector and shall be delivered to the owner, manager or agent of the steam boiler inspected.

The time for inspection of boiler shall be between sunrise and sunset.

Accidents.

Investigation of accidents.

28. On receipt of a report of an accident to a boiler or steampipe under section 18, the Inspector shall, with the least possible delay, proceed to the place to investigate the accident. If the report is received by the Chief Inspector, he shall forward it at once to the Inspector, within whose jurisdiction the accident has occurred, for necessary action.

Procedure during enquiry

29. The Inspector at his enquiry shall make a careful examination of the damaged parts, and shall take such measurements and make such sketches for the purpose of his report, as he may deem necessary. He shall enquire into the circumstances attending the accident and note the time of its occurrence, its nature and extent, the injury caused to persons and the damage done to property. The report should be in the style of the Reports of Preliminary Enquiries under the British Boiler Explosion Acts, 1882 and 1890.

Power to hold enquiry in writing.

30. Inspectors are authorized to take the written statements of witnesses and all persons immediately concerned with the accident. In order to comply with the provisions of section 18 (*2*) the Inspector shall present to the owner or person in charge of the boiler a series of written questions on all points that are material to the enquiry.

Use of boiler after accident.

31. The Inspector shall decide whether the use of the boiler can be permitted at the same or at a lower pressure without repairs or pending the completion of any repairs or alterations that he may order. In no case should he issue a provisional order or renewal certificate, until his orders have been carried out.

Procedure in case of serious accidents.

32. The report shall be sent without delay to the Chief Inspector; if he considers that the investigation has been sufficient, he will record the facts in his register of accidents, and enter a brief account of the accident in the registration book, a copy shall be made in the memorandum of inspection book. If, however, the accident is of a serious nature and in all cases in which an explosion has occurred, the Chief Inspector shall, after receipt of the Inspector's report, proceed to investigate the accident personally or report to the Boiler Commission to enquire into the accident. Reports of such enquiries shall be recorded as indicated above.

33. A brief account of all accidents and their causes shall be included in the annual report.

Reference in annual report

34. If in the course of an inspection or at any other time, the Inspector discovers damage which comes within the definition of an accident, but which has not been reported, he shall report the facts at once to the Chief Inspector for action under section 24 (*d*).

Appeals.

35. Every petition of appeal shall be made in writing either in English or in the vernacular.

Filing of appeal.

36. An appeal may be presented either personally or by registered post to the Chief Inspector.

Presentation of appeal.

37. The petition of appeal shall be accompanied by the original order, notice or report appealed against, or by a certified copy thereof, or where no such order, notice or report has been made in writing, by a clear statement of the facts appealed against, the grounds of appeal and the referring section of the Act.

Form of appeal.

38. On receipt of an appeal, the Chief Inspector shall, if the appeal is to be heard by himself, at once fix a date for hearing the appeal; and if it is to be heard by the appellate authority, obtain a date for the hearing of the appeal from the President of that authority. No delay shall be made in deciding appeals, as the stoppage of a boiler is likely to put the owner thereof to great inconvenience. The decision should ordinarily be given within 10 days from the receipt of the petition of appeal.

Fixing date for hearing

39. When the date for hearing has been fixed, the Chief Inspector shall at once issue a notice to the appellant stating the date for hearing and informing him that if he wishes to be heard in support of the appeal or to produce evidence, he must be present either in person or by authorized agent with his evidence on the date fixed. The notice shall be sent to such address as shall be entered in the petition of appeal.

Procedure before hearing.

40. In all appeals the Chief Inspector shall decide whether the presence of the Inspector is necessary, and shall issue orders accordingly.

Presence of Inspector.

41. The appellate authority shall have power to secure the attendance of witnesses and to make local enquiries under the provisions of the Code of Civil Procedure, 1908.

Attendance of witnesses.

42. If the appellant is not present on the date fixed, the appeal may be decided in his absence.

Ex parte decisions.

43. The local Government shall appoint, when necessary, an officer to be President of the appellate authority for such period as it thinks fit. The President shall be an officer with judicial or magisterial experience.

President of appellate authority.

44. The Boiler Commission shall constitute the panel of assessors for the purpose of assisting in the hearing of appeals.

45. Whenever the date for an appeal before the appellate authority has been fixed, the Chief Inspector shall, when necessary, under the orders of the President of the authority, arrange for the attendance of three members of the Boiler Commission to act as assessors.

Constitution of appellate authority.

46. All sums relized as fees, costs and penalties under the Act shall be credited to the Steam Boiler Inspection Fund.

47. In appeals before the appellate authority the President of the authority is authorized to fix the costs and recover them from the appellant in any case in which the appeal is dismissed; in all cases of appeal in which a local inspection is required by the appellant he shall deposit in advance the full costs of such inspection.

Costs in appeals

Fees required for certificates granted on appeal.

48. Any order on appeal authorizing the registering of a boiler or the grant or renewal of a certificate shall be deemed to be subject to the payment of such fees as are prescribed by rules or regulations framed under the Act.

Administrative Instruction for Registration.

Importance of registration.

49. Technical regulations for the registration of boilers and the scale of fees for registration are prescribed in Part II of the regulations. The details of measurement recorded at the time of registration constitute a permanent record for the boiler and determine the original pressure at which the boiler is allowed to work. It is accordingly essential that the work should be done with the greatest care and precision.

Receipt of applications.

50. Applications for registration shall be made under section 7 (*1*) to the Chief Inspector, and shall be accompanied under rule 19 by a receipt for the prescribed fee. No application shall be accepted without the receipt. No boiler shall be registered, if on measurement the fee is found to be deficient, until the deficit has been paid. Any excess payment will be refunded at the time of registration.

Necessity of avoiding delay.

51. It is essential that no delay should occur in registration. In large towns, the measurements under section 7 (*3*) should ordinarily be completed and the report submitted to the Chief Inspector within 7 days of the receipt of the application; in no cases should the interval exceed 30 days. The Chief Inspector should issue his orders under section 7 (*4*) without delay.

Register of registered boilers.

52. The Chief Inspector shall maintain a register of registered boilers in serial order in Form A in two parts; in Part I (boilers originally registered in the province) the registered number of a boiler shall be the one immediately following the last serial number in the register. Gap numbers due to boilers being broken up or transferred to another province shall not be filled up. In Part II (boilers originally registered in other provinces) entries shall be made as prescribed in rule 54. Inspectors shall keep a similar register for all boilers within their jurisdiction.

Procedure on transfer of a boiler.

53. Whenever a boiler is transferred from one province to another, the owner shall, under section 6 (*b*), apply to the the Chief Inspector of the province to which the boiler is transferred, for the registration of the transfer; the boiler cannot be used until registration has been effected. The Chief Inspector shall then obtain from that province the registration book and memorandum of inspection book of the boiler. No fee shall be charged for recording transfer.

Entry of transferred boiler in register.

54. On receipt of the registration and memorandum of inspection books the Chief Inspector shall enter the boiler under its original number in Part II of his register. The registration book and the memorandum of inspection book shall be kept in the Chief Inspector's office.

Note of transferred and dismantled boilers.

55. Whenever a boiler has been transferred or broken up, the fact shall be noted in the register of the province from which it has been transferred. In the case of a boiler that has been permanently dismantled the registration book and the memorandum of inspection book shall be destroyed.

Administrative Instructions for Inspection.

Reference to previous inspections.

56. Detailed instructions for the inspection of boilers are contained in Part II of the regulations. In making inspections it is important that the Inspector should pay particular attention to entries made in the memorandum of inspection book at the time of the previous inspection.

Procedure during inspection.

57. In arranging for inspections particular attention should be paid to the provisions of rule 25 (*a*). If an hydraulic test is necessary in addition to the ordinary inspection, ample notice must be given to the owner. During the inspection of one of a battery of boilers, the Inspector should take the opportunity of examining the other boilers under steam, with special reference to the water gauges, pressure gauges, and safety valves.

Issue of certificates and provisional orders.

58. All certificates must be issued from the head office after being countersigned by the Chief Inspector. Provisional orders should be issued in every case of registration after hydraulic test if the Inspector is satisfied. The steam test may be witnessed at any convenient time within the period of the provisional order, after which if the test is satisfactory the certificate under section 7 is to be issued.

Provisional orders must also be issued after every completed inspection for renewed certificates, so as to give authority for the use of boilers pending the issue of certificates.

The period specified in any provisional order or certificate shall begin on the day following that on which the completed hydraulic test or thorough inspection is made.

59. Certificates and provisional orders shall be issued in Forms VI and V, respectively.

60. Fees for inspection shall be calculated on the basis of boiler rating as prescribed under rule 11 (*l*).

(*See* Part II, Chapter I of the Regulations.)

REGULATION 150.

(A) PREPARATION FOR THOROUGH INSPECTION.

At every inspection of a boiler for the grant or renewal of a certificate, the boiler shall be empty and thoroughly clean in all its parts. All doors of manholes, handholes and sightholes and cleaning plugs and all caps in the headers and mud-drums of water-tube boilers, all firebars, bearers, front plates, bridge plates, firebridges, brick arches, oil fuel burners and mechanical stoker fittings shall be removed. All valves and cocks comprising the boiler mountings shall be opened up and taken apart and the valves and cocks ground, when necessary, before the Inspector's visit.

Provision shall be made for the removal of lagging or brickwork or other concealing part and for the drilling of plates, if required by the Inspector, and for verifying the pressure gauge and safety valve dimensions and weights. All smoke tubes, exterior of water tubes, smoke boxes, and external flues must be swept clean.

Provision shall be made for the effective disconnection of all steam and hot water communication with any other boilers under steam, as prescribed in Part III of the regulations. This shall be effected either by the removal of a length of pipe from the steam and feed piping or by the insertion of substantial blank flanges. Where blank flanges are employed, they shall be inserted between the flange of the chest and the pipe attached to it. No blank flange shall be inserted between a safety valve chest and the boiler.

NOTE.—These provisions as to effective disconnection shall extend to every case wherein a person is sent, or with the assent of the owner or person in charge goes, into a boiler for any purpose. See Part III of the Regulations.

(B) PREPARATION FOR HYDRAULIC TEST.

The chest of all mountings subject to steam pressure shall be in place and shut tight or blank-flanged. The safety valves shall either be jammed down or removed and the chest-opening blank-flanged. The attachment * for the Inspector's pressure gauge and the nipple † for connecting the Inspector's test pump hose shall be in order. All doors shall be properly jointed and tightened up. The boiler shall be completely filled with water, care being taken to allow all air to escape and, if possible, a preliminary test not exceeding the working pressure of the boiler shall be taken before the Inspector's visit to test the tightness of the joints. When a boiler is hydraulically tested for the first time, it shall be entirely cleared of lagging or brickwork; at subsequent tests the lagging or brick work, or portions thereof, shall be removed if required by the Inspector.

PREPARATION NOW REQUIRED (A), (B).

NOTE.—The last certificate for the boiler shall be shown to the Inspector

The Calcutta Gazette

WEDNESDAY, OCTOBER 10, 1923.

PART IA.

Orders and Notifications by the Government of India.

The following notifications, issued by the Government of India in the Legislative Department, published in the *Gazette of India*, dated the 29th September 1923, is republished for general information.

L. BIRLEY,
Chief Secretary to the Government of Bengal.

NOTIFICATIONS.

Simla, the 26th September 1923.

No. 219.—The following Order in Council was published in the *London Gazette* on the 3rd August 1923, and is hereby republished for general information :—

Extradition (White Slave Traffic) Order in Council, 1923.

AT THE COURT AT BUCKINGHAM PALACE.

The 30th day of July 1923.

PRESENT :

THE KING'S MOST EXCELLENT MAJESTY.

Lord President.
Lord Chamberlain.
Secretary Sir Samuel Hoare.
Major George Tryon.

WHEREAS by the Extradition Acts, 1870 (33 & 34 Vict., c. 52) to 1906 (6 Edw. VII c. 15) it was, amongst other things, enacted that, where an arrangement has been made with any foreign State, with respect to the surrender to such State of any fugitive criminals, His Majesty may, by Order in Council, direct that the said Acts shall apply in the case of such foreign State ; and that His Majesty may, by the same or any subsequent Order, limit the operation of the Order, and restrict the same to fugitive criminals who are in or suspected of being in the part of His Majesty's Dominions specified in the Order, and render the operation thereof subject to such conditions, exceptions and qualifications as may be deemed expedient :

And whereas Treaty arrangements exist between His Majesty and the Powers and States set forth in the accompanying schedule for the mutual extradition of fugitive criminals which have been duly put in force by Order in Council :

And whereas a convention was concluded between His Majesty and the other Powers and States enumerated therein among which are those set forth in the accompanying schedule, on the 4th day of May 1910, for the suppression of the White Slave Traffic which contains Articles in the terms following :—

"ARTICLE 1.

" Doit être puni quiconque, pour satisfaire les passions d'autrui, a embauché entrainé, ou détourné, même avec son consentement, une femme ou fille mineure, en vue de la débauche, alors même que les divers actes qui sont les éléments constitutifs de l'infraction auraient été accomplis dans des pays différents.

"ARTICLE 2.

" Doit être aussi puni quiconque, pour satisfaire les passions d'autrui, a par fraude ou à p'aide de violences, menaces abus d'autorité ou tout autre moyen de contrainte embauché, entrainé ou détourné une femme ou fille majeure, en vue de la débauche, alors même que les divers actes qui sont les éléments constitutifs de l'infraction auraient été accomplis dans des pays différents.

* * * * * * * *

"ARTICLE 5.

" Les infractions prévues par les articles 1 et 2 seront, à partir du jour de l'entrée en vigueur de la présente Convention réputées être inscrites de plein droit au nombre des infractions donnant lieu à extradition d'après les Conventions déjà existantes entre les Parties contractantes.

" Dans les cas ou la stipulation qui précède ne pourrait recevoir effet sans modifier la législation existante, les Parties contractantes s'engagent à prendre ou à proposer à leurs legislatures respectives les mesures nécessaires.

* * * * * * * *

ARTICLE 11.

" Si un Etat contractant désire la mise en vigueur de la présente Convention dans une ou plusieurs de ses colonies, possessions ou circonscriptions consulaires, judiciaires, il notifiera son intention à cet effet par un acte qui sera déposé dans les archives du Gouvernement de la République française. Celui-ci en enverra, par la voie diplomatique, copie certifiée conforme à chacun des Etats contractants et les avisera en même temps de la date du depôt.

* * * * * * * *

" Six mois après la date du dépôt de l'acte de notification, la Convention entrera en vigueur dans les colonies, possessions ou circonscriptions consulaires judiciaires visées dans l'acte de notification."

* * * * * * * *

And whereas His Majesty's Ratification of this Convention on behalf of the United Kingdom of Great Britain and Ireland was deposited at Paris on the eighth day of August, One thousand nine hundred and twelve :

And whereas His Majesty has acceded to the Convention in respect of the following self-governing Dominions on the dates respectively mentioned :—

Canada—August 25th, 1913
Union of South Africa—September 19th, 1913
New Zealand—October 1st, 1913
Newfoundland—October 1st, 1913
Australia (including Papua and Norfolk Island)—February 18th, 1914

in respect of India on the 27th March, 1922, in respect of the following Colonies on the 4th November, 1921 :—

Bahamas
Ceylon
Cyprus
Fiji
Kenya
Gibraltar
Hong Kong
Jamaica
Malta
Straits Settlements
Trinidad

and in respect of the following Colonies on the 15th March, 1923 :—

Barbados.	St. Lucia.
British Guiana.	St. Vincent.
British Honduras.	Seychelles.
Grenada.	

Now, therefore, His Majesty, by and with the advice of His Privy Council, and in virtue of the authority committed to Him, by the Extradition Acts, 1870 to 1906, doth order, and it is hereby ordered, that the said Acts shall apply in the case of the Powers and States in the accompanying schedule in accordance with the Treaties therein described as supplemented by the said Convention. This order shall come into operation in Great Britain and Northern Ireland, and in the Irish Free State from and after the 13th day of August, 1923, in the above mentioned self-governing Dominions and Colonies in respect of which His Majesty has acceded to the Convention in accordance with Article 11 thereof, and in India or in British possessions in respect of which His Majesty may in future accede thereto, it shall in each case come into operation on a date six months after the respective date of such accession, or from and after the said 13th day of August, whichever shall be the later date.

Provided always that the operation of the said Acts shall be and remain suspended within the Dominion of Canada so long as an Act of the Parliament of Canada being Part I of Chapter 155 of the Revised Statutes of Canada, 1906, and entitled "An Act respecting the Extradition of Fugitive Criminals," shall continue in force there, and no longer.

And provided that where one of the Powers and States set forth in the accompanying schedule has not notified its intention that the said Convention shall come into force in any of its Colonies, Possessions or Consular Judicial Districts by a declaration to that effect deposited in the archives of the Government of the French Republic, the operation of the said Acts shall be and remain suspended in respect of any such Colonies, Possessions or Judicial Districts until such declaration shall have been so deposited, and no longer.

M. P. A. Hankey.

NOTIFICATION.

JUDICIAL.

Simla, the 22nd September 1923.

No. F.-120-22.—In exercise of the powers conferred by section 12 of the Maintenance Orders Enforcement Act, 1921 (XVIII of 1921), and in supersession of the notification of the Government of India in the Home Department No. F.-120, dated the 11th May 1922, the Governor General in Council is pleased to make the following rules:—

XVIII of 1921.

1. These rules may be called the Maintenance Orders Enforcement Rules, 1923.

2. In these rules the expression "the Act" means the Maintenance Orders Enforcement Act, 1921.

3. The officer to whom copies of maintenance orders shall be sent under sub-section (*1*) of section 4 of the Act shall be, in the case of a High Court, the Registrar of such Court, and, in the case of a Court of summary jurisdiction, the presiding officer of such Court.

4. When such copy is received by the Registrar or officer, the contents thereof shall be entered in a register maintained for the purpose in the form shown in the Schedule to these rules.

5. The notice referred to in sub-section (*4*) of section 6 of the Act shall be issued to the person who applied under sub-section (*1*) of that section; it shall contain particulars of the further evidence which is required by the Court in the reciprocating territory, and shall also state the date when the further evidence will be taken.

6. The officer of a Court of summary jurisdiction to whom the documents referred to in sub-section (*1*) of section 7 of the Act may be sent under the provisions of that sub-section shall be the presiding officer of such Court.

7. (*1*) When an order has been registered under rule 4, the party in whose favour the order has been made shall be entitled to appear, either in person or by pleader or duly authorised agent, before the High Court or Court of summary jurisdiction in which the order has been registered, or, as the case may be, before the Civil Court named by such High Court under sub-section (*1*) of section 8 of the Act, and to move such Court to enforce the order.

(*2*) If within a period of one month from the date of the registration of the order, or, as the case may be, of its transfer to the Civil Court named by the High Court no such appearance has been made, the High Court, Civil Court or Court of summary jurisdiction, as the case may be, shall appoint an officer of the Court to apply for execution of the order, and such officer shall be entitled to obtain execution thereof on behalf of the person in whose favour the order has been made, and shall pay into the Court any monies realised in execution of the order:

Provided that that the appointment of such officer shall cease to have effect in the event of the subsequent appearance under sub-rule (*1*) of the party in whose favour the order has been made.

8. A Court of summary jurisdiction shall exercise in respect of a maintenance order registered or confirmed by it under the Act the powers conferred on it by sub-section (*3*), excluding the provisos thereto, and sub-section (*7*) of section 488 of the Code of Criminal Procedure, 1898, in respect of an order passed by it under sub-section (*1*) of that section.

9. (*1*) During the pendency of proceedings under the Act or these rules with reference to a maintenance order made in reciprocating territory, whether such order be provisional or otherwise, the person against whom the order has been made shall without delay notify the Court in which such proceedings are pending of any change in his address.

(*2*) The Court shall at the outset of all such proceedings give notice to such person of the obligation imposed by sub-rule (*1*).

10. The charges referred to in section 9 of the Act, and the sum in rupees required for the purchase of a draft for the amount of the sum awarded as maintenance in sterling or other non-rupee currency shall be assessed by the Court at the time of the registration or confirmation of the order, as the case may be, and any sum recovered in excess as the result of such assessment from the person against whom the order has been made shall be refunded to such person.

11. A Court recovering any sum on account of maintenance in accordance with a maintenance order registered or confirmed by it under the Act shall forthwith cause the said sum to be remitted by the local head office or branch of the Imperial Bank of India, or, where there is no such local head office or branch, by any other agency which the Court considers suitable, to the Clerk of the Court from which the order has been received or such other officer or person as may be specified by that Court for that purpose.

12. (*1*) For every summons requiring the attendance of a witness or the production of a document which is issued by a Court of summary jurisdiction in the course of proceedings under section 6 or section 7 of the Act, there shall be charged to the person at whose instance the summons is issued such fee as would be chargeable for the issue of a like summons in a proceeding under secton 488 of the Code of Criminal Procedure, 1898.

(*2*) For any process issued in the course of proceedings taken in pursuance of section 8 of the Act there shall be chargeable, in the case of proceedings in a High Court or of a subordinate Civil Court named by a High Court, such fee as would be chargeable for the issue of a like process in the course of the execution of a decree of such Court, and, in the case of proceedings in a Court of summary jurisdiction, such fee as would be chargeable for the issue of a like process in the course of proceedings under section 488 of the Code of Criminal Procedure, 1898.

(*3*) Fees of the nature referred to in sub-rule (*2*) shall not be chargeable in advance but the amount thereof shall be added to the amount to be recovered from the person against whom the order has been made.

(*4*) The amount of the actual expenditure incurred in sending a certified copy of the record to the Governor General in Council under sub-section (*6*) of section 7 of the Act and in its subsequent transmission to the Court which made the provisional order, shall be recovered from the applicant for the rescission or variation of that order as confirmed, and the confirming Court may decline to send the copy for transmission until the probable amount of such expenditure has been deposited by the applicant:

Provided that any excess of an amount so deposited over the actual expenditure shall be refunded to the applicant.

13. When a Court of summary jurisdiction has under sub-section (*4*) of section 7 of the Act confirmed with or without modification a provisional maintenence order made by a Court in reciprocating territory or has decided not to confirm such order, notice of such confirmation or decision, as the case may be, shall be sent to the Court from which the order issued and to the Governor General in Council.

Bhupendranath Basu, Esquire, Member of the Council of India; and

Reginald Coupland, Esquire, Beit Professor of Colonial History in Our University of Oxford.

Greeting!

Whereas, having regard to the necessity for maintaining a standard of administration in conformity with the responsibilities of the Crown for the Government of India, and to the declared policy of Parliament in respect of the increasing association of Indians in every branch of the administration, and in view of the experience now gained of the operation of the system of government established by the Government of India Act in respect of the superior Civil Services in India, We have deemed it expedient that a Commission should forthwith issue to inquire into :—

(1) The organisation and general conditions of service, financial and otherwise, of those Services;

(2) The possibility of transferring immediately or gradually any of their present duties and functions to services constituted on a provincial basis;

(3) The recruitment of Europeans and Indians respectively for which provision should be made under the Constitution established by the said Act, and the best methods of ensuring and maintaining such recruitment; and to make recommendations:

Now know ye, that We, reposing great trust and confidence in your knowledge and ability, have authorized and appointed, and do by these Presents authorize and appoint you, the said Arthur Hamilton, Viscount Lee of Fareham (Chairman); Sir Reginald Henry Craddock; Sir Cyril Jackson; Sir Chimanlal Harilal Setalvad; Sir Muhammad

Habibullah; Hari Kishan Kaul; David Petrie; Bhupendranath Basu and Reginald Coupland to be Our Commissioners for the purposes of the said inquiry.

And for the better effecting the purposes of this Our Commission, We do by th se Presents give and grant unto you, or any three or more of you, full power, at any place in Our said United Kingdom of Great Britain and Ireland, or in India, to call before you such persons as you shall judge likely to afford you any information upon the subject of this Our Commission; and also, whether in Our said United Kingdom, on in India, to call for information in writing; to call for, have access to and examine all such books, documents, registers and records as may afford you the fullest information on the subject, and to inquire of and concerning the premises by all other lawful ways and means whatsoever.

And We do by these Presents authorize and empower you, or any one or more of you, to visit and personally inspect such places as you may deem it expedient so to inspect for the more effectual carrying out of the purposes aforesaid

And We do by these Presents will and ordain that this Our Commission shall continue in full force and virtue, and that you, Our said Commissioners, or any three or more of you, may from time to time proceed in the execution thereof, and of every matter and thing therein contained, although the same be not continued from time to time by adjournment.

And We do further ordain that you, or any three or more of you, have liberty to report your proceedings under this Our Commission from time to time, if you shall judge it expedient so to do.

And Our further will and pleasure is that you do, with as little delay as possible, report to Us under your hands and seals, or under the hands and seals of any three or more of you, your opinion upon the matters herein submitted for your consideration.

Given at Our Court at *Saint James's*, the fifteenth day of June, one thousnd nine hundred and twenty-three, in the fourteenth year of Our Reign.

By His Majesty's Command,

W. C. Bridgeman.

ROYAL COMMISSION ON THE SUPERIOR CIVIL SERVICES IN INDIA.

The 19th September 1923.

No. F.-989-22.—The Secretary of State for India in Council proposes to amend the regulations for the Indian Civil Service competitive examination held annually in India so as to provide that the age of candidates will be reckoned as on the 1st January instead of the 1st August of the year in which the examination is held.

2. The change will come into operation with effect from the examination to be held in 1925, the amended rule will provide that candidates must have attained the age of 21 and must not have attained the age of 23 on the 1st day of January in the year in which the examination is held.

RESOLUTION.

The following order of the Secretary of State in Council is published for general information :—

"In exercise of the powers conferred by sub-section (*2*) of section 96-B of the Government of India Act, the Secretary of State in Council, with the concurrence of the majority of votes at a meeting of the Council held this 24th day of July 1923, has been pleased to direct that the following amendment shall be made in the Fundamental Rules, with effect from 1st January 1922 "

Insert the following as a note to rule 18 :—

"NOTE.—The Governor General in Council is authorised to relax this rule in the case of Government servants lent to the Governments of Siam and Iraq."

ORDERED that the resolution be published in the Supplement to the *Gazette of India*.

A. C. MCWATTERS,
Secretary to the Government of India.

No. 1698-C.S.R.

Simla, the 25th September 1923.

RESOLUTION.

The Secretary of State in Council is pleased to prescribe, with reference to Fundamental Rule 84, the following rules to regulate the grant of leave to officers for the study of scientific, technical or similar problems, or in order to undertake special courses of instruction. They have effect from the 1st January 1922.

Rules for the grant of additional leave to Officers for the Study of Scientific, Technical or Similar Problems, or in order to undertake special Courses of Instruction.

The following rules relate to study leave only. They are not intended to meet the case of officers deputed to other countries at the instance of Government, either for the performance of special duties imposed on them or for the investigation of specific problems connected with their technical duties. Such cases will continue to be dealt with on their merits under the provisions of Rules 50 and 51 of the Fundamental Rules. The rules apply to the Archæological Department, the Sanitary and Bacteriological Departments (other than as regards officers of the Indian Medical Service, to whom special rules apply), the Botanical Survey (including the officers of the Royal Botanic Garden, Calcutta), the Civil Veterinary Department, the Factory Department, the Geological Survey, the Agricultural Department, the Meteorological Department, the Railway Department (Traffic, Locomotive and Engineering Branches), the Telegraph Department, the Zoological Survey, the Education Department, the Public Works Department and the Forest Department (except in respect of continental tours, to which special rules apply). The rules may be extended by the authorities empowered to sanction study leave under Rule 1 to any officer, including an officer of a Provincial Service, not belonging to any of the departments mentioned above, in whose case the sanctioning authority is of opinion that leave should be granted in the public interest to pursue a special course of study or investigation of a scientific or technical nature.

NOTE.—The extension of these rules to the Public Works Department does not affect the existing rule under which officers of less than 12 years' service are allowed to visit engineering works when on leave in Great Britain, travelling expenses only being reimbursed

1. Extra furlough for the purpose of study leave may be taken either in or outside India. It may be granted to an officer of any of the departments named above by the Local Government or Administration under which he is serving, provided that when an officer borne permanently on the cadre of one province or department is serving temporarily in another province or department the grant of leave is subject to the conditions (*a*) that the sanctioning authority can make local arrangements to carry on his work in his absence, and (*b*) that the sanction of the province or department to which he is permanently attached is obtained before leave is given. Study leave should not ordinarily be granted to officers of less than five years' service or to officers within three years of the date at which they have the option of retiring, or, if they have the option of retiring after 20 years' service, within three years of the date at which they will complete 25 years' service. Nor should it be granted to officers who are about to retire on proportionate pension.

2. The grant of study leave should be made with due regard to the exigencies of the public service. In no case should the grant of this leave, in combination with ordinary leave, involve an absence of over two years from an officer's regular duties, or exceed two years in the whole period of an officer's service; nor should it be granted with such frequency as to remove him from contact with his regular work or to cause cadre difficulties owing to his absence on leave. A period of 12 months at one time should ordinarily be regarded as a suitable maximum, and should not be exceeded save for exceptional reasons.

3. An officer whose study leave is combined with any other kind of leave should be required to take his period of study leave at such a time as to retain, at its conclusion, a balance of other previously sanctioned leave sufficient to cover the period spent in returning to duty.

4. When an officer has been granted a definite period to study leave and finds subsequently that his course of study will fall short of the sanctioned period to any considerable extent, his absence from duty should be reduced by the excess period of study leave unless he produces the assent of the sanctioning authority in India to his taking it as ordinary furlough.

5. Except as provided in Rule 6, all applications for study leave should be submitted with the audit officer's certificate to the Head of the Department through the prescribed channel, and the course or courses of study contemplated and any examination which the candidate proposes to undergo should be clearly specified therein.

6. Officers on furlough or other leave in Europe or America, who wish to have part of it converted into study leave, should address the High Commissioner for India and should attach (1) a statement showing how they propose to spend the study leave, and (2)

documentary evidence that their application for the particular course of study or examination proposed has the approval of the proper authorities in India. Similarly, officers on furlough or other leave in Europe or America who desire to have it extended for purposes of study, should address the High Commissioner, but in addition to the above requirements they must support their applications with documentary evidence of their having obtained the approval of the authorities concerned in India to their applying for an extension of leave.

7. A study allowance will be granted for the period spent in prosecuting a definite course of study at a recognised institution or in any definite tour of inspection of any special class of work, as well as for the period covered by any examination at the end of the course of study. The rates as at present fixed are 12*s.* a day in the United Kingdom, 1*l.* a day on the continent of Europe, and 30*s.* a day in the United States of America. These rates are liable to revision. The rate to be granted to officers who take study leave in other countries, including India, will be specially considered by the High Commissioner or the Government of India, as the case may be, in each case. In no case will subsistence allowance be granted in addition to study allowance, and ordinarily travelling expenses will not be paid, but in exceptional cases claims will be considered on their merits by the Government of India or High Commissioner.

8. Study allowance will be admissible up to 14 days for any period of vacation. A period during which an officer interrupts his course for his own convenience cannot be considered as vacation. In the case of an officer retiring from the service without returning to duty after a period of study leave the study allawance will be forfeited. If the officer is under civil leave rules the study leave will be converted into furlough to the extent of the furlough standing to his credit at the date of retirement. Any balance of the period of study leave mentioned above which cannot be so converted will be excluded in reckoning service for pension.

9. Officers granted study leave are ordinarily required to meet the cost of fees paid for courses of study. In exceptional cases the High Commissioner or the Government of India, as the case may be, will be prepared to consider proposals that such fees should be paid by Government.

10. On completion of a course of study a certificate on the proper form (which may be obtained from the High Commissioner) together with certificates of examinations passed or of special study, shall, when the study leave has been taken in Europe or America, be forwarded to the High Commissioner. When the study leave has been taken in any other country certificates of examinations passed or of special study, which should show the dates of commencement and termination of the course, with any remarks by the instructor, shall be forwarded to the authority which sanctioned the leave. In the case of a definite course of study at a recognised institution the study allowance will be payable by the High Commissioner or in India, as the case may be, on claims submitted by the officer from time to time, supported by proper certificates of attendance. When the programme of study approved under Rule 5 does not include or does not consist entirely of such a course of study, the officer shall submit to the High Commissioner or to the authority in India which sanctioned his leave, as the case may be, a diary showing how his time has been spent, and a report indicating fully the nature of the methods and operations which have been studied, and including suggestions as to the possibility of applying such methods or operations to India. The High Commissioner or the sanctioning authority in India, as the case may be, will decide whether the diary and report show that the time of the officer has been properly employed, and will determine accordingly for what period the study allowance referred to in Rule 7 may be granted.

11. Study leave will count as service for promotion and pension, but not for furlough or any other leave. It will not affect any leave which may already be due to an officer; it will count as extra furlough, and will not be taken into account in reckoning the aggregate amount of furlough taken by the officer towards the maximum period admissible under the Fundamental Rules.

12. During study leave an officer will draw half average pay as defined in Rule 9(*2*) of the Fundamental Rules, subject to the maxima and minima laid down in Rules 89 and 90, *ibid.* The rate of exchange prescribed by the Secretary of State in Council for the conversion of leave salary (other than that admissible during the first four months of a period of leave on average pay) shall apply to study leave allowances. An officer may, subject to the approval of the proper authorities being obtained as required by Rules 5 or 6, undertake or commence a course of study during leave on average pay, and, subject to paragraphs 7 and 8, draw study allowance in respect thereof, provided that study allowance is not drawn for an aggregate period exceeding two years during the whole of an officer's service. This rule applies to military officers in civil employment taking leave under the Fundamental Rules. A military officer taking leave under military rules will draw the furlough pay admissible to him under those rules; if on combined leave he may be permitted to commence a course of study before the end of his privilege leave, and draw for such period the study allowance admissible under rule 7, without forfeiture of privilege leave allowances, the full amount of study leave taken being, for all purposes of record and subsequent calculation of leave, post-dated as if it commenced at the end of the privilege leave.

13. On an application for study leave in Europe or America being sanctioned by the Government of Madras, Bombay or Bengal, the local Government should inform the High

Commissioner of the particulars of the case. When such leave is sanctioned by any other local Government or Administration a report should be made to the Government of India, who will inform the High Commissioner. It will be necessary for the officer concerned to place himself in communication with the High Commissioner, who will arrange any details and issue any letters of introduction that may be required. In all cases in which study leave in any other country is sanctioned the particulars should be reported to the Government of India.

ORDERED that the Resolution be published in the Supplement to the *Gazette of India*,

A. C. MCWATTERS,
Secretary to the Government of India.

CALCUTTA, *the 4th October 1923.*

UNIVERSITY OF CALCUTTA.

NOTICE.

THE Senate will proceed in the month of August 1924 to the election of a Tagore Professor of Law for a term of one year, to commence on the 1st August 1925.

The salary of the Professorship is Rs. 9,000 per annum and the Professor will be expected to deliver a course of not less than twelve lectures on one of the following subjects :—

(*i*) The History of Hindu Law in the Vedic Age and in Post-Vedic Times down to the Institutes of Manu.

(*ii*) A Critical, Historical and Comparative Survey of the System of Administration of Justice of Muslim Law.

(*iii*) The History of the law of Primogeniture with special reference to India, ancient and modern.

The salary of the Professor will be paid in twelve equal monthly instalments, the first instalment to be paid on the first day of the month following that in which the first lecture is delivered.

Candidates for the Professorship are required to forward their applications to the Registrar on or before the 1st May 1924, stating on which of the abovenamed three subjects they are prepared to lecture. Each candidate will forward with his application one hundred copies of a brief Synopsis of his proposed lectures; and, if he so pleases, the same number of copies of his Introductory Lecture.

The Professor will, not later than the month of August following his election, forward to the Registrar a complete copy (manuscript or type-written) of the lectures which he proposes to deliver. The copy will be forthwith referred to Committee of the Faculty of Law, consisting of not more than three Members to be chosen by the Faculty who will examine the same, and before the expiry of two months from the date of the submission of the copy by the Professor to the Registrar, report to the Faculty whether the work is complete and ready for the Press. If, upon such report, the Faculty are satisfied that the work is complete, the Professor will commence to deliver his lectures within three months from the date of the resolution of the Faculty and shall complete the delivery thereof in another three months. The copy of the lectures delivered will remain in the custody of the Registrar and shall be sent to Press, as soon as practicable after delivery thereof.

If the Professor falls to submit the copy of the lectures, or if the copy submitted be found, on examination, to be incomplete and not ready for the Press, the matter will be referred to the Faculty of Law, upon whose recommendation the Senate may either extend the time or cancel the appointment.

LAND SALE NOTICES.

Advertisement of sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Eastern Bengal Railway, in the district of Rajshahi, will be put up to sale at 1 o'clock on Saturday, the 24th November 1923, corresponding with the 8th Agrahayan 1330 B.S., at Nator Subdivisional office.

The purchasers of the several plots of land will be subject to the following conditions :—

1st.—The purchasers will have no power to make any excavations on the land nearer than fifteen feet from the railway boundary, or to plough the land nearer than three feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once

3rd.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The sale will become final on receipt by the Collector of the orders of the Commissioner confirming it, and a regular conveyance will then be granted to the purchaser.

Notice.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted Service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominees predecease them after five years of admission. The second quinquennial valuation of the fund has been completed by the Actuary to the Government of India and his report discloses very favourable results. For forms of application and rules of the Fund apply to the Accountant-General, Central Revenues, Imperial Secretariat Buildings, Calcutta.

Notice.

UNDER the orders of the Government of Bengal a competitive examination for the appointment of 3 natives of India to the Bengal Pilot Service will be held at the Port Office, 15-1, Strand Road, Calcutta, in or about the month of March 1924. For the purpose of this rule a native of India means any person born and domiciled within the dominions of His Majesty in India, or within the territories of Indian Princes tributary to, or in alliance with, His Majesty, or parents habitually resident in India, and not established there for temporary purposes only.

2. Each candidate must produce satisfactory evidence to show that—

(*i*) He is not less than 18 or more than 22 years of age on the date of examination.

(*ii*) He has passed the Matriculation Examination of an Indian University or the Cambridge Junior Certificate Examination, or some other public examination regarded as equivalent or, in the alternative, attended a recognized school and was at the date of leaving school a member of the class preparing for such examination.

(*iii*) He has served at sea for four years in a merchant vessel employed in foreign trade as a seaman or apprentice, and his conduct on board has been satisfactory.

(*iv*) He is of good health and physically fit to work as a Pilot and is of good moral character.

3 Candidates will be examined in Navigation and Seamanship up to the standard of a 2nd Mate in the Mercantile Marine and successful candidates will, before being appointed, have to undergo a further medical examination as to their physical fitness by the Medical Board sitting at Calcutta.

4. Successful candidates will be required to accept the condition that the Pilot Service may possibly be transferred later to the Port Commissioners or that the terms of service may be changed.

5. Applications will be received up to the 30th November 1923 by the undersigned from whom further particulars may be obtained.

GOVERNMENT OF BENGAL.

LOCAL SELF-GOVERNMENT DEPARTMENT.

Medical.

CALCUTTA, THE 28TH SEPTEMBER 1923.

RESOLUTION—No. 272T.-Medl.

READ—

This Government letter No. 98 T.-Medl., dated the 26th May 1922,
also letter from the Government of Bengal, to the Government of India, No. 1589 Medl., dated the 29th June 1923, and
a letter from the Government of India, Department of Education, Health and Lands, No. 539, dated the 14th August 1923.

THE School of Tropical Medicine, which has been established in Calcutta for the research work and instructions of candidates in tropical medicine, provides two courses of instruction annually, viz., one of six months' and the other of three months' duration. The longer is a post-graduate clinical and

laboratory course and is ordinarily intended for Government medical officers and private practitioners who are in possession of qualifications recognised by the General Medical Council of the United Kingdom. Government medical officers and private medical practitioners not possessing such qualifications but whose qualifications are registrable in India can only be admitted under special circumstances. The shorter course which is usually held from 15th July to the 15th October each year is intended for Civil and Military Assistant Surgeons and for selected Civil and Military Sub-Assistant Surgeons. Selected private medical practitioners may also be admitted if there are vacancies. The admission of candidates to the course of study, their training and examinations are regulated by rules prescribed by Government.

2. As an *ad interim* course, the authorities of the School of Tropical Medicine were empowered in 1922 to conduct examinations and issue diplomas, but it has now been decided with the approval of the Government of India to constitute a permanent faculty for the School of Tropical Medicine, Calcutta, who will conduct examinations, grant diplomas and certificates and advise Government on technical matters relating to the courses of instruction. This body will be styled "The Faculty of Tropical Medicine of Bengal."

The *ad interim* powers vested in the school authorities are accordingly withdrawn, and the Government of Bengal are pleased to sanction the constitution of the "Faculty of Tropical Medicine of Bengal" consisting of the following members as the Governing Body of the School of Tropical Medicine, viz.—

(1) The Surgeon-General with the Government of Bengal	*President.*
(2) The Public Health Commissioner with the Government of India (representative of the Government of India).	*Ex-officio members.*
(3) The Director of Public Health, Bengal	
(4) The Principal, Calcutta Medical College	
(5) The Principal, Carmichael Medical College, Belgachia.	
(6) The Director and Professors of the School of Tropical Medicine, Calcutta.	
(7) Three nominees of the Government of Bengal	*Members.*

The term of appointments of the Local Government's nominees is limited to three years.

By order of the Government of Bengal
(Ministry of Local Self-Government),

S. W. GOODE,
Secretary to the Government of Bengal (*offg.*).

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 3rd October 1923.

Summary.—The rainfall during the week was generally scanty and scattered. Transplantation of winter paddy seedlings is almost completed; rain is urgently needed for the growth. Harvesting of autumn paddy is still going on in some West Bengal districts. Cutting, steeping and washing of jute are nearing completion. Rearing of tobacco seedlings in nurseries is progressing. The average price of common rice for the Province has slightly fallen as compared with that of the previous week.

EDUCATION DEPARTMENT.

NOTIFICATIONS.

Minister in charge: The Hon'ble Mr. P. C. Mitter, C.I.E.

No. 3005Edn.—The 5th October 1923.—In exercise of the powers conferred by clause (*j*), sub-section (*2*) of section 101 of the Bengal Village Self-Government Act, 1919, (Bengal Act V of 1919), the Government of Bengal in the Ministry of Education are pleased to make the following rules regulating the powers and duties of union boards in regard to primary schools under section 32 of the Act :—

Rules under section 101 (*2*) (*j*) of the Bengal Village Self-Government Act, 1919, regulating the powers and duties of union boards in regard to primary schools under section 32 of the said Act.

Definition.—In these rules "union board school" means a primary school managed and maintained entirely by the union board.

1. Every union board undertaking the charge of primary education within the union shall—

(*a*) prepare and maintain a map of its area showing—
- (*i*) the uninhabited areas,
- (*ii*) the means of communication,
- (*iii*) the mauza boundaries, and
- (*iv*) the existing schools of whatever class,

(*b*) formulate a definite plan for affording facilities for primary education of the largest possible number of children in the union area,

(*c*) draw up estimates, capital and recurring, for the carrying out of this plan, and submit them with the plan to the district board for approval,

(*d*) repair the buildings of union board schools within the union area.

No union board shall have power, save with the previous sanction of the district board, to open, close or transfer any union board schools otherwise than in accordance with the plan approved by the district board.

2. Subject to any general or special order that may be made by the district board in this behalf every union board shall have the power within the union area of—

(*a*) maintaining and managing all union board schools,

COMMR.'S OFFICE, CHITTAGONG DIVN., CHITTAGONG, *the 8th October 1923.*

Draft model by-laws for District Boards, under sections 139 and 140 of the Bengal Local Self-Government Act of 1885 (Ben. Act III of 1885).

Definitions.

Definitions

1. In these by-laws, unless there is anything repugnant in the subject or context,—

I of 1871

(*1*) the word "cattle" has the same meaning as in the Cattle Trespass Act, 1871 ;

(*2*) "reser ved tank or well" means a tank or well which the District Board has set apart under section 90 of the Bengal Local Self-Government Act of 1885, by public notice, for the supply of water for drinking and for culinary purposes, and includes any reservoir, or part of any river, *khal* or other channel so set apart, and other tank or well which has been placed by a private owner under the control and administration of the District Board for the purpose of reservation of water for drinking and culinary purposes ; and the notice board on the edge of a reserved tank or well, containing the words "reserved tank" or "reserved well," or words to that effect, shall be deemed to be sufficient notice for the purpose of this definition ; and

(*3*) the "slopes" of a reserved tank or well include all places from which water can flow directly into such tank or well ; and

(*4*) "road" means a road vested in, or under the control and administration of, the District Board or a Local Board ; and includes—

(*a*) a village road ;

(*b*) the slope, berm, borrow-pits and side-drains of a road ; and

(*c*) all land vested in, or under the control and administration of, the District Board or a Local Board, and attached to a road.

Roads, drains, bridges, canals and embankments.

Encroachment or obstruction on a road

2. (*1*) No person shall encroach on any part of a road by cultivating crops thereon.

(*2*) No person shall, on any road,

by means of any building, fence, pit, embankment or ditch, or any other obstruction, or by means of any cut, drain or water-course intended for the purpose of drainage or irrigation, or by exposing thereon any goods for sale or by placing thereon any substance or material,—

(*a*) without the permission of the Chairman or Vice-Chairman of the District Board or a Local Board or the District Engineer, make or cause any encroachment, or

(*b*) obstruct traffic, or

(*c*) cause any inconvenience to passengers, or

(*d*) hinder or impede the flow of the water.

Sale, collecting or gathering of articles in vicinity of road.

3. No person shall expose or place any article for sale in any bazar or market in the vicinity of any road, or collect or gather any articles in the vicinity of a road, so as to interfere with the traffic of the road.

Cutting of plants, trees or hedges obstructing road or drain

4. Any person in possession of, or having control over, any plants, trees or hedges which obstruct, overhang or overshadow any road, or any public drain or sluice, or any drain which is connected with a public drain,

shall, if so required by notice in writing, signed by the Chairman or Vice-Chairman of the District Board, or a Local Board, or by the District Engineer, cut down, prune or trim such plants, trees or hedges. within the period, and in the manner, prescribed in such notice.

Damage to bridges, culverts or causeways on road.

5. (*1*) No person shall destroy or damage, or cause to be destroyed or damaged, any bridge, culvert or causeway built on or across any road.

(*2*) No person shall erect any fence or other object on, or before or close to the opening of, any such bridge, culvert or causeway, for the purpose of fishing or for any other purpose, so as to impede the free flow of water thereunder, or so as to cause damage thereto.

(*3*) No person shall cast nets for fishing purposes from any parapet of any such bridge or culvert.

6. No person shall—

Damage to fences, posts, soil, turf or grass on road.

(*a*) destroy or damage, or cause to be destroyed or damaged, any fence or post erected on any road ; or

(*b*) dig, scrape, uproot or remove any soil, turf or grass from any part of road.

Channel across road.

7. (*1*) No person shall cut a channel, or convey water by a channel, across a road except with the permission of the Chairman or Vice-Chairman of the District Board or a Local Board or the District Engineer, and in such manner as he may prescribe.

(*2*) Any person who has been permitted by the Chairman or Vice-Chairman of the District Board or a Local Board or by the District Engineer to cut a channel across a road shall, at the time prescribed by him, cover or refill the channel so as to restore the road to its former condition.

(*3*) Any person who has a prescriptive right to keep a channel open for carrying water across a road shall keep the channel in proper order, so as to prevent danger or inconvenience to the public.

Obstruction of waterway adjoining road.

8. No person shall obstruct any waterway adjoining a road, so as to injure or tend to injure the road or otherwise to render the road impassable.

9. (*1*) No person shall make any excavation on any road, or any hole, pit, tank or well within 3 feet of any village road or within 10 feet of any District Board road other than a village road, except in the case of a road which passes over the bank of any tank, without the permission of the Chairman or Vice-Chairman of the District Board or a Local Board or the District Engineer.

(*2*) Every person by whom, or by whose direction, any hole, pit, tank or well has been excavated within 3 feet of a village road or within 10 feet of any District Board road other than a village road shall be bound to take such order therewith as will prevent damage to, or erosion of, the road.

Protection of excavations on or near road.

10. The owner or occupier of any tank, well or other excavation on or near the side of any road shall be bound to fence in or duly protect such excavation in such manner as may be directed by notice signed by the Chairman or Vice-Chairman of the District Board or a Local Board.

Use of roads, bridges, culverts or canals while closed to traffic.

11. No person shall pass over, or drive any animal or vehicle over, any road, bridge, culvert or canal, so as to injure the same, while it is under construction or repair or is affected by flood or is ortherwise rendered unfit for traffic and is closed to traffic under the orders of the Chairman of the District Board or a Local Board, or (in emergent cases, pending application to such Chairman) of the District Engineer, if a passage is given to the traffic through another part of the road or otherwise.

Discharge of rainfall from roof to road.

12. No person shall without the permission of the Chairman or Vice-Chairman of the District Board or a Local Board, or the District Engineer, allow the rainfall from the roof of any building owned or occupied by him to be discharged upon any road by means of a spout or other thing intended for the conveyance of water.

Flow of filth on to road.

13. No person shall allow the water of any privy, or any matter offensive or deleterious to health to flow on any road.

Removal of trees or erections falling on to road.

14. Any person owning or possessing a tree or a house, wall or other erection which has fallen, or part of which has fallen, on to a road, shall, if so required by notice in writing signed by the Chairman or Vice-Chairman of the District Board, or a Local Board or by the District Engineer, remove such tree, house, wall, erection or part, within the period prescribed in such notice.

Curing hides on or near road.

15. No person shall cure hides on or near any road.

Slaughter of animals, cleaning of carcasses, etc., on or near road.

16. No person shall slaughter any animal, or clean any carcasses, or collect bones, on any road.

Placing or burning of bodies on road.

17. No person shall place or burn any corpse or the dead body of any animal on, or within 10 feet from, any road.

Steeping offensive matter in roadside, drain, pit or excavation.

L. BIRLEY,
Chief Secretary to the Government of Bengal.

No. L.-843.

Simla, the 1st October 1923.

RESOLUTION.

The question of the satisfactory ventilation of cotton mills in India is one that has engaged the attention of Government and of employers for many years. The climatic conditions in the leading centres of cotton manufacture make it essential to employ artificial humidification in some departments for the greater part of the year. It is indisputable that in many cases the extent to which artificial humidification is now employed affects the comfort, and not infrequently the health, of the operatives employed. But it has not hitherto been found possible to devise means of regulating and controlling artificial humidification which might not involve considerable injury to the industry.

2. The Government of India accordingly instituted a special enquiry in 1921. The investigation which was entrusted to Mr. T. Maloney, M.C., A.M., C.T., was designed

(1) to obtain accurate observations regarding the method of humidification and ventilation employed in cotton mills and their effect on working conditions ; and

(2) to evolve recommendations designed to effect a marked amelioration in conditions without serious detriment to the industry.

3. Mr. Maloney began his investigations in June 1921 and concluded them in December 1922. As a result of continuous and systematic enquiries he was able to collect an immense mass of data bearing on the temperature, humidity and chemical purity of the air in cotton mills and the effect of the atmospheric conditions on the health and sickness, the efficiency and fatigue of the operatives at every season of the year. These data were subjected to careful analysis as a result of which Mr. Maloney has been able to put forward definite recommendations for the control of ventilation and humidification in cotton factories. He has also made valuable suggestions on numerous other points of importance such as the construction of mills, the introduction of devices for the reduction of temperature in existing mills and the system of humidification to be employed.

4. Mr. Maloney has drawn up a detailed report which in addition to containing full information regarding existing conditions, offers the prospect of a satisfactory solution of the problem. He believes that the introduction of regulations based, as he suggests, on the measurement of the cooling power of the air, will add greatly to the comfort of the operatives, very materially increase their efficiency and probably improve their general

health. The Government of India direct that the report be published for general information. The report is accompanied by 82 statistical tables and 25 plates and the Government of India are convinced that those who are interested in the welfare of labour and in the cotton mill industry will find it of great interest and value. Mr. Maloney's recommendations will be taken into consideration by the Government of India in consultation with local Governments and those concerned in the industry.

5. It would have been impossible for Mr. Maloney to carry out his investigations without the active co-operation accorded to him by mill agents and managers throughout India. Their assistance and that of a number of operatives proved invaluable in the collection of statistical data from about 80 cotton mills, and in acknowledging the valuable services rendered by Mr. Maloney the Government of India desire also to express their thanks to all who have contributed towards the result.

ORDERED that a copy of the Resolution be forwarded to all local Governments and Administrations, to all Departments* of the Government of India, to Mr. T. Maloney, M.C., A.M.C.T., and that the Resolution be published in the Supplement to the *Gazette of India*.

RESOLUTION.

Simla, the 5th October 1923.

No. 4954.—In pursuance of paragraph 3 of the Resolution of the Government of India, Department of Commerce, No. 3748, dated the 10th July 1923, regarding the constitution of the Tariff Board, the Government of India have decided that along with the question of extending protection to the manufacture of steel in India the Tariff Board will examine the question of the import duty on sulphur.

2. Firms and persons interested in the use of sulphur who desire that their views should be considered by the Tariff Board should address their representations to the Secretary, Tariff Board, 1, Council House Street, Calcutta.

ORDER.—Ordered that a copy of the above Resolution be communicated to all Local Governments and Administrations, all Departments of the Government of India, the Director General of Commercial Intelligence, the Indian Trade Commissioner in London and to the Secretary of the Indian Tariff Board.

Ordered also that it be published in the *Gazette of India.*

LAND SALE NOTICES.

Advertisement of sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Eastern Bengal Railway, in the district of Rajshahi, will be put up to sale at 1 o'clock on Saturday, the 24th November 1923, corresponding with the 8th Agrahayan 1330 B.S., at Nator Subdivisional office.

The purchasers of the several plots of land will be subject to the following conditions :—

1st.—The purchasers will have no power to make any excavations on the land nearer than fifteen feet from the railway boundary, or to plough the land nearer than three feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once

3rd.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The sale will become final on receipt by the Collector of the orders of the Commissioner confirming it, and a regular conveyance will then be granted to the purchaser.

Notice.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted Service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits ; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominees predecease them after five years of admission. The second quinquennial valuation of the fund has been completed by the Actuary to the Government of India and his report discloses very favourable results. For forms of application and rules of the Fund apply to the Accountant-General, Central Revenues, Imperial Secretariat Buildings, Calcutta.

PART VI.

Bills introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly and Bills published under Rule 18 of the Indian Legislative Rules.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Legislative Assembly on the 27th July 1923 :—

No. 33 OF 1923.

A Bill to regulate the entry into and residence in British India of persons domiciled in other British Possessions.

WHEREAS it is expedient to make provision for the entry into and residence in British India of persons domiciled in portions of the British Empire, other than the United Kingdom, on a basis of reciprocity ; It is hereby enacted as follows :—

Short title, commencement and extent

1. (*1*) This Act may be called the Immigration into India Act, 192 .

(*2*) It shall come into force on such date as the Governor General in Council may notify in the *Gazette of India*.

(*3*) It shall extend to the whole of British India, including British Baluchistan.

Definitions.

2. In this Act, unless there is anything repugnant in the subject or context,—

(*a*) 'British Possession' means any part of His Majesty's Dominions exclusive of the United Kingdom, and includes Protectorates and Territories which are administered by a Dominion under the mandate of the League of Nations ;

(*b*) 'domicile' means the permanent abode of a person ;

(*c*) 'entry' includes landing at any port in British India during the period of the ship's stay on her way to a destination outside British India.

Rules as regards entry into and residence in British India.

3. The Governor General in Council shall make rules for the purpose of securing that persons domiciled in any British Possession, Protectorate or Mandated Territory, administered by a Dominion, shall have the same rights and privileges, as regards entry into and residence in British India, as are accorded by the law and administration of such Possessions, Protectorates or Mandated Territories to persons of Indian domicile.

Rules not to have effect until laid before both Chambers and approved.

4. (*1*) No rules made under section 3 of this Act shall have any effect unless they have been laid in draft before both Chambers of the Indian Legislature and the draft has been approved by a resolution of each Chamber, either without modification or addition or with modifications and additions to which both Chambers agree.

(*2*) The rules as approved by the two Chambers of the Legislature shall be notified in the *Gazette of India*, and shall thereupon have the effect of law.

Appointment of Committee of both Houses to advise Governor General in Council

5. The Governor General in Council shall appoint a Committee of both Houses of the Indian Legislature, of whom not less than two-thirds shall be elected by the two Chambers, in such proportion as the Governor General in Council may determine, to advise him, with regard to all matters relating to reciprocity of administrative arrangements with other British Possessions, Protectorates and Mandated Territories for the entry and residence into India of persons domiciled in the aforesaid Possessions, Protectorates and Mandated Territories.

Power to make rules.

6. The Governor General in Council may, without prejudice to the generality of the powers contained in section 3 of this Act, make rules—

(*a*) to provide for the establishment of a suitable agency to administer the rules and to define its functions and powers;

(*b*) to provide suitable penalties for the contravention of such rules or attempt to contravene them, or the abetment of such contravention; and

(*c*) to authorise the arrest of any person contravening or reasonably suspected of contravening any such rule, and to prescribe the duties of public servants and others in regard to such arrests.

Person claiming exemption to establish case

7. If any person alleged to be domiciled in the British Possessions other than British India and to be subject to the provisions of this Act raises the plea that he is not so domiciled, or that the provisions of the said Act do not apply to him, the onus of proving the truth of such plea shall lie on the aforesaid person.

STATEMENT OF OBJECTS AND REASONS.

The Imperial Conference have decided in favour of reciprocity of treatment of British subjects resident of various parts of His Majesty's dominions. The present Bill is intended to give effect to that decision. The Union Government of South Africa have recently assented to all the Ordinances imposing galling restrictions on Indians, and they have promised legislation next year with a view to segregate them. In the circumstances it is necessary that the Indian Legislature should arm the Government of India with the power to enforce the principle of reciprocity.

RESOLUTION ON THE REPORT OF THE POLICE ADMINISTRATION IN THE BENGAL PRESIDENCY FOR THE YEAR 1922.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Police.

CALCUTTA, THE 8TH OCTOBER 1923.

RESOLUTION—No. 2866Pl.

Read—

The report on the Police Administration in the Bengal Presidency for the year 1922.

Read also—

The report for the year 1921 and resolution of Government recorded thereon.

1. Mr. R. B. Hyde held the office of Inspector-General of Police throughout the year, except for the period of leave from the 7th July to the 6th November, when Mr. T. C. Simpson officiated in the post.

2. The Eastern Frontier Rifles were practically at full strength at the end of the year. Funds were not sufficient for the inclusion of a camp of exercise in the annual training. Very valuable service was rendered by parties deputed outside headquarters for the preservation of peace and order, especially on the occasion of the Mohurrum riots at Telinipara, and in the Midnapore district.

3. Some improvements were effected in the pay and status of officers in the Bengal Police Service and a further step was taken towards removing the unpopularity of urban duties in the lower ranks by the grant of compensatory allowances to constables employed in towns in Hooghly, Howrah and the 24-Parganas. Small concessions were also made to orderlies at headquarters in Calcutta and to investigating officers in river districts, where the rate for boat hire has long been inadequate.

4. Recruitment for the subordinate ranks, in which an improvement was noticed last year, continued to be satisfactory, and the actual strength of the subordinate force at the end of the year was only short by 409 of the total sanctioned strength of 24,102. There was, however, a further decrease from 47·1 per cent. to 36 per cent. in the number of local recruits enrolled as constables, due largely to the rejection of applicants as unfit. The post of assistant sub-inspector still affords an attractive field of employment for men of good educational qualifications. The Inspector-General complains of the inadequacy of the leave reserve in view of the drain caused by sickness, training and miscellaneous duties, and he mentions a district where the number of men absent from these causes was so high that the reserve available for ordinary leave was reduced to 2·4 per cent. The consequent restriction of leave earned necessarily makes for discontent, and affects the health of the force.

5. An increase in the number of departmental punishments during the year is attributed by the Inspector-General to the enforcement of a higher standard of discipline. On the other hand it is satisfactory to observe a decrease in the number both of criminal complaints and of civil suits brought against police officers; and the number of men judicially punished fell from 247 to 234 (including 153 cases under the Police Act). Unfavourable comments were made by Sessions Judges in three cases, in one of which however further enquiry resulted in exoneration of the officer concerned. The Governor in Council notices with satisfaction that there was no conviction for torture during the period under review, and believes that the improved conditions of service combined with a stricter attention to discipline by gazetted officers are establishing a higher standard of conduct throughout the subordinate ranks. The number of officers and men departmently rewarded was 6,403 as against 6,468 in the previous year. In his recent speech at Dacca His Excellency the Governor paid a tribute to the personal courage which the police have displayed on many occasions. The less conspicuous qualities of patience and courtesy to which His Excellency also referred are of equal importance for establishing good relations between the force and the public, and the attention of all officers is drawn to His Excellency's remarks on that subject.

6. Some improvement in the health of the force is indicated by a decrease of 755 in the number of cases admitted to hospital, and it seems probable, as the Inspector-General suggests, that with the improved conditions of pay the men are spending more money on sound and nourishing food. On the other hand it is to be regretted that the supply of articles indispensable for good health such as waterproofs, mosquito curtains and beds is still inadequate, and even in malarious districts men are to be found sleeping unprotected on the floor. Good housing is a matter of the first importance in keeping the force fit, and the position in this respect remains deplorably unsatisfactory. The provision of better quarters is recognised as one of the first demands on the funds available for the police when financial conditions improve.

7. Drastic retrenchment was effected in the River Police by abolishing the Ganges and Brahmaputra Divisions, with the consequent reduction of the floating craft in commission by seven steam launches, and accessory craft.

The river area comprised in these jurisdictions was in fact too large for adequate patrol by the force available, and its withdrawal means rather concentration of resources than cessation of a previously effective service. On the other hand funds were found for the construction of a slipway at the River Police dockyard at Narayanganj, which can now dock all police vessels during the dry season. This dockyard also did a certain amount of work for Government vessels in other departments. Besides the assistance given to the District Police in surveillance and investigation the River Police did much useful work in the control of river traffic, and in life saving and salvage of capsized boats. The number of prosecutions under the Inland Steam Vessels Act rose to 833 and 64 persons were saved from drowning.

8. Statistics for crime on the Railways are vitiated by the strike on the East Indian Railway which increased the work of the Police, and at the same time impaired the accuracy of the returns through failure to report cases. The most noticeable feature is the increase in the combined figures for missing goods and yard thefts on this Railway from 3,736 to 5,588. Special arrangements were made during the year for the superintendence of police patrols in the neighbourhood of Asansol which is notorious for thefts from goods trains. The Railway Police have special difficulties of their own, and the only remedy for such outbreaks lies in the closest co-operation between higher officers of the Railway and the Police.

9. At the beginning of the year the village police system was seriously interfered with by the non-co-operation movement, but the evil effects had worn off before its close and a normal state of affairs has been restored. There is room for much improvement in punctuality in the collection and payment of the wages of chaukidars. In union board areas the rural police are now largely under the control of the village authorities. There is inherent difficulty in a system under which the village chaukidar has statutory duties under two masters. The police officer who can enforce performance of those duties which relate to himself and at the same time respects the authority over chaukidars which the law gives to the panchayat or the union board, gets the best work from the rural police in his jurisdiction and assists the Government in its policy of decentralising the control over village watch and ward.

10. There was a decrease in the total volume of reported crime, which is accounted for in the statistics almost entirely under the head of burglary and is probably due in part to the suppression of cases through the non-co-operation movement. The figures for serious offences however mark an increase in lawlessness and criminality. The number of riots, dacoities, murders and robberies exceeded in each case those reported in 1921, which had shown a large increase over the figures for the preceding year.

11. Particularly significant is the increase from 613 to 946 in the number of cases of riot and unlawful assembly to which all ranges contributed. Land disputes accounted for only one-third of these cases. A large number were the results of obstruction of District officials in the execution of their duties, and of picketting and similar manifestations. In four districts small bodies of police faced with turbulent and overwhelming crowds had no alternative but to fire in self-defence. The Governor in Council regrets the loss of fourteen lives through this necessity, but such situations are the inevitable outcome of the direct challenge to authority which District officers and the police encountered during the year. Industrial unrest swelled the number of riots, several occurring in connection with the East Indian Railway strike. A disquieting feature is the re-appearance at Telinipara, in the Hooghly district, on a scale which has not been seen in Bengal for several years, of communal rioting arising out of a religious dispute.

12. Dacoity is a form of crime peculiarly responsive to any disturbance of law and order, and it is not surprising to find that the number of true cases under investigation during the year was 896 as against 716 in 1921, and an annual average of 576 for the quinquennium preceding the latter phases of the non-co-operation movement (1916-1920). The increase is largely traceable to the activities of certain notorious gangs whose operations were

facilitated by the general spirit of lawlessness prevalent. Several of these gangs were broken up before the end of the year. In two cases at least they were led by escaped convicts from the Rajshahi Jail. A disquieting feature was the commission of dacoities in Eastern Bengal by mixed gangs of ordinary criminals and young men of the middle class. In only twenty cases was resistance offered to dacoits, and in one case at least the gang owed their escape with the booty largely to a conspiracy of silence among sufferers and on-lookers. There was an increase in the number of convictions obtained in dacoity cases, but bad-livelihood prosecutions, which can only be conducted with the active co-operation of the villagers themselves, remained stationary. Volunteer defence parties have now been organised in many districts of the Presidency, and the instances cited by the Inspector-General in his report reflect great credit on the courage of their members and afford conclusive proof that the surest means of protection for a village lies in the determination of its inhabitants to help one another and in the knowledge among thieves that such determination exists.

13. A large number of prosecutions were instituted in connection with the non-co-operation movement, but no serious offence against life or property of a specifically revolutionary character occurred during the year. It was impossible to make any reduction in the strength of the Intelligence Branch or of the Criminal Investigation Department. The former department worked at full pressure in combating seditious activities. The latter rendered valuable assistance to the districts in dealing with important cases of dacoity, swindling and similar crimes and showed a good record of progress in the scientific methods of the finger-print and photographic bureau. The Governor in Council thinks that the public would have a better appreciation of the value of the Criminal Investigation Department if there was wider knowledge of their work in protecting the victims of false suits and bringing to justice the perpetrators of these cruel frauds. The victims are usually poor people who are attacked by the institution against them of false cases at places remote from their homes, and their inability to defend themselves makes them an easy prey to opponents who can afford to spend money in ruining them.

14. The total expenditure of the department amounted in round figures to Rs. 1,48,00,000, an increase of one lakh over that of the previous year. The increase is attributable chiefly to the accrual of increments in pay according to scales sanctioned in former years, while expenditure on building was actually reduced by five and-a-half lakhs, or nearly 33 per cent. compared with that for the previous year to Rs. 11,63,000. Of this amount over eight lakhs was spent on the completion of works started in the previous year and on repairs, expenditure on new construction being limited to two and-a-half-lakhs. The inadequacy of the police buildings has been frequently emphasised, and that curtailment of measures for improving the housing of the force can only be accepted as an unavoidable necessity arising out of the present financial position.

15. Since the close of the year Mr. R. B. Hyde has taken leave preparatory to retirement after holding the post of Inspector-General of Police for over four years. His Excellency in Council records his appreciation of Mr. Hyde's valuable services during a particularly difficult period. He also expresses his admiration of the courage and constancy of the force during a year which opened with a period of intense strain and happily ended under more favourable conditions.

ORDER.—Ordered that copies of the Resolution be forwarded to the Inspector-General of Police, the Commissioner of Police, Calcutta, and all Commissioners of Divisions for information.

Ordered, also, that the Resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

L. BIRLEY,
Chief Secretary to the Government of Bengal.

NOTIFICATION.

No. 1332T.R.—The 10th October 1923.—The following is published for general information.

M. C. MCALPIN,
Secretary to the Government of Bengal.

SIXTY-FIRST ANNUAL REPORT

OF THE

GOVERNMENT CINCHONA PLANTATIONS AND FACTORY IN BENGAL

FOR THE YEAR

1922-23.

1. **General.**—The drought referred to as prevailing at the end of the last financial year continued into April and May and was responsible for considerable damage to young plants on the drier ridges of Mungpoo. Towards the end of the year under review similar conditions prevailed involving the stoppage of the factory for a short time due to water from the catchment area being insufficient to work the turbines. Such conditions are becoming so frequent on Mungpoo that, sooner or later, an additional catchment area will require to be added to that at present utilised. Water is available at lower levels than the aqueduct which supplies the reservoir. This aqueduct, fortunately, leads to the reservoir on a higher gradient than is necessary. A subsidiary lead at a lower level on an easier gradient would provide quite an appreciable extra supply of water for the turbines, and already towards the end of the year a survey was being carried out and preparations made to put the work in hand. It is hoped that when the work is completed a supply of water sufficient to run the turbines throughout the year will be available.

On Munsong an opposite set of weather conditions prevailed. Rainfall was in excess of the average, though no heavier fall than 3·25 inches occurred at a time. Here damage is more frequently attributable to hailstorms which strip both leaf and bark from the young coppiced shoots, especially on the higher reaches of the northern part of the area.

Pests of cinchona, of which *Helopeltis* is the most formidable and difficult to counter, make sporadic raids into both the Munsong and Mungpoo areas. Damage from this cause is most noticeable at the lower elevations on Munsong and Burmiak divisions where the characteristic leaf roll and dead shoots are more prevalent than one cares to have them. Spraying has been attempted but with indifferent success; the only really successful method of dealing with the pest is by hand picking.

Reference has been made in former reports to the new system of harvesting bark by coppicing instead of complete uprooting after a definite period of growth. On Munsong the results of this system are now becoming evident, and the departure made promises results much more favourable than could ever have been expected under the old system of harvesting. When a tree is coppiced, it sends up some ten to twenty shoots, four to six of which are allowed to form leads which tend, after a certain period of growth, to dwarf the remaining subsidiary shoots, most of which wither and die back before bark forms. The resulting tree is of very different shape to its uncoppiced forerunner. Growth more bushy in nature results, and the plants have therefore to be grown in less dense formation, but yet dense enough to prevent the development of undergrowth with its attendant extra expenses in cultivation. This resulting form has its bearing on the period at which coppicing should take place. If areas are subjected to much uprooting

during their first span of life, the remaining trees are too wide apart to give the full benefit derivable from the coppicing system properly carried out. Unfortunately on Munsong coppicing has had, perforce, to be employed on areas already subjected to much thinning, and the results, though better than under the old system, are not to be compared with those on areas carrying a fair complement of trees. In the writer's opinion a system of intensive growing rather than extensive development of the plantation is indicated, and it is proposed to uproot at the earliest possible period areas, especially on the Kashyem division, which have far too low a complement of trees to trouble about thorough cultivation. Henceforth the policy followed will be to reduce extensions and to substitute the filling in at coppicing time of blocks not then carrying a complement of trees sufficient to keep cultivation at a minimum. On the method of coppicing itself experiments are required, for no data exist to show how it should be done, at what age it should be done or at what height from the ground the cut should take place. Semi-coppicing is not, in the writer's opinion, so satisfactory as full coppicing; in the former, the original lead tends to dwarf the oncoming shoots and gives a form of growth that is neither tree nor bush. Full coppicing is preferable as giving all shoots an equal chance of development. In coppicing, cinchona normally "breaks" just above the collar, and it has become evident that in the original experiments the cut was made too high. Where the surface was not carefully smoothed off or where a callus had not formed properly, the bark of the old stump has tended to die back. Analyses from samples of such bark taken at Munsong show that quinine is going lost, the average content being about 1 per cent. below the average of the block to which it belongs. Lower cutting is indicated with meticulous care to leave the cut surface in condition favourable to the formation of callus Bark will not die back below the point at which the shoots break, indicating that the nearer the cut to this point the less bark likely to be lost. But much more experimental data are necessary to decide these and other problems pending. It is sufficient to indicate here some of the problems in cinchona that are awaiting solution.

The therapeutic value of cinchona alkaloids other than quinine has been a subject of investigation by the medical profession during the year. Opinion now leans to giving these alkaloids a higher value than has of recent years been ascribed to them. Orders have therefore issued to extend the cultivation of *Cinchona succirubra*, the red bark tree, relatively poor in quinine but rich in other alkaloids. A large quantity of seed of this species has been sown with the intention of filling in blanks and carrying out extensions at lower elevations on both plantations.

A change in the official price of quinine was made in June 1922 when it was reduced from 3 shillings to 2 shillings and 3 pence per oz. The change coincided with a firmer tendency in the English market and with the expected consent of previously wavering Java cinchona planters to continue their adherence to the Cinchona Convention and to abandon the idea of erecting a new quinine factory of their own in Java. The principal motive for the reduction may have been encroachments upon the quinine markets of the world by the Japanese, but the undreamt of monetary demoralisation in most countries probably also had its effect. World stocks of quinine are at present larger than markets suffering from depreciated currencies can absorb. America alone has enjoyed a somewhat active market, the demand there being greatly helped by the admission of quinine bisulphate, as well as certain secondary cinchona alkaloids, as denaturants of alcohol. For the rest the world's consumption has remained a long way below the normal, and no improvement can be looked for at present in view of the increased international tension and the state of certain currencies.

2. **Extensions, acreages and crops.**—(*1*) *Mungpoo.*—The rainfall for the year was below the average, being only 108·02 inches. During the monsoon, however, rainfall was evenly distributed; there were no severe storms and no damage from slips or excessive wash. Extensions of *Cinchona Ledgeriana* were 20 acres on Mungpoo, 50 acres on Labdah and 30 acres on Sittong divisions. Besides this about a lakh of ledger and succirubra plants were

put in to repair the damage due to drought. The extensions on Mungpoo division have gone out amongst coppiced oaks to test the value of this form of light shade to Cinchona. Harvests were obtained by cutting out 45·8 acres of *C. Ledgeriana*, 2 acres of *C. succirubra* and 3·2 acres of *C. Hybrid* barks, the total of 51 acres giving 171,655 lbs. *C. Ledgeriana*, 14,838 lbs. *C. succirubra*, and 13,424 lbs. *C. Hybrid*, or 199,917 lbs. in all. This is the largest harvest for many years from Mungpoo. The average ages of the ledger, succirubra and hybrid barks were 7·02, 14·15 and 8·62 years, and the average annual bark increments per acre of the acreages 533·7, 524·3 and 486·3 lbs., respectively. The average age of all the acreages cut out is 7·4 years and the average annual bark increment per acre calculated on these acreages is 529·6 lbs. The yield per acre over the period is, therefore, 3,920 lbs. For purposes of valuation in the block account (appendix F), the average annual bark increment per acre is taken as 330 lbs. which, in the light of the above actual for bark increment, would seem to be a very safe figure. At the end of the year there were 900 acres with a full complement of cinchona on Mungpoo plantation. Details are available in appendix A(I). Some of the blocks, especially those near Rungbee, and the young blocks on Labdah look very well and are certain to give good yields. Others, and especially the Silake block, will require much attention if the annual increment figure is to go on increasing.

Some 50 acres of mixed fuel and timber trees have been planted up during the year, while vacancies in last year's afforestation area were made good. The small number of casualties amongst forest species in comparison with cinchona casualties is an index of the relative ease with which timber and fuel trees can be grown.

Mr. Osborne, the manager, is continuing his experiments with green manures and shade planting. Results as regards the former will not become evident for some time yet, but so far as appearances go, the experiments are well worth continuing.

(*b*) *Munsong.*—Rainfall was 103·58, being 7·17 inches in excess of the average for the past 22 years. No excessive single fall occurred and consequently there was no washing out. At the beginning of the year another heavy hailstorm stripped leaf and bark from the plants on the higher levels of Kashyem division. Damage from this source on this division is of all too frequent occurrence. A considerable area of the *C. officinalis* at elevations above 4,500 feet will never give a harvest worth the labour expended on it. The only course open is to reap from the worst portions what bark they give and let them to back into secondary jungle or plant up with fuel and timber trees if enough money is made available for the purpose. There were no extensions on Munsong during the year, such additional plants as were put in being casualty replacements.

The harvests were obtained by cutting out 99·8 acres of *C. Ledgeriana*, 2·1 acres *C. succirubra*, 28·6 acres *C. officinalis*, 20·2 acres *C. Hybrid* II, and ·2 acre *C. Hybrid* III, the total of 150·9 acres giving 281,920 lbs. *C. Ledgeriana*, 6,080 lbs. *C. succirubra*, 14,880 lbs. *C. officinalis*, 54,080 lbs. *C. Hybrid* II, and 160 lbs. *C. Hybrid* III, or 357,120 lbs. in all. The average ages of the barks in the above order were 7, 8·2, 7·6, 6·7 and 3 years, and the average annual bark increments per acre of the acreages 401, 351·4, 68·1, 397·6 and 266·6 lbs., respectively. The average age of the total acreage cut out is 7·1 years, and the average annual bark increment calculated on these acreages is 332 lbs. This figure compares unfavourably with the Mungpoo increment of 529·6 lbs., but it has to be remembered that much of the Munsong harvest is from coppiced trees and that a just comparison will only be possible when the blocks are uprooted. At the end of the year there were 2,126 acres with a full complement of cinchona on Munsong plantation. Details are available in appendix A(I). The younger blocks are promising and the older blocks in which coppicing took place before the areas got depleted will give good harvests

(*c*) *Plantation as a whole.*—The total area under cinchona is 3,026 acres. Details of the species, the acreages going to be made up this total

and their ages are available in appendix A(2). In all cases the acreages are calculated as carrying their full complement of cinchona trees.

3. **Factory work.**—Besides 404,387 lbs. of Java bark for the Government of India, 191,134 lbs. of Mungpoo bark (151,641 ledger, 26,154 succirubra and 13,339 hybrid) and 374.001 lbs. Munsong bark (278,405 ledger, 27,293 succirubra, 11,715 officinalis and 56,588 hybrid) were worked up to produce about 21,550½ lbs. quinine sulphate, 484½ lbs. other quinine salts, 7¼ lbs. cinchonidine salts, 6 lbs. cinchonine salts, 11 lbs. quinidine salts, 78½ lbs. quinoidine, and 8,294 lbs. cinchona febrifuge—a total of 30,431¾ lbs. provincial alkaloids. Exact amounts are available in appendix C(1). The Java bark produced 22,086 lbs. quinine sulphate and 4,892½ lbs. cinchona febrifuge. The total production of quinine sulphate, both provincial and imperial, was 43,636 lbs., and the total products from all sources 57,410¼ lbs. The amount of quinine sulphate proved by analysis to be present in the bark was 47,363·5 lbs. Apart from quinine allowed to go into the febrifuge and salts of quinine other than the sulphate, the yield works out to 92 per cent. of the theoretical possible.

4. **Cost and value of plantation bark.**—The average cost per lb. of all Mungpoo barks taken over a series of years is 3·6 annas and of Munsong barks 2·7 annas. The cost of the 199,917 lbs. Mungpoo bark harvest is, therefore, Rs. 44,981 and of the Munsong 357,120 lbs. harvest Rs. 60,264. The unit rate for bark being 1·5 annas the average Mungpoo bark quinine percentage of 5·19 gives the harvest from this plantation a value of Rs. 97,272 or Rs. 37,008 more than it cost. On a basis of an average quinine percentage of 4·03 and the same unit rate the Munsong harvest valuation is Rs. 1,34,915 or Rs. 74,651 more than it cost. The year's expenditure for both plantations including their share of general charges is Rs. 1,93,715, while harvests costing Rs. 1,05,245 and valued at Rs. 2,32,187 are the year's return for past expenditure.

5. **Cost and value of quinine produced.**—(*a*) *Cost in the bark.*—The 21,550 lbs. of quinine extracted were contained in 562,872 lbs. of mixed Mungpoo and Munsong barks, which cost (191,134 lbs. at 3·6 annas and 374,001 lbs. at 2·7 annas per lb.) Rs. 1,06,117. The cost per lb. of quinine in the bark was, therefore, Rs. 4·92.

(*b*) *Cost of extraction, packing and delivery to railway.*—This is calculated on the total extraction of quinine, both provincial and imperial. The total direct expenditure on the factory was Rs. 1,17,021-4-6, general charges debitable to factory account Rs 3,212-6, factory depreciation charges Rs. 5,183, stores (oil, chemicals, etc.) depreciation charges Rs. 18,999-10-11, the gross factory expenditure being, therefore, Rs. 1,44,416-5-5. From this has to be deducted expenditure on products, both imperial and provincial, other than quinine sulphate, Rs. 31,630-14, leaving Rs. 1,12,785-7-5 net expended on the production of 43,636 lbs. provincial and imperial quinine sulphate. The cost of extraction, packing, etc., is, therefore, Rs. 2·584 per lb. This is somewhat higher than last year's cost, but is still low enough to bespeak efficient factory management.

(*c*) *Total cost per lb. and value.*—This is made up of the cost in the bark—Rs. 4·92 and the cost of extraction, etc., Rs. 2·584, a total of Rs. 7·504. The present wholesale rate being Rs. 27 per lb., the 21,550·3 lbs. provincial quinine manufactured are worth Rs. 5,81,850 but cost only Rs. 1,61,713.

6. **Sales and selling rates.**—A comparative statement of the sales of factory products for 1921-22 and 1922-23 is available in appendix G. From this it will be seen that a large decrease has taken place in the amount of quinine salts sold. The reason is that the area of supply has been restricted by the Punjab indenting for supplies on the Director, Botanical Survey, who meets the requirements of this province from imperial stocks. Cinchona febrifuge sold was 14,016¾ lbs., but this included 5,722¾ lbs. belonging to the Government of India, leaving a net provincial sale of 8,294 lbs.

The proceeds of the total sales have, however, been credited to the Government of Bengal. The excess credit will be adjusted in transfer account. Selling rates were as follows :—Quinine sulphate Rs. 36 to Rs. 38 till the end of October 1922, thereafter Rs. 27 to Rs. 29 per lb., cinchona febrifuge Rs. 8 to Rs. 10 according to quantity purchased at a time and to form in which purchased. These rates are based on market quotations as are also the rates for other products sold. Rupees 4,02,405-15-3 were obtained from the sale of 10,471 lbs. quinine sulphate converted to tablets in the Juvenile Jail, but of this sum half only is taken as credited to the Cinchona Department. Details of the monthly receipts from this source are available in appendix I supplied by the Accountant-General, Bengal.

7. **Expenditure and receipts.**—The total expenditure on the department detailed in appendix D was Rs. 3,13,949-4-4. The total receipts including Rs. 105 received direct were Rs. 8,10,745-3-3, of which Rs. 1,65,037 were credit and Rs. 6,45,708-3-3 cash. These receipts include proceeds from the sale of 5,722¾ lbs. cinchona febrifuge in the form of powder belonging to the Government of India and amounting to Rs. 46,298-13. The net receipts properly creditable to the department are, therefore, Rs. 7,64,446-6-3. Besides this, there are sums of Rs. 57,070-3 and Rs. 9,785 still due from the Government of India to cover the cost of extracting, packing, etc., 22,086 lbs. sulphate at Rs. 2·584 per lb. and 4892·5 lbs. febrifuge at Rs. 2 per lb.

8. **Quinine reserve and stock account.**—Full details of stocks in hand are available from appendices C(1) and C(2). The provincial reserve of quinine, a few thousand pounds higher now than it was at the beginning of the year, stands at 31,685 lbs. Bark stocks are about the same. For purposes of stock account I have thought it advisable to reduce the valuation figures. Quinine is valued at Rs. 20 against Rs. 30 of last year. Bark on balance is valued at annas 5 per lb. against annas 6 of last year, and all other products are also carried at lower rates. The worst feature of the stock account is the diminished quantity of oil, chemicals and stores. The total value of stocks at the end of the year was Rs. 7,19,373-12-6, of which quinine valued at Rs. 6,33,711-4 was the chief item.

9. **Block account.**—Excluding the value of extensions which for the purposes of the block account are taken at cost price, the increase in value of cinchona trees at the end of the year is Rs. 1,39,895. This increase has been calculated on the basis of a moderate bark increment. Cinchona trees are valued at Rs. 19,21,096, timber and fuel trees at Rs. 2,80,363. *See* appendix F for further information.

10. **Profit and loss valuation.**—The valuation profit balance of Rs. 1,57,380-5-4 is much below the average of late years, due to the drop in the price of quinine and to reduced sales on account of the transfer of Punjab indents.

11. **Land rent.**—From Mungpoo the sum of Rs. 5,035-13-6 was collected during the year and paid into the Darjeeling treasury. From Munsong Rs. 1,142-11-6, representing fees collected from cattle grazing within the cinchona boundary, were paid into the Kalimpong sub-treasury for credit to the Forest Department. No credit is taken for these sums in the accounts of the Cinchona Department.

12. **Staff.**—Lieutenant-Colonel A. T. Gage, C.I.E., I.M.S., held charge as Superintendent till the 2nd January 1923, when he went on long leave. Thereafter the writer held charge. The only other change in the personnel of the department during the year took place when Mr. H. F. Green went on six months' leave preparatory to retirement on the 24th February 1923, being relieved by Mr. H. Thomas retransferred from the new cinchona plantations in Burma. Mr. Green spent his whole service on the cinchona plantations, a service uninterrupted by a single day's leave. Munsong plantation may be said to have grown up under him. His service was

marked by loyalty, efficiency and painstaking thoroughness, and no poor labourer who worked under him but felt the poorer when the age-limit rule put an end to the happy relations which existed between him and his "sahib." All officers of the plantations and factory and the clerical establishment have performed their duties with their wonted efficiency.

13. **Medicinal plants other than cinchona.**—About 60,000 *Ipecacuanha* plants were raised from seed during the year. Two-thirds of these were planted out in nurseries, the remaining third being grown on indoors till fresh nursery beds could be prepared. Four hundred pounds of dried root were obtained by clearing plants in the older lines and sent to the factory for extraction. The cost of growing this crop, which includes the cost of much experimental work, is about Rs. 4,750. Even if the finished product brings in too small a return to call the cultivation of *Ipecacuanha* on Mungpoo a profitable concern, the plants and seed now available there will form a useful source of supply for *Ipecacuanha* cultivation in the new plantations in Burma, where seedlings give every promise of ultimate success. The cultivation of *Digitalis* is being continued, and a supply ample for both official and unofficial demand is assured.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Sugarcane Crop of Bengal, 1923-24.

(NOTE.—On an average of five years ending 1921-22, the area under sugarcane in Bengal has represented some 8·2 per cent. of the total area under sugarcane in British India.)

Character of the season.—As indicated in the first forecast the weather was generally favourable at planting time. Later on till the end of May, the crop was adversely affected by inadequate rainfall especially in some West Bengal districts. Subsequently with the break of the monsoon in June the conditions have generally improved and the present condition is reported to be satisfactory on the whole.

Area planted.—The total area planted with sugarcane for the province is reported to be 209,900 acres this year as against 200,500 and 200,600 acres reported, respectively, in the corresponding and final forecasts of last year.

Outturn.—According to the estimates of District Officers, the average outturn for the Province works out at 85 per cent. of the normal this year as against 76 and 79 per cent., respectively, in the corresponding and final forecasts of last year.

Condition figure.—The condition figure for the cane crop is estimated at 85 per cent. as against a ten years' average of 84·9 per cent. This means that the condition of this year's crop is equal to 100 per cent. of the ten years' average.

24-Parganas ...	4,600*	2,400	1,400	58	58	February and March. Normal.	The weather has not been favourable. Some damage is expected owing to drought.
Nadia	7,900	6,000	5,700	75	67	Middle of February. Normal.	The weather conditions were at first favourable, but want of rain was felt from the latter part of May and retarded the growth of the plants. The condition has now improved to some extent. The outturn is expected to fall much below the normal.
Murshidabad	5,500*	3,200	3,200	67	60	November to May. Normal.	Continued drought after planting stunted the growth of the crop.
Jessore	5,200*	2,500	3,200	67	75	February and March. Normal.	The effects of weather on the cultivation and growth of the crop are fairly satisfactory.
Khulna	1,500	700	600	75	58	February. Normal ..	The weather has not been favourable.
Burdwan	11,600*	14,300	17,000	100	83	Middle of March to early in June. Normal.	The weather was favourable at planting time, but subsequent hot weather affected the young plants adversely. Since the middle of June the weather has been very favourable and the damage is being made good to some extent.
Birbhum	9,800	9,000	9,000	83	83	Latter part of April. Normal.	The weather has been fairly favourable.
Bankura	9,700	11,000	9,000	67	83	April and May. Normal	The weather was favourable at planting time, but subsequently the growth of the crop was retarded by drought. Since the break of the monsoon, however, the condition has again become favourable.
Midnapore	6,600	4,300	6,700	75	83	April. Normal ...	The decrease in area compared with the first forecast is due to heavy rains in August and September. The weather was good at planting time but has now been fair.
Hooghly	8,200	3 900	2,300	67	67	March. Normal ...	The weather was unfavourable at planting time, but sufficient rainfall afterwards has produced better effect on the crop and the weather is favourable at present.
Howrah	5,200	4,600	3,900	38	58	January to March. Normal.	The weather was not favourable at planting time but is favourable at present.
Rajshahi	7,500	6,800	5,500	83	83	January. Normal ...	The increase in area as compared with the first forecast is due to revision in Nawhatta thana, and the decrease as compared with last year is due to want of rain at planting time. The effects of weather on the cultivation and growth of the crop have not altogether been favourable.
Dinajpur	29,500*	27,500	29,200	74	80	Ditto ...	The weather was favourable at planting time, but the drought in July and August retarded the growth of the plants to some extent.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Cotton Crops of Bengal, 1923-24.

NOTE.—On an average of the five years ending 1921-22 the area under the cotton crops in Bengal has represented some 0·2 per cent. of the total area under cotton in India

THERE are two crops, early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the Tripura State and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore.

Character of the season.—As indicated in the first forecast the weather at the outset was not uniformly favourable. In Bankura and the Chittagong Hill Tracts, the conditions were generally favourable while elsewhere, they were unfavourable for the crops. Since then, the prospects have been improved by the good showers, and the present condition is reported to be fairly favourable on the whole.

Area sown.—The area sown with the early crop is reported to be 69,003 acres this year against 70,186 acres reported in the corresponding forecast of last year.

Of the late crop, an area of 1,837 acres is reported to have been sown this year against 13 acres reported in the corresponding forecast of last year.

Orders and Notifications by the Government of India.

The following notifications, issued by the Government of India in the Finance Department, published in the *Gazette of India*, dated the 6th October 1923, are republished for general information.

L. BIRLEY,
Chief Secretary to the Government of Bengal.

NOTIFICATIONS.

PENSIONS AND GRATUITIES.
FUNDS, SERVICE AND OTHER.

Simla, the 4th October 1923.

No. 2410-F.E.—With reference to the Government of India, Finance Department, notification No. 1823-F.E., dated the 31st August 1921, published in the *Gazette of India*, dated the 3rd September 1921, the following amendment to Article 3 of the Indian Civil Service Family Pension Regulations is published for general information :—

THE FOLLOWING SHOULD BE SUBSTITUTED FOR THE SECOND PARAGRAPH OF ARTICLE 3 OF THE INDIAN CIVIL SERVICE FAMILY PENSION REGULATIONS.

Pensioners resident *outside India* either receive payment direct from the High Commissioner for India, 42, Grosvenor Gardens, S.W.-1, or at their option, if resident in any of the British Colonies or Dominions, through such other channel as may from time to time be authorised by the Secretary of State for India in Council for the payment of pensions therein. A pensioner drawing pension locally will receive payment at the current rate of exchange, and will in no case be entitled to the benefit of the privileged rates referred to in the following paragraph.

Pensioners residing *in India* receive payment at their option from the High Commissioner for India or in India as follows :—A pensioner who was receiving pension in India prior to 1st February 1921 at 1*s.* 4*d.* the rupee may continue to receive it at that rate or at the current rate of exchange, whichever is more advantageous to the recipient ; a pensioner who had been admitted to pension prior to the above date or who is a dependant of a subscriber in the Service on the above date and who commences to receive payment in India after that date may receive payment at the current rate of exchange,

Notice.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted Service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominees predecease them after five years of admission. The second quinquennial valuation of the fund has been completed by the Actuary to the Government of India and his report discloses very favourable results. For forms of application and rules of the Fund apply to the Accountant-General, Central Revenues, Imperial Secretariat Buildings, Calcutta.

Monthly Weather and Crop Report of Bengal for September 1923	1497—1498	Weather and Crop Report for the week ending on the 17th October 1923	1501—1504
Statement of weekly gauge-readings on the rivers in Bengal	1499—1500		

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR SEPTEMBER 1923.

I. **Character of the season.**—Excepting Jalpaiguri, Darjeeling, Mymensingh, Chittagong and the Chittagong Hill Tracts the rainfall was generally much below the normal throughout the Presidency. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Transplantation of winter paddy was completed except in North Bengal where, in some parts, it was still in progress. Weeding was proceeding briskly. Owing to the lowness of the rivers cutting and steeping of jute were seriously interfered with. The harvesting of autumn paddy was almost finished.

III. **State of standing crops.**—The condition of winter rice crop was fairly favourable in East Bengal and fair for the rest of the province. Sugarcane crop is thriving well.

IV. **Prospects and probable outturn.**—The prospects of winter paddy, especially in North Bengal and parts of Mymensingh and West Bengal, were unfavourably affected by insufficient rainfall. The provincial outturn of autumn paddy has been estimated at about 77 per cent. of the normal.

V. **Damage to standing crops.**—Damage to jute by insect-pests was reported from several districts.

VI. **Condition of agricultural stock.**—The condition of livestock was generally fair. Stray cases of cattle-disease were, however, reported from parts of Nadia, Murshidabad, Khulna, Burdwan, Hooghly, Rajshahi, Dinajpur, Darjeeling, Rangpur, Mymensingh, Bakarganj, Noakhali, Chittagong, Cooch Behar and Tripura States.

VII. **Failure of pasturage and fodder.**—No scarcity of fodder and water was reported from any part of the province.

VIII. **Prices of food-grains.**—During the second-half of the month under review the price of the common rice of the cheapest quality rose in seven districts, fell in nine and remained stationary in the rest. It ranged from 6 seers 4 chitaks per rupee at Rangpur to 9 seers at Midnapore.

IX. **Condition of agricultural people.**—The condition of agricultural population was reported to be fair.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 17th October 1923.

Summary.—Light and scattered showers fell in East and parts of West Bengal, elsewhere there was no rain. Rain would now be beneficial to help the flowering of transplanted winter paddy. Preparatory tillage for spring crops are proceeding briskly; sowings of the early crops have commenced in places. The average price of common rice for the province has fallen by about 0·6 per cent. as compared with that of the previous week.

PUBLIC HEALTH.

Minister in charge : The Hon'ble Sir S. N. Banarji, Kt.

No. 2593P.H.—The 27th October 1923.—Whereas the Government of Bengal (Ministry of Local Self-Government) are satisfied that the area known as the Asansol Mining Settlement, in the Asansol subdivision of the district of Burdwan, is threatened with an outbreak of small-pox :

Burdwan.

Now, therefore, in exercise of the power conferred by section 2, sub-section (*1*) of the Epidemic Diseases Act, 1897 (III of 1897), read with the notification of the Government of India in the Education Department, No. 193C., dated the 15th February 1918, the Government of Bengal (Ministry of Local Self-Government) are pleased to prescribe the following temporary regulations for the prevention and control of small-pox, and for the

medical inspection, isolation, observation and surveillance of persons suffering from, or suspected of being infected with, small-pox in the said area for one year from the 1st November 1923 :—

TEMPORARY REGULATIONS FOR THE PREVENTION AND CONTROL OF SMALL-POX IN THE ASANSOL MINING SETTLEMENT.

1. In these regulations, unless there is anything repugnant in the subject or context,—

(*a*) the expression "Chief Sanitary Officer" shall mean the Chief Sanitary Officer appointed by the Local Government for mining settlements under section 5 of the Bengal Mining Settlements Act, 1912 (Bengal Act II of 1912);

(*b*) the expressions "Agent," "employed," "Mine" and "owner" shall have the same meaning as in section 3 of the Indian Mines Act, 1901 (VIII of 1901);

(*c*) the expression "Board" shall mean the Mines Board of Health of Asansol;

(*d*) the expression "District Magistrate' shall have the same meaning as in section 101 of the Code of Criminal Procedure (Act V of 1898);

(*e*) the expression "Small-pox" shall mean any disease accompanied by an eruption of vesicles or postules.

NOTICES.

2. Whenever any land is held jointly by two or more persons, whether as owners or occupiers of that land, such persons shall be held jointly and severally liable for carrying out any measure ordered in a notice under these regulations, and the names of any one or more of such joint-holders may be entered upon such notice at the discretion of the Chief Sanitary Officer, and the Chief Sanitary Officer shall not be bound to enter the names of all the joint-holders in the notice.

3. If in any case the Chief Sanitary Officer considers that the issue of a notice is likely to lead to such an amount of delay as might facilitate the spread of small-pox, he may forthwith take such steps as he may think fit for carrying out the work, and shall thereafter as soon as possible issue a notice on the person concerned stating the reason why such work has been carried out.

4. If any measure which the Chief Sanitary Officer has, by a notice issued under any of these regulations, required to be carried out, be not carried out to his satisfaction within the time stated in the notice, the Chief Sanitary Officer shall be entitled to carry out the measure.

COST AND COMPENSATION.

5. (1) Expenses incurred in carrying out any work required to be done in pursuance of an order issued under these regulations shall be paid by the Board except in cases where the order requires action to be taken by any person as regards property in his possession, in which cases the expenses shall be paid by that person :

Provided that where the conditions, which led the Chief Sanitary Officer to pass such an order, are not attributable to the act or default of the person in possession of the property, the Board may pay to such person the whole or part of the expenses incurred by him in carrying out the order.

(2) The Board may recover all expenses incurred by the Chief Sanitary Officer in carrying out the measures under regulation 4 from the person or persons to whom the notice was originally issued.

6. The Board shall pay adequate compensation to any person who has sustained substantial loss or damage by reason of anything done under these regulations :

Provided that no person shall receive any compensation for anything done or suffered under these regulations, if he has failed to carry out an order issued under these regulations within the time specified in the order or to the satisfaction of the Chief Sanitary Officer.

THE LOCATION OF DISEASES.

7. Every owner, agent or manager of a mine shall apply to the Chief Sanitary Officer such periodical returns of births and deaths and of the persons residing upon their property as he may call upon them to furnish.

8. The nearest relative in attendance upon the patient, or in the absence of any such relative the occupier of the house, or if the occupier be the patient some male inmate of the house, in which a case of small-pax shall have occurred, shall, within 24 hours of the onset of the disease, give information regarding the occurrence of such case either personally or in writing or by means of the chaukidar or other village watchman to the Chief Sanitary Officer or other officer of the Mines Board of Health.

9. Every owner, agent or manager of a mine shall supply to the Chief Sanitary Officer such periodical returns of cases of sickness as he may from time to time call upon them to furnish.

10. Every owner, agent or manager of a mine shall furnish to the Chief Sanitary Officer immediate information regarding the occurrence of any case or suspected case of small-pox occurring in a building in the possession of or under the control of such owner, agent or manager.

11. The Board may employ a suitable staff for the purpose of making enquiries as to the existence of any case of small-pox.

12. The Chief Sanitary Officer may examine any person who is, or is suspected to be, suffering from small-pox or who, in his opinion, may be infected with or likely to spread small-pox.

ISOLATION AND SEGREGATION AND EVACUATION OF HOUSES.

13. When the Chief Sanitary Officer considers that the isolation of any person suffering from small-pox is a precaution necessary for the protection of the neighbouring population, he may order such person to be isolated in such a manner and for such a time as may be approved by the Chief Sanitary Officer.

14. When the Chief Sanitary Officer considers that the isolation of any person suffering from small-pox and residing in a building in the possession of or under the control of the owner, agent or manager of a colliery, is necessary, he may order the owner, agent or manager of such colliery to isolate such person, in such a manner and for such a time as may be approved of by the Chief Sanitary Officer.

15. The Chief Sanitary Officer may order that any person who has been in contact with a person found to be suffering from small-pox shall be segregated for a period not exceeding ten days in a manner and in a place to be approved by the Chief Sanitary Officer.

16. The Chief Sanitary Officer may order that any person who is residing in any building in the possession of or under the control of the owner, agent or manager of a colliery, and who has been in contact with any person found to be suffering from small-pox, shall be segregated by the owner, agent or manager of such colliery for a period not exceeding 10 days.

17. The Chief Sanitary Officer may order that any person who has been in contact with a person found to be suffering from small-pox shall be vaccinated or re-vaccinated within a time to be specified in the order.

18. The Chief Sanitary Officer may order the owner, agent or manager of any colliery to take steps to have vaccinated or re-vaccinated within a specified time any person residing in any building in the possession of or under the control of the owner, agent or manager of such colliery, who has been in contact with any person found to be suffering from small-pox.

19. No person shall enter any place wherein persons are isolated or segregated under regulation 13 or 14, without the permission of the Chief Sanitary Officer.

20. The Board shall provide, free of charge, suitable places with necessary attendants, diet, food, etc., for persons isolated or segregated by order of the Chief Sanitary Officer, and the Chief Sanitary Officer may certify places provided by private individuals as being fit for the purpose of isolation or segregation of persons under regulation 13 or 14 as the case may be.

21. (1) When the Chief Sanitary Officer under regulation 13 or 14 has ordered the isolation or segregation of any person residing upon any colliery lands, the Chief Sanitary Officer may notify the fact in writing to the owner, agent or manager of such colliery.

(2) If such person disobeys the order, such owner, agent or manager shall furnish to the Chief Sanitary Officer immediate intimation of the movements of that person.

22. No person who is or has been suffering from small-pox shall leave the place where he has been staying until he has received from the Chief Sanitary Officer written permission to do so.

23. The Chief Sanitary Officer may, by a notice in writing, (1) require any person to carry out or allow to be carried out by such agency as the Chief Sanitary Officer may appoint, within a time to be stated in the order, such measures for the disinfection or evacuation of his dwelling-house or for the disinfection or destruction of any of his personal effects as the Chief Sanitary Officer may consider necessary; and (2) direct any owner, agent or manager of a mine, or any landholder or his agent to carry out any such measures on behalf of any person resident or staying upon the land belonging to the owner or landholder.

24. Every owner, agent or manager shall make such arrangements for the immediate disinfection of infected premises and personal effects and of evacuations and excreta of persons employed by the colliery and resident in a building owned by the colliery who are suffering or suspected to be suffering from small-pox as the Chief Sanitary Officer may from time to time direct by general or special order.

25. The Board shall from time to time provide, without any charge to the person on whom an order is passed under regulation 20 (1), temporary shelter or house accommodation with necessary attendants for the members of any family who have been compelled to evacuate their dwellings under the said regulation.

26. The Chief Sanitary Officer may order any owner, agent or manager of a mine to provide such hospitals, temporary shelters or house accommodation within such a time as the Chief Sanitary Officer may approve for the purpose of isolating, segregating or

accommodating, under regulations 13, 13A, 14, 14A and 22, persons residing in any building in the possession of or under the control of such owner, agent or manager of a colliery.

MISCELLANEOUS POWERS.

27. The Chief Sanitary Officer may (1) prohibit the committal or continuance of any nuisance, or (2) require the person causing any nuisance or the person occupying the premises on which any nuisance exists to remove such nuisance.

Explanation.—"Nuisance" means anything which, in the opinion of the Chief Sanitary Officer, is dangerous to health or offensive to the neighbourhood and is likely to spread or to cause the outbreak of small-pox.

28. The Chief Sanitary Officer may, during the prevalence of any outbreak of small-pox, order that any market, shop or other public place shall remain closed for such time as may appear to him to be necessary and may forbid the holding of any fair, *mela* or other gathering to which people from several villages commonly or periodically resort.

29. The Chief Sanitary Officer may issue general orders that by a specified date certain sanitary precautions of a simple nature, such as limewashing of houses, cleaning of latrines or the removal of filth or rubbish shall be carried out to his satisfaction.

30. The Chief Sanitary Officer may prohibit persons from retaining or selling clothes taken from the bodies of persons who have died of small-pox and may cause any such clothes to be destroyed.

31. The Chief Sanitary Officer may direct that no one shall dispose of any corpse except by burning or burial, without his written permission.

32. The Chief Sanitary Officer may approve or may provide and maintain burning or burial grounds and may, by written order, direct, either generally or specially in respect to any specified area, that corpses shall not be burned or buried at places other than those so approved, provided or maintained by him for the purpose.

33. The Chief Sanitary Officer may direct that any one burning or causing to be burnt any corpse, which, in the opinion of the Chief Sanitary Officer, is likely to spread small-pox, shall cause the same to be completely reduced to ashes, and shall likewise cause the clothes or other articles brought with such corpse to be reduced to ashes.

34. The Chief Sanitary Officer may direct that no person shall bury or cause to be buried any corpse, which, in the opinion of the Chief Sanitary Officer, is likely to spread small-pox, in a grave not constructed of masonry, which shall be less than 6 feet deep.

35. The Chief Sanitary Officer may order that no dome or other servant of the Board employed for the disposal of corpses shall withdraw from his duties without the permission of the Chief Sanitary Officer unless such dome or other servant of the Board has given notice in writing not less than one month previously of his intention so to withdraw.

36. The Chief Sanitary Officer or any person authorized by him in that behalf may—

(1) seize and destroy an article of food or drink, and

(2) seize and dispose of any corpse,

which, in the opinion of the Chief Sanitary Officer, is infected with, or is likely to spread, small-pox.

37. Every owner, agent or manager of a mine shall make such arrangements for the accommodation and treatment of their employés suffering from small-pox as the Chief Sanitary Officer may direct, provided that mines with an output of less than 5,000 tons per month and not more than two miles apart may, with the consent of the said officer, combine for the purpose of making such arrangements.

38. Every owner, agent or manager of a mine in which are employed persons residing or staying in the mining settlement, and every owner or occupier of any land or premises within such mining settlement, shall furnish the Chief Sanitary Officer or any officer of the Board authorized by him in that behalf, with all reasonable facilities for carrying out any measures or making any entry, inspection, examination, or enquiry under these regulations.

39. (1) The Chief Sanitary Officer or any other Sanitary Officer of the Board authorized by him that behalf, making any enquiry authorized by these regulations, may, by an order in writing, require the attendance before himself of any person being within the limits of a mining settlement or part of a mining settlement for which such officer has been appointed, who appears to be acquainted with the circumstances of a case or suspected case of small-pox and such person shall attend as so required.

(2) When the person summoned to appear under paragraph (1) is a female who, by the custom of the country, does not appear in public, suitable precautions shall be taken to respect the said custom.

40. (1) The Chief Sanitary Officer or any other Sanitary Officer of the Board authorized by him in that behalf, making any enquiry authorized by these regulations, may examine orally any person supposed to be acquainted with the facts and circumstances of a case or suspected case of small-pox.

(2) When the person to be examined under paragraph (1) is a female who, by the custom of the country, does not appear in public, the enquiring officer shall take the statement of such female under such conditions as shall admit of due respect to the said custom.

(3) Such person shall be bound to answer all questions relating to such case put to him by such officer, other than questions the answers to which would have a tendency to expose him to any criminal charge.

41. Every owner, agent or manager of a colliery shall maintain a register of all premises situated on such colliery and ordinarily used or intended to be used for housing persons employed on or about such colliery, together with such further particulars as the Chief Sanitary Officer may from time to time direct by general or special order.

42. The Chief Sanitary Officer or any other Sanitary Officer of the Board authorized by him in that behalf may, with such assistants (if any) as he thinks fit, enter upon any land or mine, or, after two hours' notice in writing, any premises or building used for human habitation at all reasonable times by day or by night, for the purpose of carrying out any measure or making any enquiries authorized by these regulations.

Notice.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted Service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits ; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominees predecease them after five years of admission. The second quinquennial valuation of the fund has been completed by the Actuary to the Government of India and his report discloses very favourable results. For forms of application and rules of the Fund apply to the Accountant-General, Central Revenues, Imperial Secretariat Buildings, Calcutta.

Acts of the Indian Legislature assented to by the Governor-General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

THE following Act which was made by the Governor General under the provisions of section 67-B of the Government of India Act and has received the assent of His Majesty signified by an order of His Majesty in Council is hereby published for general information :—

An Act to prevent the dissemination by means of books, newspapers and other documents of matter calculated to bring into hatred or contempt, or to excite disaffection against, Princes or Chiefs of States in India or the Governments or Administrations established in such States.

WHEREAS it is expedient to prevent the dissemination by means of books, newspapers and other documents of matter calculated to bring into hatred or contempt, or to excite disaffection against, Princes or Chiefs of States in India or the Governments or Administrations established in such States; It is hereby enacted as follows :—

Short title and extent

1. (*1*) This Act may be called the Indian States (Protection against Disaffection) Act, 1922.

(*2*) It extends to the whole of British India, including British Baluchistan and the Sonthal Parganas.

Definitions.

2. In this Act, unless there is anything repugnant in the subject or context,—

(*a*) "book" and "newspaper" have the meanings respectively assigned to them by the Press and Registration of Books Act, 1867 ; XXV of 1867.

(*b*) "disaffection" includes disloyalty and all feelings of enmity ; and

(*c*) "document" includes any painting, drawing, photograph, or other visible representation.

Penalty.

3. (*1*) Whoever edits, prints or publishes, or is the author of, any book, newspaper or other document which brings or is intended to bring into hatred or contempt, or excites or is intended to excite disaffection towards, any Prince or Chief of a State in India or the Government or Administration established in any such State, shall be punishable with imprisonment which may extend to five years, or with fine, or with both.

Paragraphs 211 and 212 of the Reports of the Bengal Retrenchment Committee.

1. In their report the Bengal Retrenchment Committee states that there is room for economy in the Presidency College and that its staff requires to be investigated. They have indicated the following broad lines on which economy might be effected :—

(*a*) The staff appears to be excessive for the amount of work which it has to do ; this is a matter which is regulated by the University of Calcutta, but it ought to be possible to come to an understanding with that authority by which a reduction can be made without loss of efficiency.

(*b*) The post-graduate arrangements of the University are supported by the services of the staffs of Government colleges without adequate return to Government. This requires examination with a view to economy.

(*c*) There are 14 Indian Educational Service posts in the Presidency College, but in the opinion of the Committee there are only 6 of such a nature that they should be held by members of the Indian Educational Service. The remainder of the staff, they think, should be drawn from the Provincial or Subordinate Educational Service.

The Committee are also of opinion that the present rate of fees in the Presidency College is unduly low and should be increased by 50 per cent.

The Government of Bengal in the Ministry of Education consider it desirable to have the advice of a Committee on the problems referred to above. They accordingly appoint a Committee consisting of the following members :—

President.

(1) The Vice-Chancellor of the Calcutta University.

Members.

(2) The Director of Public Instruction, Bengal.
(3) The Principal, Scottish Churches College.
(4) Dr. D. B. Meek.
(5) Dr. Sir P. C. Roy, Kt., C.I.E.
(6) Maulvi Fazlul Haq.
(7) Mr. S. N. Mullick.
(8) Rai A. C. Banerjee Bahadur.
(9) Mr. E. F. Oaten, Assistant Director of Public Instruction, Bengal.
(10) Mr. J. C. Coyajee, Professor, Presidency College.
(11) Mr. S. C. Mahalanabis, Professor, Presidency College.
(12) Mr. S P. Das, Professor, Presidency College.

Member and Secretary.

(13) Mr. J. R. Barrow, Principal, Presidency College.

3. The terms of reference will be as follows :—

(*i*) To advise on the future scope and staffing of the Presidency College with due regard to economy, efficiency and its position as the premier Government college of the province. As a special subsidiary reference under this head the Committee will advise on the future status and emoluments of the laboratory assistants of the college, whose position and prospects are stated to be incommensurate with their abilities.

(*ii*) To consider the extent to which the staff of the college should take part in the post-graduate teaching of the University of Calcutta and the terms on which such staff should be so employed and to advise on the question of the use of the college laboratories and library by the University and the conditions on which such use should be permitted.

(*iii*) When the Committee reach decisions on the above questions they should consider the following supplementary questions in the light of these decisions :—(1) the rate of fees which should be charged, including the rate which should be charged to post-graduate students of the college, and (2) to what extent free studentships should be provided and fee reductions allowed.

(*iv*) It has been stated that the college can, without any loss of efficiency, take in more students partly by slightly increasing the numerical strength of the classes and partly by opening new sections. As difficulty is now being experienced in obtaining admission into the Presidency College, the Committee should consider the point, it being clearly realised that Government are not prepared at present to construct more rooms, although they are prepared to make slight structural alterations in the present buildings of the college.

ORDER.—Ordered that the resolution be published in the *Calcutta Gazette* and that a copy be forwarded to each member.

By order of the Government of Bengal
(Ministry of Education).

W. W. HORNELL,
Secretary to the Government of Bengal (offg.).

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 24th October 1923.

Summary.—The week was practically rainless. Rain at this stage will help the flowering of the late transplanted paddy. The prospects of winter rice and other standing crops are generally reported to be fairly favourable. Preparation of lands for the spring crops and their sowings are progressing satisfactorily. The average price of common rice for the province has fallen by about 0·24 per cent. as compared with that of the previous week.

RESOLUTION ON THE REPORTS ON INLAND EMIGRATION UNDER THE ASSAM LABOUR AND EMIGRATION ACT, 1901 (VI OF 1901), FOR THE YEAR ENDING THE 30TH JUNE 1923.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Emigration.

DARJEELING, THE 13TH OCTOBER 1923.

RESOLUTION—No. 1362T.R.

READ—

The Reports on Inland Emigration under the Assam Labour and Emigration Act, 1901 (VI of 1901), for the year ending the 30th June 1923, submitted by the Superintendent of Emigration, Calcutta, and the District and Assistant Superintendents of Emigration.

THE year 1922-23 was an uneventful one in the matter of emigration, and there was a further falling off in the number of emigrants despatched to the labour districts.

2. Recruiting operations in Bengal were conducted as usual in the districts of Bankura, Birbhum, Burdwan and Midnapore, and the number of garden sardars employed during the year was 261 as against 259 in the preceding year. All worked under the supervision of licensed local agents. The number of local agents' licenses issued was 18 as against 12 issued in the previous year. The total number of emigrants recruited in Bengal was 78 as against 102 in the previous year. The largest number of recruits was from Midnapore, viz., 50. The total number of recruits from Bengal and other provinces embarking at Goalundo was 11,124 as compared with 11,407 in the preceding year.

3. Arrangements for river transport were satisfactory. One death at Kharagpur and two deaths at Naihati occurred among the emigrants during the year. Of the 11,135 emigrants, who arrived at Goalundo from the recruiting districts in and outside the Presidency of Bengal, two deserted, seven were released and two died. There was no death during the steamer journey to Chandpur among the 4,385 emigrants who embarked for the Surma Valley districts. There was also no death during the voyage to Assam among the 6,739 emigrants who embarked for the Brahmaputra Valley.

4. In connection with the transport of labour to Assam, receipts amounted to Rs. 1,937 against Rs. 2,006 in the preceding year, while the expenditure increased from Rs. 19,966-14-4 to Rs. 22,057-3-9.

5. Lt.-Col. C. A. Gourlay, I.M.S., held the office of the Superintendent of Emigration, Calcutta, throughout the year. The thanks of the Governor in Council are due to him and to the local officers for their assistance in the administration of the Act.

By order of the Governor in Council,

M. C. McALPIN,
Secretary to the Government of Bengal.

NOTICE.

The Civil Service Commissioners are authorised by the Secretary of State for India in Council to announce that the new age limits for the Indian Civil Service Open Competition in this country, viz., 21 to 23 on the 1st August of the year of competition, will come into force for the Open Competition to be held in 1925, not in 1924 as previously announced. For the Open Competition to be held in 1924 the age limits will be 21 to 24 on the 1st August of the year of competition, this year (with 1922 and 1923) constituting a transition period from the old to the new age limits.

The probationary course of selected candidates, before proceeding to India, will be extended to two years in the case of all candidates selected on the result of the Open Competition to be held in 1925; and a proportion of the younger candidates selected on the result of the Open Competition to be held in 1924 will also be required to undergo two years' probation in the United Kingdom.

As the scheme and syllabus of the examination as lately revised may be expected to prove well adapted to their purpose under the new age limits it is not intended to make any material change unless experience shows that modification is required; the Regulations are always, however, liable to alteration from year to year.

CIVIL SERVICE COMMISSION,
September, 1923.

INDIAN CIVIL SERVICE.

Open Competition of 1924.

An Open Competitive Examination for admission to the Indian Civil Service will be held in London in 1924, the written work commencing on the 1st August, while the *viva voce* test (Subject 6) will be held in July.

The number of persons to be selected at this examination will be announced hereafter.

No person will be admitted to compete from whom the Secretary, Civil Service Commission, has not received, on or before the **2nd June, 1924,** *an application on the prescribed form, a copy of which is sent herewith. No allegation that an Application Form or a letter respecting such Form has been lost or delayed in the post will be considered by the Commissioners unless the person making such allegation produces a Post Office Certificate of Posting. Candidates who delay their applications until the last day will do so at their own risk.*

Acknowledgments of such Application Forms are sent, and any candidate who has filled up and returned the printed Application Form but has not received an acknowledgment of it within four complete days should at once write to the Secretary, Civil Service Commission, Burlington Gardens, London, W. 1. Failure to comply with this provision will deprive the candidate of any claim to consideration.

Candidates will be notified in June of the date and place fixed for their viva voce *test and of the manner in which the fee* (£8) *is to be paid. The time table of the written part of the examination will be posted about the middle of July to the address given on the Form of Application, and will contain instructions as to the time and place at which candidates are to attend.*

NOTE.

If open competitive examinations for the following services, viz.:—

Eastern Cadetships in the Colonial Service;
Junior Grade of the Administrative Class (Men) in the Home Civil Service;

should be held in 1924 concurrently with the Open Competitive Examination for the Indian Civil Service, candidates duly eligible in respect of age, etc., will be admitted to

compete for any two or all three of these services, subject to the following conditions :—

(1) Every successful candidate who may have been admitted to compete for either the Indian or the Colonial Service (or both), as well as for the Home Service, will be called upon to declare, immediately after the announcement of the result of the competitions, whether he prefers his name to remain on the list of candidates for the Indian or Colonial Service or on the list of candidates for the Home Service.

The name of any candidate who fails to declare his choice when called upon to do so will be removed from the list of candidates for the Home Service.

(2) Every successful candidate who may have been admitted to compete for both the Indian and Colonial Services will be called upon to declare immediately after the announcement of the result of the competitions, whether he prefers his name to remain on the list of candidates for the Indian Service or on the list of candidates for the Colonial Service.

The name of any candidate who fails to declare his choice when called upon to do so will be removed from the list of candidates for the Colonial Service.

(3) All declarations of choice are irrevocable.

(4) Candidates for all three or any two of the abovementioned services will be required to pay a consolidated fee of £8.

APPLICATION FORM.

For the use of men seeking admission to the concurrent open competitive examinations to be held in London in July and August 1924, for appointment to services of the Administrative Group, Namely :—

Home Civil Service : Administrative Class.
Indian Civil Service.
Colonial Service : Eastern Cadetships.

NOTE 1.—Candidates may include any or all of these three Services in their application (see paragraph 3 below, provided they are eligible in all respects under the regulations ; but it should be understood that the only competition as yet announced as certain to be required in 1924 is that for the Indian Civil Service, the regulations for which are enclosed herewith.

The question of holding an Open Competitive Examination in 1924 for situations in the Junior Grade of the Administrative Class in the Home Civil Service will be considered in due course, and no announcement in the matter can be made ; candidates who include the Home Civil Service in any application they may make on this form should clearly understand that it may eventually be decided that no examination for this Service is required in 1924.

The regulations for the Home and Colonial Services will be ready in April 1924 ; and an announcement will be made then (if not before) whether competitions for these Services will be required in 1924.

NOTE 2.—This form is to be filled up and returned to the Secretary (C. Room 19), Civil Service Commission, 6, Burlington Gardens, London, W. 1, in time for delivery on or before *June 2nd*, 1924. *No Application Form received after that date will be accepted.*

If a Candidate who fills up and returns this Application Form does not receive an acknowledgment of it within a reasonable time he should inform the Secretary of the Civil Service Commission.

NOTE 3.—The Candidate should by consulting the regulations satisfy himself of his eligibility for the services for which he makes application, and that his selection of subjects conforms with the regulations. No scrutiny of the information which he gives on this sheet is made by the Commissioners before the examination.

NOTE 4.—Should any of the particulars furnished be found to be false within the knowledge of the Candidate, he will, if appointed, be liable to be dismissed ; and if other-

wise entitled to Superannuation Allowance or Gratuity, he will forfeit all claim thereto. The wilful suppression of any material fact will be similarly penalised.

1 Write your Name in full, Surname first	
2. Postal Address (in full) ... ... (Any change of address should be at once communicated.)	
3 Name the Service or Services for which you desire to be considered (*see page* 4).	
4. Date of birth (*see page* 4) ... ... Give place of birth, and state whether a natural born British subject.	Age last birthday.....
5. Father's Name ... ... „ Address ... ... „ Profession or Trade ... ... Give place of Father's birth and his nationality at birth (*If deceased, give the last address, profession, &c.*) Give place of Mother's birth and her nationality at birth	
(This question is intended only for candidates for Eastern Cadetships.) 6. Are you of pure European or pure Ceylonese descent, or of mixed European and Ceylonese descent? If so, state which.	
7. Name, in order, the Schools you have attended since the age of 12, giving addresses with dates of entering and leaving.	
8. Have you been on any former occasion examined by the Civil Service Commissioners? If so, state when, and for what appointment.	
9. Age on finally quitting School	
10. Have you been a student at any University? If so, name it, and give the dates of entering and leaving. State any degrees, honours or prizes you have obtained. Name your College.	
11. Give the name of your college Tutor, or of the Professor or other University Authority to whom reference can be made as to your conduct	
12. Have you had any special preparation for examinations for these situations? If so, state (1) where and by whom it was given, (2) the dates of the beginning and end of each period, (3) whether it was whole-time or part-time work, and if part-time what part of your time of study it occupied, (4) whether it took place by day or in the evening.	

13. Have you served in the Naval, Military or Air Forces ? If so, state your Rank (or Rating) and Official Number, if any. Corps, Regiment or other Unit ... ... Dates of Service ... ... Did you serve aboard or at sea in the War which began in August 1914 ? If you have served, state your medical category on demobilisation *or* If you were discharged on account of physical unfitness for further service, state the cause of discharge, so far as known to you ; say whether you are in receipt of a disability pension, and, if so, the percentage of disability at which you are assessed.	
14. If your time since leaving School is not fully accounted for by replies given above, account for the remainder here, with dates. If you have had employers, state their names and addresses in full.	
15. Give the names, professions, and *present* addresses (in full) of two referees, who should be responsible persons (not relations), well acquainted with you in private life, and unconnected with your School or College.	1. 2.
16. Are you free from pecuniary embarrassments ? If you are under liability to repay money advanced by an institution or party for your education, state the particulars.	
17. Signature and date	

ADMINISTRATIVE GROUP COMPETITION, 1924.

Selection of subjects.

1. For which Service or Services are you a candidate ?

2. What auxiliary language or substitute for an auxiliary language do you select under subject 5 ?

3. Is your mother tongue an Indian language ? If so, name it.

4. What Extra Numerum subject do you select ?

5. Do you select any of the subjects for which evidence of training is required ? If so, pin the necessary vouchers to this form, stating here the subjects to which each voucher applies.

6. In the following list place your initials against the optional subjects you choose from section B. If you are a candidate for more than one Service and you wish to offer different subjects for different Services, append a statement showing to which Service your selection applies, and the variations you desire for other Services :—

MEDICAL EXAMINATION: CHOICE AMONG SERVICES.

Immediately the results of the examination are known, each successful Candidate will be summoned to attend at the Civil Service Commission to be medically examined and to state his choice among the Services open to him among the various Departments, Provinces or Colonies. That statement of choice is irrevocable.

EVIDENCE OF AGE.

A Candidate born in the United Kingdom must not send in his birth certificate with this form but must be prepared to produce it when required.

A European or Anglo-Indian who was born in India must be prepared to produce when required a certificate of baptism from the district in which he was baptized. If this does not also mention the date of birth it must be accompanied by a statutory declaration by one of the Candidate's parents, stating the date and place of birth.

An Indian born in India must send in with this form a certificate under Government of India Notification No. 1114 of 12th September 1918. If the Candidate's family is resident in British India the certificate must be signed by the Secretary to the Government of their province or by the Commissioner of their Division. If they reside in an Indian State it must be signed by the highest political officer accredited to that State.

FEE.

Fees are *not* to be forwarded by Candidates. Instructions respecting the manner of payment of the fee prescribed (£8), and respecting the time and place of the examination, will be sent to Candidates before the examination.

EXAMINATIONS FOR THE INDIAN CIVIL SERVICE.

REGULATIONS.

* * *The following Regulations, made by the Secretary of State for India in Council are liable to alteration from year to year.*

1. An examination for admission to the Indian Civil Service, open to all qualified persons, will be held in London in July and August of each year for such number of appointments to that Service as the Secretary of State may on each occasion determine. The date of the Examination will be announced beforehand by the Civil Service Commissioners.

2. Save as hereinafter provided a candidate must be a British subject. If the candidate (being a British subject) or his father or his mother was not born within His Majesty's Dominions and allegiance then at the time of his birth his father must have been a British subject or the subject of a State in India and such father must be or must have continued to be until his death a British subject or the subject of such State in India. Provided that a ruler or subject of any State in India in respect of whom the Governor-General in Council has made a declaration under section 96 A of the Government of India Act may be considered eligible.

3. A candidate must have attained the age of twenty-one, and must not have attained the age of twenty-four on the first day of August of the year in which the Examination is held.

4. A candidate who is a Native of India must obtain a certificate of age and qualification under Regulations 2 and 3 issued under notification of the Government of India, No. 1114, dated 12th September 1918, and signed, should he be a resident in British India, by the Secretary to Government of the Province, or the Commissioner of the Division within which his family resides, or, should he reside in a Native State, by the highest Political Officer accredited to the State in which his family resides.

5. A candidate must be free from disease, constitutional affection, or bodily infirmity, unfitting him, or likely to unfit him, for the Indian Civil Service.†

6. A candidate shall satisfy the Civil Service Commissioners that his character is such as to qualify him for employment in the Indian Civil Service.

7 No person who, in a previous year, accepted the offer of a nomination as a Selected Candidate for the Indian Civil Service and subsequently resigned his position as a Selected Candidate, will be admitted to the examination.

8 Should the evidence upon the above points be *prima facie* satisfactory to the Civil Service Commissioners, the Candidate, on payment of the prescribed fee, will be admitted to the Examination. The Commissioners may, however, in their discretion, at any time prior to the grant of the Certificate of Qualification hereinafter referred to,

† The Civil Service Commissioners will regard no person as constitutionally fitted for appointment to the Indian Civil Service who has not been satisfactorily vaccinated within the last seven years.

institute such further inquiries as they may deem necessary; and if the result of such inquiries in the case of any Candidate should be unsatisfactory to them in any of the above respects he will be ineligible for admission to the Indian Civil Service, and, if already selected, will be removed from the position of a Probationer.

9. The Examination will include the following subjects.‡ The numerical value is shown against each subject.

SECTION A.

Candidates are to take up all the subjects in this section.

		Marks.
1.	Essay	100
2.	English	100
3.	Present day	100
4.	Everyday Science	100
5.	Auxiliary Language	100
6.	Viva Voce	300

SECTION B.—OPTIONAL SUBJECTS.

Candidates are allowed to take up subjects in this section up to a total of 1,000 marks.

History.

7.	English History to 1660	200
8.	British History, 1660—1914	200

SECTION C.—An Extra Numerum subject may be offered carrying 100 marks and chosen from the following :—

Physical Anthropology.

Social Anthropology.

An auxiliary language.

10. The auxiliary language in Section A or Section C will be tested by means of translation from the language. The following languages may be offered : French, German, Italian, Spanish, Portuguese, Dutch, Norwegian, Swedish, Danish, Russian, Latin, Ancient Greek.

No candidate may offer any language or Physical Anthropology or Social Anthropology twice in the examination.

No candidate may offer in section A and section C together two languages of the group Italian, Spanish, Portuguese or two of the group Norwegian, Swedish, Danish.

Only a candidate who takes two modern languages in section B may offer Latin or Ancient Greek as an auxiliary language.

Instead of an auxiliary language a candidate whose mother-tongue is an Indian language may offer as subject 5 either Physical Anthropology or Social Anthropology.

11. In subjects 50 to 67 the civilization subject associated with a language can only be taken by candidates who offer the language itself for examination.

12. A candidate desiring to offer any of the subjects 30 to 42 or subject 47 must produce evidence satisfactory to the Commissioners of laboratory training in an institution of university rank. For Astronomy (28), Geography (43), Physical Anthropology (44), and Agriculture (46), other equivalent training will be required There will be no laboratory test as part of the examination.

13. From the marks assigned to candidates in each subject such deduction will be made as the Civil Service Commissioners may deem necessary in order to secure that no credit be allowed for merely superficial knowledge.

14. Moreover, if a candidate's handwriting is not easily legible a further deduction will, on that account, be made from the total marks otherwise accruing to him.*

15. A list of the competitors shall be made out in order of their proficiency as disclosed by the aggregate marks finally awarded to each competitor, and in that order so many competitors, up to the determined number of appointments, as are found by the Civil Service Commissioners to be qualified by examination, shall be designated to be Selected Candidates for the Indian Civil Service, provided that they appear to be duly qualified in other respects.

Should any Selected Candidate become disqualified, the Secretary of State for India will determine whether the vacancy thus created shall be filled or not. In the former case the Candidate next in order of merit, and in other respects duly qualified, shall be deemed to be a Selected Candidate.

16. Persons desirous to be admitted as candidates must apply on Forms, which may be obtained from "The Secretary, Civil Service Commission, 6, Burlington Gardens, London, W. 1," at any time after the 1st December, in the year previous to that in which the Examination is to be held. No person will be admitted to the Examination from whom the Secretary to the Civil Service Commissioners has not received on or before the 1st June (or, if that date should fall on a Sunday or public holiday, then on or before the first day thereafter on which their office is open), in the year in which the Examination is to be held, an application, in the handwriting of the Candidate, on the prescribed from.

*It is notified for general information that the number of marks deducted for bad handwriting may be considerable.

INDIAN CIVIL SERVICE.

Syllabus for the Open Competitive Examination of August, 1924, for appointments in the Indian Civil Service, and for any other competition that may be held in combination therewith.

The competitions to which the same syllabus applies and which may, if required, be held simultaneously are :—

Junior Grade of the Administrative Class (Men) in the Home Civil Service.
Colonial Service : Eastern Cadetships.
Foreign Office and Diplomatic Service.
Consular Services : General, Levant, and Far East.

NOTE 1. In view of the importance of legible handwriting in the public service candidates are warned that the provision as to deductions for bad handwriting in these competitions will be strictly enforced.

NOTE 2. Candidates are warned that full marks cannot be obtained on any paper unless the whole of it is answered, or, in cases where the number of questions to be answered is specified, unless the number specified is answered.

NOTE 3. Candidates who desire to offer any of the subjects 28, 30—44, 46, or 47 must send to the Secretary of the Civil Service Commission, so as to arrive not later than 2nd June, 1924, the evidence of training prescribed in the Syllabus. Such evidence should be in the form of a certificate signed by a responsible officer of the Institution, and may be sent in advance of the Form of Application. In the case of an Institution not situated in the British Isles, the certificate must state that the Institution in which the work has been done is authorized to prepare candidates in that subject for a degree. When a candidate has been refused permission to take one of these subjects, he will be allowed to substitute another subject within the Regulations provided he does so within the time allowed for sending in application Forms.

SECTION A.

1. **Essay.**—An essay to be written on one of several specified subjects.

2. **English.**—A paper of questions to test the understanding of English and the workmanlike use of words. An optional exercise in the writing of verse will be included.

3. **Present Day.**—Questions on contemporary subjects, social, economic, and political. A liberal choice of questions will be given. Effective and skilful exposition will be expected.

4. **Everyday Science.**—In this subject such knowledge will be expected as a candidate will have who has studied science intelligently at school and has since then kept his eyes open. A liberal choice of questions will be given. Attention should be paid to orderly, effective, and exact expression.

5. **Auxiliary Language.**—Passages dealing with history and politics may be set, but no technical matter. Verse is not excluded. Accuracy and skill in the use of English will be expected.

6. **Viva Voce.**—The examination will be in matters of general interest, not in matters of academic interest; it is intended to test the candidate's alertness, intelligence, and intellectual outlook.

SECTION B.

HISTORY. *Subjects 7-10.*—Candidates should know something of the original authorities, of the principles of historical criticism, and of the principles and the facts of geography in relation to history. They must be prepared to draw sketch maps.

7, 8. **English History to 1660, and British History 1660-1914.**—The history will be taken as a whole; politics, economics, and constitution will be considered as mutually affecting each other, and all together as the outcome of the common life of the nation. Literature will not be excluded. Candidates will be expected to know so much of European history as will make the external action of this country fully intelligible and will explain those movements at home which had their beginnings abroad, *e.g.*, the Renaissance, the Reformation, and the reactions in this country of the French Revolution. In subject 8 the outstanding incidents and movements in the history of British possessions will be included.

9, 10. **European History.—Period 1,** from 400 to 1494; **Period 2,** from 1494 to 1763; **Period 3,** from 1763 to 1914.

Although a fixed date is given for the beginning of a period, candidates will be expected to know in general outline how the initial position was reached. The history of the American continent, of India, and of the Far East, will be included in so far as, it influences European fortunes in an important degree.

11. **General Economics.**—The subject will be treated as a whole, and candidates should be prepared to illustrate the theory by the facts and to analyse the facts by the help of theory. The history of economic thought will be included.

12. **Economic History.**—Candidates will be expected to have a general acquintance with the early economic history of England; but special attention will be paid to the economic development of the British Isles and other portions of the Empire during the last two or three centuries, and so much knowledge of European and American conditions will be expected as is necessary for the understanding of British economic history.

13. **Public Economics.**—The questions will deal with the main forms of State action, central and local, in the economic sphere, together with public finance.

14. **Political Theory.**—Candidates will be expected to show a knowledge of political theory and its history, political theory being understood to mean not only the theory of legislation, but also the general history of the State and its connection with kindred studies such as Ethics, Psychology, Jurisprudence, Public International Law, and Economics. Candidates will be expected to show a knowlege of original authorities.

15. **Political Organization.**—This will include Constitutional Forms (Representative Government, Federalism, &c.) and Public Administration, central and local. The history of institutions is not included, but candidates will be expected to know the earlier stages from which existing institutions have directly developed.

16. **Constitutional Law.**—The Constitutional Law of the United Kingdom and of the British Empire, and the Law of English Local Government.

17. **Private Law.**—The following brances of English Private Law:—The Law of Real and Personal Property (including the Law of Succession), Contracts, and Torts.

18. **Roman Law.**—Passages will be set for translation and comment, but credit will not be given merely for capacity to translate the texts.

19. **International Law.**—Public International Law and International Relations. Candidates will be expected to show a knowledge of the principal treaties which have affected international relations from 1815 inclusive to the present day.

20. **Moral Philosophy.**—The history of the subject will be included. Candidates will have an opportunity of showing their strength either in Ancient Philosophy or in Modern Philosophy.

21. **Metaphysics.**—As for Moral Philosophy.

22. **Logic.**—The subject will be interpreted in a wide sense. Epistemology in its bearing on logical problems will be included, together with Formal Logic and Scientific Method. Questions may be set on Mathematical Logic, *i.e.*, on the Logic of Mathematics, Symbolic Logic, and the Logic of Probability; and also on the history of Logic. A considerable choice of questions will be allowed.

23. **Psychology.**—Questions on the history of the subject may be included.

MATHEMATICS. *Subjects* 24—27.—The use of the slide-rule and of mathematical tables will be allowed.

24. **Lower Pure Mathematics.**—Geometry of two and of three dimensions according to Euclid (synthetic geometry), to Descartes (analytical geometry), and to Monge (descriptive geometry, dealing with three-dimentional figures by the use of plan and elevation). Only the main properties of conics and quadrics, including those of poles, polars and polar planes, are expected.

Algebra: Complex numbers; uniformly converging infinite series; the elements of the theory of equations, including the numerical solution of algebraic equations, but not including the formal solution of the cubic and quartic

Infinitesimal calculus of real variables to partial differentiation and multiple integrals, with applications to geometry. Candidates should be able to deal with the types of differential equations occurring in elementary mechanics.

The proof of Taylor's series will not be required.

No great skill will be expected in sloving complicated problems of an elementary nature. The questions will involve the use of mathematical instruments.

25. **Higher Pure Mathematics.**—The geometry of curves and surfaces.

Elementary analysis, including simple functions of a complex variable and contour integration.

Differential equations in one independent variable. Elementary treatment of partial differential equations, with special reference to the differential equations of mathematical physics. Existence theorems are excluded.

Mathematical theory of probability, including theory of errors, method of least squares, curve fitting, and correlation.

Calculus of finite differences, including numerical integration and summation and linear difference equations.

A considerable choice of questions will be allowed, so that full marks may be obtained by covering about half the range stated above.

26. **Lower Applied Mathematics.**—Statics, hydrostatics, dynamics, elementary theory of electricity and magnetism, including the induction of currents. Questions will be of an elementary character, but will not be confined to two dimensions; they will involve the use of the calculus. Candidates are free to use differential equations, but a knowledge thereof will not be necessary to answer the questions. Attention will be paid to problems which arise naturally and to general principles; artificial problems will be avoided. The questions will involve the use of mathematical instruments.

27. **Higher Applied Mathematics.**—Statics to a more advanced stage, including graphical treatment.

Dynamics to the equations of Euler and Lagrange and including the theory of the vibration of strings and other simple systems.

Hydrodynamics, including the elementary theory of the motion of solids through a liquid, surface waves, and vibrations in gases.

Elasticity, including the elements of the vibrations of rods, plates and bars.

Electricity and magnetism.

Thermodynamics, kinetic theory of gases, radiation.

Questions may involve the use of spherical and zonal harmonics. A considerable choice of questions will be allowed, so that full marks may be obtained by covering about half the range stated.

28. **Astronomy.**—Geometrical optics will be included.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners of practical training in an observatory.

29. **Statistics.**—1. Elementary theory of statistics, not depending mainly on the theory of probability nor requiring a knowledge of the calculus :—frequency distributions, averages, percentiles, and simple methods of measuring dispersion ; graphic methods ; elementary treatment of qualitative data, *e.g.*, investigation of association by comparison of ratios, consistency of data ; the practice of the simplest graphic and algebraic methods of interpolation.

2. Practical methods used in the analysis and interpretation of statistics of prices, wages and incomes, trade, transport, production and consumption, education, &c. ; the more elementary methods of dealing with population and vital statistics ; miscellaneous methods used in handling statistics of experiments or observations.

3. Elements of modern mathematical theory of statistics :—frequency curves and the mathematical representation of groups generally ; accuracy of sampling as affecting averages, percentages, the standard deviation ; significance of observed differences between averages of groups, &c. ; the theory of correlation for two variables.

A considerable choice of questions will be given, especially as to paragraph 2, and it will be possible for a candidate without advanced mathematical knowledge to obtain full marks by answering questions under paragraphs 1 and 2.

NATURAL SCIENCE. *Subjects* 30—41.—The standard of the higher division of a science will be that which is required in the main subject for an honours degree at the universities. The standard for the lower division of a science will be that required in a subject subsidiary to the main subject whether required at the final degree examination or at a preceding examination.

A candidate who desires to offer a science must produce evidence satisfactory to the Civil Service Commissioners of laboratory training in that science in an institution of university rank ; the length of such training must be at least two academic years for the higher division of a sicence and at least one academic year for the lower division.

34. **Lower Botany.**
35. **Higher Botany.**

} Vegetable Physiology will be included in each division.

36. **Lower Geology.**
37. **Higher Geology.**

} Mineralogy will be included in each division.

42. **Engineering.**—Strength of materials ; theory of structures ; mechanism and dynamics of machines ; heat and thermodynamics ; surveying ; hydraulics, including hydraulic machines ; electricity and magnetism.

The subject will be treated in a general manner and the questions will be confined to the more elementary parts of the subject. The candidate will be expected to be familiar with graphical methods and to have some skill in mechanical drawing.

A candidate who desires to offer Engineering must produce evidence satisfactory to the Civil Service Commissioners that he has undergone a course of training for at least one academic year in an institution of university rank.

43. **Geography.**—Geography an understood in the universities, not excluding topics which concern geography jointly with other subjects such as economics, history, physics, botany, and geology. There will be a practical test which will necessitate a knowledge of cartographical methods and notations, and for this test drawing instruments may be required.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners of training for at least one academic year in an institution of university rank.

44. **Physical Anthropology.**—Physical Anthropology, Prehistoric Archæology and Technology. Candidates will be expected to have such knowledge as may be acquired by laboratory and museum work, consisting mainly in the handling and study of specimens and exhibits. The subject will be treated with special, but not exclusive, reference to peoples of rude culture, including prehistoric civilization.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners that he has undergone a course of training in an institution of university rank.

45. **Social Anthropology.**—Candidates will not be expected to have an extensive experience of laboratory and museum work. The subject will be treated with special, but not exclusive, reference to peoples of rude culture, including prehistoric civilization.

46. **Agriculture.**—Agricultural chemistry, agricultural botany, and agricultural zoology will be included.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners that he has undergone a course of training in an approved institution.

47. **Experimental Psychology.**—A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners that he has undergone a course of laboratory training in an institution of university rank.

48, 49. **English Literature.—Period 1,** from 1350 to 1700 ; **Period 2,** from 1660 to 1914.

Candidates should be prepared to show a first-hand knowledge of some of the works of the following authors and of their place in the history of their country :—

PERIOD 1.

Chaucer	Bacon
Malory	Milton
Spenser	Bunyan
Shakespeare	

PERIOD 2.

Dryden	Fielding	Scott	Keats
Congreve	Johnson	Jane Austen	Dickens
Defoe	Burke	Wordsworth	Carlyle
Swift	Goldsmith	Coleridge	Tennyson
Addison	Burns	Shelley	Browning
Pope			

Questions on other writers will not be excluded, but, on the whole, the questions will be directed to the best-known authors and their best-known works. Candidates should know so much of the history as is necessary to understand the literature in its relation to other activities of the nation.

Questions will not be set on the history of the Language before Chaucer, nor in general, on its morphological or phonological changes since his time ; the history of workmanship, style, and prosody will not be excluded.

LANGUAGES WITH HISTORY AND LITERATURE.—*Subjects* 50—67.—In these the civilization subject associated with a language can only be taken by candidates who also offer themselves for examination in the language itself.

History and Literature will, as far as possible, be brought into close relation. In History, candidates will be expected to show a knowledge of the original authorities. They must also be prepared to answer questions on Historical Geography, and to draw sketch maps. The questions on Literature will require first-hand knowledge of the authors ; and the authors dealt with will be those which candidates ought to have read. Passages of Literature may be set for comment on matters of social, political, legal or other historical importance. Questions on Philology and the older forms of the languages may be set, but will not be compulsory. In the question papers on History and Literature candidates will not be required to write their answers in the foreign language.

In the conversation test importance is attached to pronunciation. The study of phonetics is an important aid to correctness of pronunciation, and candidates who take modern languages will be expected to have studied phonetics in connection with the language or languages taken.

50. **Latin Language.**—Translation, and prose or verse composition. The composition paper will be so arranged that a candidate may confine himself to prose composition or to verse composition or, if he prefers, may take some prose and some verse.

51. **Roman Civilization.**—Roman History and Latin Literature. The outlines of the history and development down to 180 A D. should be known ; but the main stress will be laid on the period 133 B.C. to 117 A.D.

52. **Greek Language.**—As for Latin.

53. **Greek Civilization.**—Greek History and Literature. In history the main stress will be on the period 510 B.C. to 323 B.C.

54. **French Language.**—Translation, free composition, set composition, and conversation.

55. **French Civilization.**—French History and Literature. The outlines of the history and development prior to 1589 should be known ; the period from 1589 to 1660 in somewhat more detail ; but the main stress will be on the period from 1660 to the present day.

56. **German Language.**—As for French.

57. **German Civilization.**—German History and Literature. Candidates should know in outline the history of the Medieval Empire, of the growth of the German cities, of the Reformation in Germany, and of the Thirty Years War ; but the main stress will be on the period from the accession of Frederick the Great to the present day.

58. **Spanish, Italian, Language.**—As for French.

59. **Spanish Civilization.**—Spanish History and Literature. In history the main stress will be laid on the periods from the Union of Castile and Aragon under Ferdinand and Isabella to the liberation of the Netherlands, and again from 1800 to the present day.

Italian Civilization.—Italian History and Literature. In history the main stress will be on the 15th century and the first half of the 16th century, and again on the period from 1789 to the present day. Sufficient should be known of the earlier period to understand the position of the Pope and the Emperor in Italy, the rise of the towns, and the position of Dante in history.

60. **Russian Language.**—As for French.

61. **Russian Civilization.**—Russian History and Literature. Something should be known of the history since the the accession of Peter the Great, but the main stress will be laid on the period from 1800 to the present day. Only the broadest outlines of the history prior to Peter the Great will be required.

62. **Arabic Language.**—Translation, free composition, set composition, conversation. The examination will be in the modern language.

63. **Arabic Civilization.**—Arabic History and Literature. The main stress in both history and literature will be on the period from the middle of the 6th century A.D. to the middle of the 13th century A.D.

64. **Persian Language.**—Translation, free composition, set composition, conversation. The examination will be in the modern language.

65. **Persian Civilization.**—Persian History and Literature. The main stress in both history and literature will be laid on the period 1000 A.D. to 1500A.D. Candidates will be expected to have a general knowledge of the history of Persia before 1000 A.D. and from 1500 A.D. to the present time.

The following applies only to candidates for the Indian Civil Service :—

66. **Sanskrit Language.**—Translation, prose composition, and questions on Vedic and Sanskrit Grammar. Both Vedic and classical Sanskrit passages will be set for translation; composition will be required in classical Sanskrit alone.

67. **Sanskrit Civilization.**—Sanskrit literature and the history of the civilization and thought of India from the Vedic period to A.D. 1200.

CIVIL SERVICE COMMISSION.

6.	Notes of Cases ...	200
7.	Economics	200

An Indian assigned to Madras whose mother-tongue is one of the two principal vernacular languages of the province must offer the other for examination. An Indian assigned elsewhere whose mother-tongue is the principal vernacular of the province to which he is assigned must substitute British History in place of the vernacular language and Phonetics (subjects I and 2); in such cases 600 marks will be allotted to British History.

(7) The compulsory subjects of the Final Examination and the marks allotted to them are :—

		Marks.
1.	The vernacular ...	600
2.	Indian Penal Code ...	200
3.	Code of Criminal Procedure	200
4.	Indian Evidence Act ...	200
5.	Notes of Cases ...	400
6.	Indian History ...	400
7.	Economics ...	400
8.	Riding ...	200

An Indian assigned to Madras whose mother-tongue is one of the two principal vernaculars of the province must offer the other for examination. An Indian assigned elsewhore whose mother-tongue is the principal vernacular language of his province must substitute European History in place of the vernacular language ; in such cases 600 marks will be allotted to European History.

(8) In addition a probationer may offer as an optional subject at the Final Examination either a classical language allowed under rule 9 or Hindu and Mohamedan Law. To the optional subject 400 marks are allotted.

† Instructions, showing the extent of the examination, will be issued to selected candidates as soon as possible after the result of the competition is declared.

ONE-YEAR AND TWO-YEAR PROBATIONERS.

(9) The principal vernaculars prescribed and the optional classical languages allowed for the various provinces are as follows :—

Province	Vernacular.	Classical language
Madras	Tamil or Telugu ...	Sanskrit.
Bombay	Marathi ...	Persian or Sanskrit.
Bengal	Bengali ...	Sanskrit.
United Provinces ...	Urdu ...	Arabic or Persian or Sanskrit.
Punjab	Urdu ...	Persian.
Burma	Burmese ...	Pali.
Bihar and Orissa ...	Hindi ...	Arabic or Persian or Sanskrit.
Central Provinces ...	Hindi ...	Sanskrit.
Assam	Bengali ...	Sanskrit.

(10) Candidates who at the Final Examination in riding satisfy the Commissioners that they are sufficiently at home in the saddle for the efficient performance of any duties required of members of the Indian Civil Service will be awarded marks ranging between 101 and 200 according to the degree of proficiency displayed.

Candidates who fall short of this adequate proficiency but show such minimum proficiency as is evidence that with a moderate amount of practice they can attain full proficiency, will receive marks ranging between 1 and 100 ; they will be allowed to proceed to India and will on their arrival there be subjected to such further tests in riding as may be prescribed by their Local Government, and shall receive no increase to their initial salary until they have passed such tests to the satisfaction of that Government.

A Candidate who fails at the end of the period of probation to satisfy the Civil Service Commissioners that he has reached the minimum standard of proficiency in riding will be liable to have his name removed from the list of selected candidates.

Selected candidates will also be examined in riding at such time or times as the Commissioners may appoint during the course of the probationary period.

(11) Such deductions as the Civil Service Commissioners may consider necessary will be made from the marks assigned to candidates at the Intermediate and Final Examinations in order to secure that no credit is allowed for merely superficial knowledge.

(12) The Civil Service Commissioners will prepare lists of the candidates in order of merit ; the order for the one-year probationers being based on the sum of the marks obtained by the candidates at the Open Competitive and Final Examinations, the order for the two year probationers being based on the sum of the marks obtained by the candidates at the Intermediate and Final Examinations.

(13) The selected candidates whose performance in the compulsory subjects of the prescribed examinations, namely, the Final Examination for one-year men and the Intermediate and Final Examinations for two-year men, is such as to satisfy the Civil Service Commissioners, and who have also satisfied the Commissioners of their eligibility in respect of nationality, age, health, character, and conduct during the period of probation, shall be certified by the Commissioners to be entitled to be appointed to the Indian Civil Service, provided that they shall comply with the regulations in force, at the time, for that service.

(14) If any Candidate is prevented by sickness or any other adequate cause from attending the Final Examination, the Commissioners may, with the concurrence of the Secretary of State for India in Council, allow him to appear at the Final Examination to be held in the following year, or at a special examination. A selected candidate absent for such adequate cause from the Intermediate Examination may, under similar conditions, be allowed to appear at the Intermediate Examination a year later or at a special examination, or may be excused the Intermediate Examination and allowed to appear for the Final Examination in regular course.

The Civil Service Commissioners are authorized by the Secretary of State for India in Council to make the following announcements :—

(i) *Selected candidates will be allotted to the various provinces upon a consideration of all the circumstances including their own wishes ; but the requirements of the Public Service will rank before every other consideration.*

(ii) *Except in the case of persons continuing to receive Scholarship allowances of equal or greater amounts from the Government of India an allowance of* £300 *a year, or, in the case of Selected candidates possessing an Indian domicile, an allowance of* £350 *a year will be given to any candidate who passes his probation at one of the Universities or other Institutions that have been approved for the purpose by the Secretary of State for India in Council.*

In the case of Selected Candidates on probation for one year the allowance will be payable in four equal instalments on the following dates respectively :—December 24th after his selection, March 25th, June 25th and after signature of Covenant on appointment to the Service.

In the case of Selected Candidates on probation for two years the allowance will be payable in eight equal instalments, the first on the December 24th after selection, the second to the seventh on the six following quarter days and the eighth after signature of Covenant on appointment to the Service.

The payment of the various instalments of the allowance except the final instalment, and, in the case of the two year probationers, the instalment payable at the end of the first year of probation, will be conditional on the receipt by the Secretary of State through the Civil Service Commissioners of a certificate that the candidate has fulfilled up to date the requirements of the authorities and shown satisfactory conduct at the approved, institution.

The whole probation must ordinarily be passed at the same Institution. Migration will not be permitted except for special reasons approved by the Secretary of State.

N.B.—The Secretary of State for India gives notice that the amount of the allowances will be reconsidered in 1924, with a view to a possible reduction with effect from the instalment payable on December 1925.

(iii) *A 1st class passage to India will be engaged for Selected Candidates with a view to their proceeding to India during the November following their Final Examination.*

(iv) *Each candidate will be required before receiving the first instalment of his allowance to execute an agreement binding himself and one surety jointly and severally to refund all monies he may have received from the Secretary of State for India in the event of:—*

(1) *his failure to pass the Final Examination within the time prescribed by the Regulations, and to satisfy the Civil Service Commissioners of his fitness for admission to the Indian Civil Service, or*

(2) *his subsequent failure to execute the usual covenant, and to proceed to India as and when he shall be directed by the Secretary of State for India.*

(v) *All candidates obtaining Certificates will be also required to enter into covenants, by which, amongst other things, they will bind themselves to make such payments as under the rules and regulations for the time being in force they may be required to make for the pensions of their families. The stamps payable on these covenants amount to £1.*

(vi) *The seniority in the I.C.S. will be determined by the results of the examinations taken and the reports on law cases submitted during the course of probation.*

(vii) *Candidates who fail to satisfy the Civil Service Commissioners at the Final Examination held in any year will be definitely rejected, and will not be allowed to present themselves for re-examination, unless it shall appear to the Secretary of State in Council, after reference to the Civil Service Commissioners, that such failure is due to circumstances wholly exceptional and beyond the control of the candidate.*

(viii) *"Overseas pay" will not be admissible to Indian members of the Indian Civil Service selected at Open Competitive Examinations held in London in 1925 and subsequent ytears.*

2. The draft will be taken into consideration on the 20th December 1923, and any objection or suggestion received by the undersigned before that date, through the District Magistrate, will be duly considered :—

Draft by-laws under section 71(1) of the Calcutta Hackney-carriage Act, 1919 (Bengal Act I of 1919), for the Naihati Municipality in the district of the 24-Parganas.

Appointment and duties of the Registering Officer.

1. Every hackney-carriage in the Naihati Municipality shall be annually registered by a registering officer who shall be appointed for the purpose by the municipal Commissioners and who shall keep a register in which he shall enter the class and number assigned to every hackney-carriage.

Qualification of drivers.

2. Every person applying for a driver's license shall be required to satisfy the registering officer—

(*a*) that he knows how to drive and control horses and is in all respects a fit person for such employment ;
(*b*) that he is well acquainted with the principal roads and places of interest in and around Naihati ;
(*c*) that he has a thorough knowledge of the list of fares and tables of distances prepared by the Commissioners of the municipality ;
(*d*) that he knows the rules of the roads and the signals used by drivers.

3. Licenses for hackney-carriage drivers and bearers for rickshaws will be in different forms. There shall be attached to each license in such manner as the Commissioners may prescribe—

(*a*) the thumb mark of the driver ;
(*b*) a table of fares and distances to be prepared under the authority of the Commissioners.

4. Every driver of a hackney-carriage or bearer of a rickshaw shall carry with him and produce, when called upon to do so by any officer of the municipality or by his fare, his license with table of fares and distances supplied free of cost to every driver or bearer.

5. No hackney carriage driver shall drive with his feet in any other position than on the foot-board of the vehicles, nor shall he muffle up his face and head in such manner as might en danger the proper driving of his vehicles.

6. No hackney-carriage driver shall be allowed to drive any licensed hackney-carriage or carriages other than those specified on his license without the permission of the registering officer.

Uniforms.

7. The uniforms of the driver shall be clean.

Orders and Notifications by the Government of India.

The following notification issued by the Government of India in the Department of Industries and Labour, published in the *Gazette of India*, dated the 20th October 1923, is republished for general information.

L. BIRLEY,

Chief Secretary to the Government of Bengal.

NOTIFICATION.

Simla, the 16th October 1923.

No. A.-342.—Whereas it appears to the Governor General in Council that the Legislature of the Commonwealth of Australia is making satisfactory provision for the protection of inventions patented, and of designs registered, in British India ;

Now, therefore, in pursuance of the provisions of sub-section (4) of section 78-A of the Indian Patents and Designs Act, 1911 (II of 1911), the Governor General in Council is pleased to direct that the provisions of the said section shall, with effect from the 1st January 1924, apply for the protection of inventions patented, and of designs registered, in the Commonwealth of Australia.

A. H. LEY,

Secretary to the Government of India.

The following notification issued by the Government of India in the Foreign and Political Department, published in the *Gazette of India*, dated the 27th October 1923, is republished for general information.

L. BIRLEY,

Chief Secretary to the Government of Bengal.

NOTIFICATION.

Simla, the 23rd October 1923.

No. 90-G.—Subject to the confirmation of His Majesty's Government, the Governor General in Council is pleased to recognise the appointment of Mr. William B Douglass junior as Vice-Consul for the United States of America at Calcutta.

E. B. HOWELL,

Secretary to the Government of India (offg.).

The following notification, issued by the Government of India in the Home Department, published in the *Gazette of India*, dated the 20th October 1923, is republished for general information.

L. BIRLEY,
Chief Secretary to the Government of Bengal.

NOTIFICATION.

Simla, the 18th October 1923.

No. F.-243-23.—The following regulations respecting the examination of candidates for the Indian Civil Service to be held in London in August 1924 are published for general information :—

Copies of these papers may be obtained on application to the Secretary to the Government of India, Home Department.

NOTICE.

The Civil Service Commissioners are authorised by the Secretary of State for India in Council to announce that the new age limits for the Indian Civil Service Open Competition in this country, viz., 21 to 23 on the 1st August of the year of competition, will come into force for the Open Competition to be held in 1925, not in 1924 as previously announced. For the Open Competition to be held in 1924 the age limits will be 21 to 24 on the 1st August of the year of competition, this year (with 1922 and 1923) constituting a transition period from the old to the new age limits.

The probationary course of selected candidates, before proceeding to India, will be extended to two years in the case of all candidates selected on the result of the Open Competition to be held in 1925 ; and a proportion of the younger candidates selected on the result of the Open Competition to be held in 1924 will also be required to undergo two years' probation in the United Kingdom.

As the scheme and syllabus of the examination as lately revised may be expected to prove well adapted to their purpose under the new age limits it is not intended to make any material change unless experience shows that modification is required ; the Regulations are always, however, liable to alteration from year to year.

CIVIL SERVICE COMMISSION,

September, 1923.

INDIAN CIVIL SERVICE.

OPEN COMPETITION OF 1924.

An open Competitive Examination for admission to the Indian Civil Service will be held in London in 1924, the written work commencing on the 1st August, while the *viva voce* test (Subject 6) will be held in July.

The number of persons to be selected at this examination will be announced hereafter.

No person will be admitted to compete from whom the Secretary, Civil Service Commission, has not received, on or before the 2nd June 1924, an application on the prescribed form a copy of which is sent herewith. No allegation that an Application Form or a letter respecting such Form has been lost or delayed in the post will be considered by the Commissioners, unless the person making such allegation produces a Post Office Certificate of Posting. Candidates who delay their applications until the last day will do so at their own risk.

Acknowledgments of such Application Forms are sent, and any candidate who has filled up and returned the printed Application Form but has not received an acknowledgment of it within four complete days should at once write to the Secretary, Civil Service Commission, Burlington Gardens, London, W. 1. Failure to comply with this provision will deprive the candidate of any claim to consideration.

Candidates will be notified in June of the date and place fixed for their *viva voce* test and of the manner in which the fee (£8) is to be paid. The Time Table of the written part of the examination will be posted about the middle of July to the address given on the Form of Application, and will contain instructions as to the time and place at which candidates are to attend.

NOTE.

If Open Competitive Examinations for the following Services, viz :—

Eastern Cadetships in the Colonial Service ;
Junior Grade of the Administrative Class (Men) in the Home Civil Service ;

should be held in 1924 concurrently with the Open Competitive Examination for the Indian Civil Service, candidates duly eligible in respect of age, etc., will be admitted to compete for any two or all three of these Services, subject to the following conditions :—

(1) Every successful candidate who may have been admitted to compete for either the Indian or the Colonial Service (or both), as well as for the Home Service, will be called upon to declare, immediately after the announcement of the result of the competitions, whether he prefers his name to remain on the list of candidates for the Indian or Colonial Service or on the list of candidates for the Home Service.

The name of any candidate who fails to declare his choice when called upon to do so will be removed from the list of candidates for the Home Service.

(2) Every successful candidate who may have been admitted to compete for both the Indian and Colonial Services will be called upon to declare, immediately after the announcement of the result of the competitions, whether he prefers his name to remain on the list of candidates for the Indian Service or on the list of candidates for the Colonial Service

The name of any candidate who fails to declare his choice when called upon to do so will be removed from the list of candidates for the Colonial Service.

(3) All declarations of choice are irrevocable.

(4) Candidates for all three or any two of the above-mentioned services will be required to pay a consolidated fee of £8.

CIVIL SERVICE, COMMISSION,

September, 1923. *July, 1923.*

EXAMINATIONS FOR THE INDIAN CIVIL SERVICE.

REGULATIONS.

*** *The following Regulations, made by the Secretary of State for India in Council, are liable to alteration from year to year.*

1. An examination for admission to the Indian Civil Service, open to all qualified persons, will be held in London in July and August of each year for such number of appointments to that Service as the Secretary of State may on each occasion determine. The date of the Examination will be announced beforehand by the Civil Service Commissioners.

2. Save as hereinafter provided a candidate must be a British subject. If the candidate (being a British subject) or his father or his mother was not born within His Majesty's Dominions and allegiance then at the time of his birth his father must have been a British subject or the subject of a State of India and such father must be or must have continued to be until his death a British subject or the subject of such State in India. Provided that a ruler or subject of any State in India in respect of whom the Governor-General in Council has made a declaration under section 96A of the Government of India Act may be considered eligible.

3. A candidate must have attained the age of twenty-one, and must not have attained the age of twenty-four on the first day of August of the year in which the Examination is held.

4. A candidate who is a Native of India must obtain a certificate of age and qualification under Regulations 2 and 3 issued under notification of the Government of India, No. 1114, dated 12th September, 1918, and signed, should he be a resident in British India, by the Secretary to Government of the Province, or the Commissioner of the Division within which his family resides, or, should he resides in a Native State, by the highest Political Officer accredited to the State in which his family resides.

5. A candidate must be free from disease, constitutional affection, or bodily infirmity, unfitting him, or likely to unfit him, for the Indian Civil Service.†

6. A candidate shall satisfy the Civil Service Commissioners that his character is such as to qualify him for employment in the Indian Civil Service.

7. No person who, in a previous year, accepted the offer of a nomination as a Selected candidate for the Indian Civil Service and subsequently resigned his position as a Selected Candidate, will be admitted to the examination.

8. Should the evidence upon the above points be *prima facie* satisfactory to the Civil Service Commissioners, the Candidate, on payment of the prescribed fee, will be admitted to the examination. The Commissioners may, however, in their discretion, at any time prior to the grant of the Certificate of Qualification hereinafter referred to institute such further inquiries as they may deem necessary ; and if the result of such inquiries in the case of any Candidate should be unsatisfactory to them in any of the above respects he will be ineligible for admission to the Indian Civil Service, and, if already selected, will be removed from the position of a Probationer.

9. The Examination will include the following subjects.‡ The numerical value is shown against each subject.

† The Civil Service Commissioners will regard no person as constitutionally fitted for appointment to the Indian Civil Service who has not been satisfactorily vaccinated within the last seven years.

‡ A Syllabus defining in general terms the character of the examination in the various subjects is sent herewith.

SECTION C.—An Extra Numerum subject may be offered carrying 100 marks and chosen from the following :—

Physical Anthropology.
Social Anthropology
An auxiliary Language.

10. The auxiliary language in section A or section C will be tested by means of translation from the language. The following languages may be offered : French, German, Italian, Spanish, Portuguese, Dutch, Norwegian, Swedish, Danish, Russian, Latin, Ancient Greek.

No Candidate may offer any language or Physical Anthropology or Social Anthropology twice in the examination.

No Candidate may offer in Sections A and C together two languages of the group Italian, Spanish, Portuguese or two of the group Norwegian, Swedish, Danish.

Only a Candidate who takes two modern languages in Section B may offer Latin or Ancient Greek as an auxiliary language.

Instead of an auxiliary language a candidate whose mother tongue is an Indian language may offer as Subject 5 either Physical Anthropology or Social Anthropology.

11. In subjects 50 to 67 the civilization subject associated with a language can only be taken by candidates who offer the language itself for examination.

12. A Candidate desiring to offer any of the subjects 30 to 42 or subject 47 must produce evidence satisfactory to the Commissioners of laboratory training in an institution of university rank. For Astronomy (28), Geography (43), Physical Anthropology (44), and Agriculture (46), other equivalent training will be required. There will be no laboratory test as part of the examination.

13. From the marks assigned to Candidates in each subject such deduction will be made as the Civil Service Commissioners may deem necessary in order to secure that no credit be allowed for merely superficial knowledge.

14. Moreover, if a Candidate's handwriting is not easily legible, a further deduction will, on that account, be made from the total marks otherwise accruing to him.*

15. A list of the competitors shall be made out in order of their proficiency as disclosed by the aggregate marks finally awarded to each competitor, and in that order so many competitors, up to the determined number of appointments, as are found by the Civil Service Commissioners to be qualified by examination, shall be designated to be Selected Candidates for the Indian Civil Service, provided that they appear to be duly qualified in other respects.

Should any Selected Candidate become disqualified, the Secretary of State for India will determine whether the vacancy thus created shall be filled or not. In the former case the Candidate next in order of merit, and in other respects duly qualified, shall be deemed to be a Selected Candidate.

16. Persons desirous to be admitted as Candidates must apply on Forms, which may be obtained from "The Secretary, Civil Service Commission, 6, Burlington Gardens, London, W. 1," at any time after the 1st December, in the year previous to that in which the Examination is to be held. No person will be admitted to the Examination from whom the Secretary to the Civil Service Commissioners has not received on or before the 1st June (or, if that date should fall on a Sunday or public holiday, then, on or before the first day thereafter on which their office is open), in the year in which the Examination is to be held, an application, in the handwriting of the Candidate, on the prescribed form.

*It is notified for general information that the number of marks deducted for bad handwriting may be considerable

INDIAN CIVIL SERVICE.

Syllabus for the Open Competitive Examination of August, 1924, for appointments in the Indian Civil Service, and for any other competition that may be held in combination therewith.

The competitions to which the same syllabus applies and which may, if required, be held simultaneously are :—

Junior Grade of the Administrative Class (Men) in the Home Civil Service.

Colonial Service: Eastern Cadetships.

Foreign Office and Diplomatic Service.

Consular Services: General, Levant, and Far East.

Note 1.—In view of the importance of legible handwriting in the public service, candidates are warned that the provision as to deductions for bad handwriting in these competitions will be strictly enforced.

Note 2.—Candidates are warned that full marks cannot be obtained on any paper unless the whole of it is answered, or in cases where the number of questions to be answered is specified, unless the number specified is answered.

Note 3.—Candidates who desire to offer any of the subjects 28, 30—44, 46 or 47 must send to the Secretary of the Civil Service Commission, so as to arrive not later than 2nd June, 1924, the evidence of training prescribed in the Syllabus. Such evidence should be in the form of a certificate signed by a responsible officer of the Institution, and may be sent in advance of the Form of Application. In the case of an Institution not situated in the British Isles, the certificate must state that the Institution in which the work has been done is authorized to prepare candidates in that subject for a degree. When a candidate has been refused permission to take one of these subjects, he will be allowed to substitute another subject within the Regulations, provided he does so within the time allowed for sending in Application Forms.

SECTION A.

1. **Essay.**—An Essay to be written on one of several specified subjects.

2. **English.**—A paper of questions to test the understanding of English and the workmanlike use of words. An optional exercise in the writing of verse will be included.

3. **Present Day.**—Questions on contemporary subjects, social, economic, and political. A liberal choice of questions will be given. Effective and skilful exposition will be expected.

4. **Everyday Science.**—In this subject such knowledge will be expected as a candidate will have who has studied science intelligently at school and has since then kept his eyes open. A liberal choice of questions will be given. Attention should be paid to orderly, effective, and exact expression.

5. **Auxiliary Language.**—Passages dealing with History and Politics may be set, but no technical matter. Verse is not excluded. Accuracy and skill in the use of English will be expected.

6. **Viva Voce.**—The examination will be in matters of general interest, not in matters of academic interest; it is intended to test the candidate's alertness, intelligence, and intellectual outlook.

SECTION B.

HISTORY. *Subjects* 7-10. Candidates should know something of the original authorities, of the principles of historical criticism, and of the principles and the facts of geography in relation to history. They must be prepared to draw sketch maps.

7, 8. **English History to 1660,** and **British History 1660-1914.**—The history will be taken as a whole; politics, economics, and constitution will be considered as mutually affecting each other, and altogether as the outcome of the common life of the nation. Literature will not be excluded. Candidates will be expected to know so much of European history as will make the external action of this country fully intelligible and will explain those movements at home which had their beginnings abroad, *e.g.*, the Renaissance, the Reformation, and the reactions in this country of the French Revolution. In subject 8 the outstanding incidents and movements in the history of British possessions will be included.

9, 10. **European History**—**Period 1,** from 400 to 1494; **Period 2,** from 1494 to 1763; **Period 3,** from 1763 to 1914.

Although a fixed date is given for the beginning of a period, candidates will be expected to know in general outline how the initial position was reached. The history of the American continent, of India, and of the Far East, will be included in so far as it influences European fortunes in an important degree.

11. **General Economics.**—The subject will be treated as a whole, and candidates should be prepared to illustrate the theory by the facts and to analyse the facts by the help of the theory. The history of economic thought will be included.

12. **Economic History.**—Candidates will be expected to have a general acquaintance with the early economic history of England; but special attention will be paid to the economic development of the British Isles and other portions of the Empire during the last two or three centuries, and so much knowledge of European and American conditions will be expected as is necessary for the understanding of British economic history.

13. **Public Economics.**—The questions will deal with the main forms of State action, central and local, in the economic sphere, together with public finance.

14. **Political Theory.**—Candidates will be expected to show a knowledge of political theory and its history, political theory being understood to mean not only the theory of legislation, but also the general history of the State and its connection with kindred studies such as Ethics, Psychology, Jurisprudence, Public International Law, and Economics. Candidates will be expected to shew a knowledge of original authorities.

15. **Political Organization.**—This will include Constitutional Forms (Representative Government, Federalism, etc.) and Public Administration, central and local. The history of institutions is not included, but candidates will be expected to know the earlier stages from which existing institutions have directly developed.

16. **Constitutional Law.**—The Constitutional Law of the United Kingdom and of the British Empire, and the Law of English Local Government.

17. **Private Law.**—The following branches of English Private Law :—The Law of Real and Personal Property (including the Law of Succession), Contracts, and Torts.

18. **Roman Law.**—Passages will be set for translation and comment, but credit will not be given merely for capacity to translate the texts

19. **International Law.**—Public International Law and International Relations. Candidates will be expected to show a knowledge of the principal treaties which have affected international relations from 1815 inclusive to the present day.

20. **Moral Philosophy.**—The history of the subject will be included. Candidates will have an opportunity of showing their strength either in Ancient Philosophy or in Modern Philosophy.

21. **Metaphysics.**—As for Moral Philosophy.

22. **Logic.**—The subject will be interpreted in a wide sense. Epistomology in its bearing on logical problems will be included, together with Formal Logic and Scientific Method. Questions may be set on Mathematical Logic, *i.e.*, on the Logic of Mathematics, Symbolic Logic, and the Logic of Probability; and also on the history of Logic. A considerable choice of questions will be allowed.

23. **Psychology.**—Questions on the history of the subjects may be included.

MATHEMATICS. *Subjects* 24—27.—The use of the slide-rule and of mathematical tables will be allowed.

24. **Lower Pure Mathematics.**—Geometry of two and of three dimensions according to Euclid (synthetic geometry), to Descartes (analytical geometry), and to Monge (descriptive geometry, dealing with three-dimensional figures by the use of plan and elevations). Only the main properties of conics and quadrics, including those of poles, polars and polar planes are expected.

Algebra: Complex numbers; uniformly converging infinite series; the elements of the theory of equations, including the numerical solution of algebraic equations, but not including the formal solution of the cubic and quartic.

Infinitesimal calculus of real variables to partial differentiation and multiple integrals, with applications to geometry. Canditates should be able to deal with the types of differential equations occurring in elementary mechanics.

The proof of Taylor's series will not be required.

No great skill will be expected in solving complicated problems of an elementary nature. The questions will involve the use of mathematical instruments.

25. **Higher Pure Mathematics.**—The geometry of curves and surfaces.

Elementary analysis, including simple functions of a complex variable and contour integration.

Differential equations in one independent variable. Elementary treatment of partial differential equations, with special reference to the differential equations of mathematical physics. Existence theorems are excluded.

Mathematical theory of probability, including theory of errors, method of least squares, curve fitting, and correlations.

Calculus of finite differences, including numerical integration and summation and linear difference equations.

A considerable choice of questions will be allowed so that full marks may be obtained by covering about half the range stated above.

26. **Lower Applied Mathematics.** Statics, hydrostatics, dynamics, elementary theory of electricity and magnetism, including the induction of currents. Questions will be of an elementary character, but will not be confined to two dimensions; they will involve the use of the calculus. Candidates are free to use differential equations, but a knowledge thereof will not be necessary to answer the questions. Attention will be paid to problems which arise naturally and to general principles; artificial problems will be avoided. The questions will involve the use of mathematical instruments.

27. **Higher Applied Mathematics.**—Statics to a more advanced stage, including graphical treatment

Dynamics to the equations of Euler and Lagrange and including the theory of the vibration of strings and other simple systems.

Hydrodynamics, including the elementary theory of the motion of solids through a liquid, surface waves, and vibrations in gases.

Elasticity, including the elements of the vibrations of rods, plates and bars.

Electricity and magnetism.

Thermodynamics, kinetic theory of gases, radiation.

Questions may involve the use of spherical and zonal harmonics. A considerable choice of questions will be allowed, so that full marks may be obtained by covering about half the range stated.

28. **Astronomy.**—Geometrical optics will be included.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners of practical training in an observatory.

29. **Statistics.**—1, Elementary theory of statistics, not depending mainly on the theory of probability nor requiring a knowledge of the calculus :—frequency distributions, averages, percentiles, and simple methods of measuring dispersion ; graphic methods, elementary treatment of qualitative data, *e.g.*, investigation of association by comparison of ratios, consistency of data ; the practice of the simplest graphic and algebraic methods of interpolation.

2. Practical methods used in the analysis and interpretation of statistics of prices, wages and incomes, trade, transport, production and consumption, education, etc., the more elementary methods of dealing with population and vital statistics ; miscellaneous methods used in handling statistics of experiments or observations.

3. Elements of modern mathematical theory of statistics :—frequency curves and the mathematical representation of groups generally : accuracy of sampling as affecting averages, percentages, the standard deviation ; significance of observed differences between averages of groups, etc.; the theory of correlation for two variables.

A considerable choice of questions will be given, especially as to paragraph 2, and it will be possible for a candidate without advanced mathematical knowledge to obtain full marks by answering questions under paragraphs 1 and 2.

NATURAL SCIENCE. *Subjects* 30—41.—The standard of the higher division of a science will be that which is required in the main subject for an honours degree at the universities. The standard for the lower division of a science will be that required in a subject subsidiary to the main subject whether required at the final degree examination or at a preceding examination.

A candidate who desires to offer a science must produce evidence satisfactory to the Civil Service Commissioners of laboratory training in that science in an institution of university rank ; the length of such training must be at least two academic years for the higher division of a science and at least one academic year for the lower division.

34. **Lower Botany.**
35. **Higher Botany.**
} Vegetable Physiology will be included in each division.

36. **Lower Geology.**
37. **Higher Geology.**
} Mineralogy will be included in each division.

42. **Engineering.**—Strength of materials ; theory of structures ; mechanism and dynamics of machines ; heat and thermodynamics ; surveying ; hydraulics, including hydraulic machines ; electricity and magnetism.

The subject will be treated in a general manner and the questions will be confined to the more elementary parts of the subject. The candidate will be expected to be familiar with graphical methods and to have some skill in mechanical drawing.

A candidate who desires to offer Engineering must produce evidence satisfactory to the Civil Service Commissioners that he has undergone a course of training for at least one academic year in an institution of university rank.

43. **Geography.**—Geography as understood in the universities, not excluding topics which concern geography jointly with other subjects such as economics, history, physics, botany, and geology. There will be a practical test which will necessitate a knowledge of cartographical methods and notations, and for this test drawing instruments may be required.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners of training for at least one academic year in an institution of university rank.

44. **Physical Anthropology.**—Physical Anthropology, Prehistoric Archæology and Technology. Candidates will be expected to have such knowledge as may be acquired by laboratory and museum work, consisting mainly in the handling and study of specimens and exhibits. The subject will be treated with special, but not exclusive, reference to peoples of rude culture, including prehistoric civilization.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners that he has undergone a course of training in an institution of university rank.

45. **Social Anthropology.**—Candidates will not be expected to have an extensive experience of laboratory and museum work. The subject will be treated with special, but not exclusive, reference to peoples of rude culture, including prehistoric civilization.

46. **Agriculture.**—Agricultural chemistry, agricultural botany, and agricultural Zoology will be included.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners that he has undergone a course of training in an approved institution.

47. **Experimental Psychology.**—A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners that he has undergone a course of laboratory training in an institution of university rank.

48, 49. **English Literature.**—**Period 1,** from 1350 to 1700 ; **Period 2,** from 1660 to 1914.

Candidates should be prepared to show a first-hand knowledge of some of the works of the following authors and of their place in the history of their country :—

PERIOD 1.

Chaucer	Bacon
Malory	Milton
Spenser	Bunyan
Shakespeare	

PERIOD 2.

Dryden	Fielding	Scott	Keats
Congreve	Johnson	Jane Austen	Dickens
Defoe	Burke	Wordsworth	Carlyle
Swift	Goldsmith	Coleridge	Tennyson
Addison	Burns	Shelley	Browning
Pope			

Questions on other writers will not be excluded, but, on the whole, the questions will be directed to the best-known authors and their best-known works. Candidates should know so much of the history as in necessary to understand the literature in its relation to other activities of the nation.

Questions will not be set on the history of the language before Chaucer, nor, in general, on its morphological or phonological changes since his time ; the history of workmanship, style, and prosody will not be excluded.

LANGUAGES WITH HISTORY AND LITERATURE.—*Subjects* 50-67.—In these the civilization subject associated with a language can only be taken by candidates who also offer themselves for examination in the language itself.

History and Literature will, as far as possible, be brought into close relation. In History, candidates will be expected to show a knowledge of the original authorities. They must also be prepared to answer questions on Historical Geography, and to draw sketch maps. The questions on Literature will require first-hand knowledge of the authors ; and the authors dealt with will be those which candidates ought to have read. Passages of Literature may be set for comment on matters of social, political, legal, or other historical importance. Questions on Philology and the older forms of the languages may be set, but will not be compulsory. In the question papers on History and Literature candidates will not be required to write their answers in the foreign language.

In the conversation test importance is attached to pronunciation. The study of phonetics is an important aid to correctness of pronunciation, and candidates who take modern languages will be expected to have studied phonetics in connection with the language or languages taken.

50. **Latin Language.**—Translation, and prose or verse composition. The composition paper will be so arranged that a candidate may confine himself to prose composition or to verse composition or, if he prefers, may take some prose and some verse.

51. **Roman Civilization.**—Roman History and Latin Literature. The out lines of the history and development down to 180 A.D. should be known ; but the main stress will be laid on the period 133 B.C. to 117 A.D.

52. **Greek Language.**—As for Latin.

53. **Greek Civilisation.**—Greek History and Literature. In history the main stress will be on the period 510 B.C. to 323 B.C.

54. **French Language.**—Translation, free composition, set composition, and conversation.

55. **French Civilisation.**—French History and Literature. The outlines of the history and development prior to 1589 should be known ; the period from 1589 to 1660 in somewhat more detail ; but, the main stress will be on the period from 1660 to the present day.

56. **German Language.**—As for French.

57. **German Civilisation.**—German History and Literature. Candidates should know in outline the history of the Medieval Empire, of the growth of the German cities, of the Reformation in Germany, and of the Thirty years War ; but the main stress will be on the period from the accession of Frederick the Great to the present day.

58. **Spanish, Italian, Language.**—As for French.

59. **Spanish Civilization.**—Spanish History and Literature. In history the main stress will be laid on the periods from the Union of Castile and Aragon under Ferdinand and Isabella to the liberation of the Netherlands, and again from 1800 to the present day.

Italian Civilization.—Italian History and Literature. In history the main stress will be on the 15th century and the first half of the 16th century, and again on the period from 1789 to the present day. Sufficient should be known of the earlier period to understand the position of the Pope and the Emperor in Italy, the rise of the towns and the position of Dante in history.

60. **Russian Language.**—As for French.

61. **Russian Civilization.**—Russian History and Literature. Something should be known of the history since the accession of Peter the Great, but the main stress will be laid on the period from 1800 to the present day. Only the broadest outlines of the history prior to Peter the Great will be required.

62. **Arabic Language.**—Translation, free composition, set composition, conversation. The examination will be in the modern language.

63. **Arabic Civilization.**—Arabic History and Literature. The main stress in both history and literature will be on the period from the middle of the 6th century A.D. to the middle of the 13th century A.D.

64. **Persian Language.**—Translation, free composition, set composition, conversation. The examination will be in the modern language.

65. **Persian Civilization.**—Persian History and Literature. The main stress in both history and literature will be laid on the period 1000 A.D. to 1500 A.D. Candidates will be expected to have a general knowledge of the history of Persia before 1000 A.D. and from 1500 A.D. to the present time.

The following applies only to candidates for the Indian Civil Service :—

66. **Sanskrit Language.**—Translation, prose composition, and questions on Vedic and Sanskrit grammar. Both Vedic and classical Sanskrit passages will be set for translation ; composition will be required in classical Sanskrit alone.

67. **Sanskrit Civilization.**—Sanskrit literature and the history of the civilization and thought of India from the Vedic period to A.D. 1200.

CIVIL SERVICE COMMISSION.

August, 1923.

Admin. (Early Edition). **Write your Surname here**_____

APPLICATION FORM.

For the use of men seeking admission to the concurrent open competitive examinations to be held in London in July and August, 1924, for appointment to services of the Administrative Group, namely :—

Home Civil Service : Administrative Class.

Indian Civil Service.

Colonial Service : Eastern Cadetships.

NOTE :—Candidates may include any or all of these three Services in their application (see paragraph 8 below) provided they are eligible in all respects under the regulations ; but it should be understood that the only competition as yet announced as certain to be required in 1924 is that for the Indian Civil Service, the regulations for which are enclosed herewith.

The question of holding an Open Competitive Examination in 1924 for situations in the Junior Grade of the Administrative Class in the Home Civil Service will be considered in due course, and no announcement in the matter can be made ; candidates who include the Home Civil Service in any application they may make on this form should clearly understand that it may eventually be decided that no examination for this Services is required in 1924.

The regulations for the Home and Colonial Services will be ready in April, 1924 ; and an announcement will be made then (if not before) whether competitions for these Services will be required in 1924.

NOTE 2.—This form is to be filled up and returned to the Secretary (C. Room 19) Civil Service Commission, 6, Burlington Gardens, London, W. 1, in time for delivery on or before *June 2nd, 1924. No application form received after that date will be accepted.*

If a candidate who fills up and returns this Application Form does not receive an acknowledgment of it within a reasonable time he should inform the Secretary of the Civil Service Commission.

NOTE 3.—The candidate should by consulting the regulations satisfy himself of his eligibility for the services for which he makes application, and that his selection of subjects conforms with the regulations. No scrutiny of the information which he gives on this sheet is made by the Commissioners before the examination.

NOTE 4.—Should any of the particulars furnished be found to be false within the knowledge of the candidate, he will, if appointed, be liable to be dismissed ; and if otherwise entitled to Superannuation Allowance or Gratuity he will forfeit all claim thereto. The wilful suppression of any material fact will be similarly penalised.

1. Write your Name in full, Surname first ...	
2. Postal Address (in full) ... ... (Any change of address should be at once communicated.)	
3. Name the Service or Services for which you desire to be considered.	
4. Date of birth ... ... Give place of birth, and state whether a natural born British subject.	Age last birthday.
5. Father's Name ... ... „ Address ... ... „ Profession or Trade ... ... Give place of Father's birth and his nationality at birth. (*If deceased, give the last address, profession, etc.*) Give place of Mother's birth and her nationality at birth.	
(This question is intended only for candidates for Eastern Cadetships) 6. Are you of pure European or pure Ceylonese descent, or of mixed European and Ceylonese descent ? If so, state which.	
7. Name, in order, the Schools you have attended since the age of 12, giving addresses with dates of entering and leaving.	
8. Have you been on any former occasion examined by the Civil Service Commissioners ? If so, state when, and for what appointment.	
9. Age on finally quitting school ...	

10. Have you been a student at any University? If so, name it, and give the dates of entering and leaving. State any degrees, honours or prizes you have obtained. Name your College.	
11. Give the name of your College Tutor, or of the Professor or other University Authority to whom reference can be made as to your conduct.	
12. Have you had any special preparation for examinations for these situations? If so state (1) where and by whom it was given, (2) the dates of the beginning and end of each period, (3) whether it was whole-time or part-time work, and if part-time what part of your time of study it occupied, (4) whether it took place by day or in the evening.	
13. Have you served in the Naval, Military or Air Forces? If so, state your Rank (or Rating) and Official Number, if any ... ... Corps, Regiment or Other Unit ... Dates of Service ... ... Did you serve abroad or at sea in the War which began in August, 1914? If you have served, state your medical category on demobilisation, *or* If you were discharged on account of physical unfitness for further service, state the cause of discharge, so far as known to you; say whether you are in receipt of a disability pension, and, if so, the percentage of disability at which you are assessed.	
14. If your time since leaving School is not fully accounted for by replies given above, account for the remainder here, with dates. If you have had employers, state their names and addresses in full.	
15. Give the names, professions, and *present* addresses (in full) of two referees, who should be responsible persons (not relations), well acquainted with you in private life, and unconnected with your School or College.	1. 2.
16. Are you free from pecuniary embarrassments? If you are under liability to repay money advanced by an institution or party for your education, state the particulars.	
17. Signature and date	

ADMINISTRATIVE GROUP COMPETITION, 1924.

Selection of Subjects.

1. For which service or services are you a candidate ?
2. What auxiliary language or substitute for an auxiliary language do you select under subject 5 ?
3. Is your mother tongue an Indian language ? If so, name it.
4. What Extra Numerum subject do you select ?
5. Do you select any of the subjects for which evidence of training is required ? If so, pin the necessary vouchers to this form, stating here the subjects to which each voucher applies.

6. In the following list place your initials against the optional subjects you choose from Section B. If you are a candidate for more than one Service and you wish to offer different subjects for different Services, append a statement showing to which Service your selection applies, and the variations you desire for other Services.

Medical examination : choice among services.

Immediately the results of the examination are known, each successful Candidate will be summoned to attend at the Civil Service Commission to be medically examined and to state his choice among the Services open to him and among the various Departments, Provinces or Colonies. That statement of choice is irrevocable.

Evidence of Age.

A Candidate born in the United Kingdom must not send in his birth certificate with this form but must be prepared to produce it when required.

A European or Anglo-Indian who was born in India must be prepared to produce when required a certificate of baptism from the district in which he was baptized. If this does not also mention the date of birth it must be accompanied by a statutory declaration by one of the Candidate's parents, stating the date and place of birth.

An Indian born in India must send in with this form a certificate under Government of India Notification No. 1114 of 12th September 1918. If the Candidate's family is resident in British India the certificate must be signed by the Secretary to the Government of their province or by the Commissioner of their Division. If they reside in an Indian State it must be signed by the highest political officer accredited to that State.

Fee.

Fees are *not* to be forwarded by Candidates. Instructions respecting the manner of payment of the fee prescribed (£8), and respecting the time and place of the examination, will be sent to Candidates before the examination.

EXAMINATIONS FOR THE INDIAN CIVIL SERVICE.

Regulations made under sections 97 (1) and (2) of the Government of India Act for the probation in the United ingdom and the further examination of Selected Candidates for the Indian Civil Service recruited by Competitive Examinations held in the United Kingdom or in India

*** *The following regulations made by the Secretary of State for India in Council are liable to alteration from year to year.*

(1) Candidates selected at the Open Competition held in London will be required to remain in the United Kingdom on probation for one or two years as may be decided by the Secretary of State for India in Council.

(2) Candidates selected at the Competitive Examination held in India will be required to proceed to the United Kingdom on probation for a period of two years.

ONE-YEAR PROBATIONERS.

(3) One year probationers will, at the end of the year of probation, undergo an examination called the Final Examination. The compulsory subjects and the marks allotted to them are as follows* :—

	Marks.		Marks.
1. Indian Penal Code ...	... 200	5 The principal vernacular language of the province to which the candidate is assigned	... 600
2. Code of Criminal Procedure	... 200		
3. The Indian Evidence Act	... 200		
4. Indian History ...	... 400	6. Riding	... 200

An Indian assigned to Madras whose mother-tongue is one of the two principal vernacular languages of the province must offer the other for examination. An Indian assigned elsewhere whose mother-tongue is the principal vernacular language of the province to which he is assigned must substitute British History in place of the vernacular language ; in such cases 600 marks will be allotted to British History.

(4) One-year probationers may, in addition, offer in the Final Examination one of the following optional subjects :—

	Marks.
Hindu and Mohammedan Law	... 400
A Classical Language allowed under Regulation 9	... 400

No candidate who offered Sanskrit or Arabic at the Open Competition may offer the same language at the Final Examination.

TWO-YEAR PROBATIONERS.

(5) Two-year probationers will, during their period of probation, undergo two examinations, the Intermediate Examination at the end of the first year and the Final Examination at the end of the second year.

(6) The subjects of the Intermediate Examination and the marks allotted to them are as follows, all the subjects being compulsory* : —

	Marks		Marks
1. The principal vernacular language of the province to which the candidate is assigned	400	4. Law of Evidence and Criminal Law ...	200
2. Phonetics	200	5. Indian History	200
3. Jurisprudence	200	6 Notes of Cases	200
		7. Economics...	200

* Instructions, showing the extent of the examination, will be issued to selected Candidates as soon as possible after the results of the competition is declared.

An Indian assigned to Madras whose mother tongue is one of the two principal vernacular languages of the province must offer the other for examination. An Indian assigned elsewhere whose mother tongue is the principal vernacular of the province to which he is assigned must substitute British History in place of the vernacular language and Phonetics (subjects 1 and 2); in such cases 600 marks will be allotted to British History.

(7) The compulsory subjects of the Final Examination and the marks allotted to them are :—

		Marks.			Marks
1	The vernacular ...	... 600	5.	Notes of Cases ...	... 400
2.	Indian Penal Code ...	... 200	6	Indian History ...	... 400
3.	Code of Criminal Procedure	... 200	7	Economics ...	... 400
4.	Indian Evidence Act ...	... 200	8.	Riding ...	... 200

An Indian assigned to Madras whose mother-tongue is one of the two principal vernaculars of the province must offer the other for examination. An Indian assigned elsewhere whose mother-tongue is the principal vernacular language of his province must substitute European History in place of the vernacular language ; in such cases 600 marks will be allotted to European History.

(8) In addition a probationer may offer as an optional subject at the Final Examination either a classical language allowed under rule 9 or Hindu and Mahammedan Law. To the optional subject 400 marks are allotted.

ONE-YEAR AND TWO-YEAR PROBATIONERS.

(9) The principal vernaculars prescribed and the optional classical languages allowed for the various provinces are as follows :—

Province.	Vernacular.	Classical language.
Madras ...	... Tamil or Telugu	... Sanskrit.
Bombay ...	... Marathi	... Persian or Sanskrit.
Bengal ...	... Bengali	... Sanskrit
United Provinces ...	... Urdu	... Arabic or Persian or Sanskrit.
Punjab ...	... Urdu	... Persian.
Burma ...	... Burmese	... Pali
Bihar and Orissa ...	... Hindi	... Arabic or Persian or Sanskrit.
Central Provinces ...	... Hindi	... Sanskrit.
Assam ...	... Bengali	... Sanskrit.

(10) Candidates who at the Final Examination in riding satisfy the Commissioners that they are sufficiently at home in the saddle for the efficient performance of any duties required of members of the Indian Civil Service will be awarded marks ranging between 101 and 200 according to the degree of proficiency displayed.

Candidates who fall short of this adequate proficiency but show such minimum proficiency as is evidence that with a moderate amount of practice they can attain full proficiency, will receive marks ranging between 1 and 100; they will be allowed to proceed to India and will on their arrival there be subjected to such further tests in riding as may be prescribed by their Local Government, and shall receive no increase to their initial salary until they have passed such tests to the satisfaction of that Government.

A candidate who fails at the end of the period of probation to satisfy the Civil Service Commissioners that he has reached the minimum standard of proficiency in riding will be liable to have his name removed from the list of selected candidates

Selected candidates will also be examined in riding at such time or times as the Commissioners may appoint during the course of the probationary period.

(11) Such reductions as the Civil Service Commissioners may consider necessary will be made from the marks assigned to candidates at the Intermediate and Final Examinations in order to secure that no credit is allowed for merely superficial knowledge.

(12) The Civil Service Commissioners will prepare lists of the candidates in order of merit ; the order for the one year probationers being based on the sum of the marks obtained by the Candidates at the open Competitive and final Examinations, the order for the two-year probationers being based on the sum of the marks obtained by the candidates at the Intermediate and Final Examinations.

(13) The selected candidates whose performance in the compulsory subjects of the prescribed Examinations, namely, the Final Examination for one-year men and the Intermediate and Final Examinations for two-year men, is such as to satisfy the Civil Service Commissioners, and who have also satisfied the Commissioners of their eligibility in respect of nationality, age, health, character, and conduct during the period of probation, shall be certified by the Commissioners to be entitled to be appointed to the Indian Civil Service, provided that they shall comply with the regulations in force, at the time, for that service.

(14) If any Candidate is prevented by sickness or any other adequate cause from attending the Final Examination, the Commissioners may, with the concurrence of the Secretary of State for India in Council, allow him to appear at the Final Examination to be held in the following year, or at a special examination. A selected candidate absent

for such adequate cause from the Intermediate Examination may, under similar conditions, be allowed to appear at the Intermediate Examination a year later or at a special examination, or may be excused the Intermediate examination and allowed to appear for the Final Examination in regular course.

The Civil Service Commissioners are authorized by the Secretary of State for India in Council to make the following announcements :—

(*i*) Selected candidates will be allotted to the various provinces upon a consideration of all the circumstances, including their own wishes ; but the requirements of the Public Service will rank before every other consideration.

(*ii*) Except in the case of persons continuing to receive Scholarship allowances of equal or greater amounts from the Government of India an allowance of £300 a year, or, in the case of Selected Candidates possessing an Indian domicile, an allowance of £350 a year will be given to any candidate who passes his probation at one of the Universities or other Institutions that have been approved for the purpose by the Secretary of State for India in Council.

In the case of Selected Candidates on probation for one year the allowance will be payable in four equal instalments on the following dates respectively :—December 24th after his selection, March 25th, June 25th and after signature of Covenant on appointment to the Service.

In the case of Selected Candidates on probation for two years the allowance will be payable in eight equal instalments, the first on the December 24th after selection, the second to the seventh on the six following quarter days and the eighth after signature of Covenant on appointment to the Service.

The payment of the various instalments of the allowance except the final instalment, and in the case of the two year probationers, the instalment payable at the end of the first year of probation, will be conditional on the receipt by the Secretary of State through the Civil Service Commissioners of a certificate that the candidate has fulfilled up to date the requirements of the authorities and shown satisfactory conduct at the approved institution.

The whole probation must ordinarily be passed at the same Institution. Migration will not be permitted except for special reasons approved by the Secretary of State.

N.B.—The Secretary of State for India gives notice that the amount of the allowances will be reconsidered in 1924 with a view to a possible reduction with effect from the instalment payable in December 1925.

(*iii*) A first class passage to India will be engaged for Selected Candidates with a view to their proceeding to India during the November following their Final Examination.

(*iv*) Each candidate will be required before receiving the first instalment of his allowance to execute an agreement binding himself and one surety jointly and severally to refund all monies he may have received from the Secretary of State for India in the event of—

(1) his failure to pass the Final Examination within the time prescribed by the Regulations, and to satisfy the Civil Service Commissioner of his fitness for admission to the Indian Civil Service, or

(2) his subsequent failure to execute the usual covenant, and to proceed to India, as and when he shall be directed by the Secretary of State for India.

(*v*) All candidates obtaining Certificates will be also required to enter into covenants by which, amongst other things, they will bind themselves to make such payments as under the rules and regulations for the time being in force they may be required to make for the pensions of their families. The stamps payable on these covenants amount to £1.

(*vi*) The seniority in the I.C.S. will be determined by the results of the examinations taken and the reports on law cases submitted during the course of probation.

(*vii*) Candidates who fail to satisfy the Civil Service Commissioners at the Final Examination held in any year will be definitely rejected, and will not be allowed to present themselves for re-examination, unless it shall appear to the Secretary of State in Council, after reference to the Civil Service Commissioners, that such failure is due to circumstances wholly exceptional and beyond the control of the candidate.

(*viii*) "Overseas pay" will not be admissible to Indian Members of the Indian Civil Service selected at Open Competitive Examinations held in London in 1925 and subsequent years.

BOILERS.

Simla, the 27th October 1923.

No. A.-470.—In exercise of the powers conferred by section 28 of the Indian Boilers Act, 1923 (V of 1923), read with section 22 of the General Clauses Act, 1897 (X of 1897), the Governor General in Council is pleased to make the following Regulations :—

REGULATIONS.

PRELIMINARY.

1. Short title, extent and commencement.—(*a*) These regulations may be called the Indian Boiler Regulations, 1924.

(*b*) They shall come into force on the commencement of the Indian Boilers Act, 1923.

2. Definitions.—In these regulations, unless there is anything repugnant in the subject or context :

(*a*) The "Act" means the Indian Boilers Act, 1923.

(*b*) "Inspecting Authority" means an authority recognized by the Governor General in Council as competent to grant a certificate in Form II ;

(*c*) "Inspecting officer" means—

(*i*) in respect of material manufactured or boilers constructed in British India, an officer appointed by the Governor General in Council for the purpose,

(*ii*) in respect of material manufactured or boilers constructed outside British India, an officer acting on behalf of any Inspecting Authority recognized as competent by the Governor General in Council.

PART I.

Standard conditions for the design and construction of land Boilers.

3. (1) A boiler shall not be registered under sub-section (4) of section 7 of the Act and a certificate shall not be issued under sub-section (5) of that section with reference to a boiler unless the standard conditions in respect of material, design and construction which are specified in Chapters I and II of this Part are satisfied in respect of such boiler : Provided that a boiler in use at the time of the commencement of the Act in a local area in which the registration of, or a certificate or license for the use of, a boiler was not required by law previously to such commencement, may be so registered and such certificate may be issued in respect thereof, notwithstanding the fact that such standard conditions are not satisfied in respect of such boiler.

(2) Notwithstanding anything contained in sub-regulation (1), the Chief Inspector may, subject to the provisions of regulation 46, register a boiler and order the issue of a certificate authorising the use thereof, although the standard conditions are not fully satisfied in respect of such boiler : Provided that the Chief Inspector shall not register such boiler or order the issue of such certificate, if a structural part of such boiler which is subject to pressure is made of Bessemer process steel or of cast or malleable cast iron.

CHAPTER I.

General requirements and conditions as to material, workmanship, etc.

4. Standard requirements.—(*a*) **Material.**—All steel plates, rivets and bars used in the construction of boilers shall be tested and found to conform with the requirements of Chapter II.

(*b*) **Construction.**—All boilers during construction shall be under the supervision of an Inspecting Officer.

(*c*) **Inspecting Authority's certificate.**—For boilers imported into British India a certificate from an Inspecting Authority in Form II certifying that the material was tested and the boiler built under their supervision shall be furnished to the Chief Inspector before or with the application for registration. In the case of steel made and tested by well-known makers in India or Great Britain the certificate of the makers in Form IV as prescribed in Regulation 27 may be accepted in lieu of a certificate from an Inspecting Authority.

The Chief Inspector shall decide whether for the purpose of this regulation a maker is " well known " or not.

(*d*) **Certificates, etc., under section 14 (1) (*c*) of the Act.**—In advance of, or along with, an application for registration of a boiler, the following certificates and drawings or specifications shall be furnished to the Chief Inspector, namely :—

(*i*) a certificate in Form III of manufacture and test signed by the maker or by a responsible representative of the maker of the boiler, containing a description of the boiler, its principal dimensions, particulars of the kind of material used in its construction, the thickness of all plates, the diameter of and method of forming the rivet holes in the shell plates, particulars of any departure from ordinary practice in making the shell such as solid rolling or welding the hydraulic test to which the boiler was subjected, the intended working pressure, the area of heating surface, the year and place of make, and the works number of the boiler.

There may be included in such certificate a further declaration that samples of the angle, stay or rivet bars and rivets used in the construction of the boiler have been certified by the makers to have been tested and found to comply with the requirements of Chapter II ; in which declaration the kind of material used, and the limits of tensile breaking strength with which the tests comply shall be stated with sufficient precision to obviate the risk of confusion in making allowances. Where such further declaration is included in such certificate, the certificates referred to in clause (*iii*) of this sub-regulation shall not be required.

(*ii*) A drawing or print to a scale, in the case of large boilers, of not less than $\frac{1}{4}$ inch to the foot and, in the case of small boilers, of not less than $1\frac{1}{2}$ inches to the foot, showing the principal dimensions and a longitudinal section and end view of the boiler, and bearing the works number of the boiler and the maker's office stamp. The drawing shall show details of riveting of longitudinal and circumferential shell seams with pitch of rivets, cross spacing of rivet rows and diameters of rivet holes ; the radii of curvature of dished end plates, fillets of flanges and corners of bent plates, and where gusset stays are fitted, the number and diameter of rivet holes in each joint of gusset stay.

(*iii*) A certificate from the steel maker and a certificate from the maker of the plates, rivets or bars of the nature referred to in Regulations 26 and 27, respectively. The certificate from the maker of the plates, rivets or bars, shall show the charge numbers, the plate or bar numbers and the number and dimensions of the various plates, etc., tested, their ultimate tensile breaking strength in tons per square inch of section, the percentage of elongation and the length on which measured, the number, kind and result of bend or other tests made and the date of tests.

(*e*) **Maker's stamp.**—The boiler shall have stamped upon its front plate in a conspicuous position the following particulars :—

		Maker's Name.
Works' number		Year of make.
Tested to	lbs.	on
W. P.	lbs.	Inspecting Officer's or Inspecting Authority's official stamp.

5. (*i*) **Modification of formulae.**—Under the Regulations for determining the working pressure to be allowed on various parts of boilers, the material to which the formulæ apply shall in the absence of express provision to the contrary be steel complying with the requirements of Chapter II.

(*ii*) Where no test certificates for shell plates and rivets are produced, the material shall be treated as iron. If, however, in such cases the Inspector is clearly satisfied that the material is of good quality, a higher strength than that allowed for iron may be permitted but the strength of the shell plates shall not, save for special reasons, be assumed to be more than 26 tons. In such cases S and S_1 in equations 1, 3 and 4 of Chapter III may be respectively 26 and 21 for steel and 21 and 18 for iron. For iron across the grain S may be 18.

(*iii*) Where end plates, furnaces, flat plates, girders, gusset and other stays, etc., are made of steel or iron for which no test certificates are produced, the working pressure as found from the formulæ, in which S is to be taken at the lowest limit prescribed for the part, reduced by 15 per cent. shall, except where such material is specifically provided for in any formula, be the working pressure permitted. For flat plates of copper, the working pressure as found from the formulæ, reduced by 50 per cent. shall be the working pressure permitted.

6. Standard specifications for material.—The standard specifications for steel, wrought iron and copper plates and bars, and for cast steel shall be those prescribed in Chapter II, but certificates of tests of material for wrought iron (except for special wrought iron for screw stays), copper and cast steel shall not be required unless special allowances are required. Such special allowances shall be in the discretion of the Chief Inspector.

7. Welded steel plates.—No steel plates subject to a direct tensile stress shall be welded, except where the weld is covered by a butt strap or straps or except as permitted in the Standard Conditions.

8. Annealing after working in fire.—All steel plates which are welded, dished, flanged or locally heated shall be afterwards efficiently annealed.

9. Rivet holes.—All rivet holes shall be drilled "fair" and as far as possible shall be drilled in place. After drilling the plates the burrs shall be removed, the faying surfaces of the plates cleaned and the sharp outer edges of the holes removed.

Explanation.—Where sizes of rivets are mentioned in the Standard Conditions the sizes refer to the diameters of the rivet holes, not to the diameters of the rivets used before closing.

10. End plates in steam space.—When the end plates of large boilers situated in the steam space are liable to contact with hot gases in the uptake, the end places shall be efficiently shielded from such contact, as in the Scotch type of marine boiler.

11. Hydraulic tests of new boilers.—In all new boilers designed to work at a pressure not exceeding 100 lbs. per square inch the hydraulic test shall be twice the working pressure. For boilers designed to work at a pressure greater than 100 lbs. per square inch the hydraulic test pressure shall be 1½ times the working pressure plus 50 lbs. per square inch.

CHAPTER II.

Materials of Construction.

STEEL PLATES, RIVETS AND BARS.

(*Based on British Standards.*)

12. Process of manufacture.—Structural steel for boilers shall be made by the Open Hearth process, acid or basic, as may be specified, and shall not show on analysis more than 0·05 per cent. of sulpher or of phosphorus.

13. Freedom from defects.—The finished material shall be free from cracks, surface flaws, and lamination. It shall also have a workmanlike finish, and shall not be hammer dressed.

14. Testing and inspecting.—The following tests and inspections shall be made at the place of manufacture prior to despatch; but, in the event of any of the material proving unsatisfactory in the course of being worked into boilers, such material shall be rejected, notwithstanding any previous certificate of satisfactory testing, and such further tests of the material from the same charge shall be made as the Inspector in attendance may consider desirable.

15. (*a*) **Tensile test pieces.**—The tensile strength and ductility shall be determined from Standard test pieces cut lengthwise or crosswise from the rolled material. When material is annealed or otherwise treated before despatch, the test pieces shall be similarly and simultaneously treated with the material before testing.

(*b*) (*i*) **Plates.**—Wherever practicable the rolled surfaces shall be retained on two opposite sides of the test piece. The elongation shall be measured on a Standard test piece having a gauge length of 8 inches.

(*ii*) For material more than ⅞ inch in thickness the width of the test piece between the gauge points shall not exceed 1½ inches; for material ⅞ inch to ⅝ inch in thickness

inclusive, the width shall not exceed 2 inches ; for material less than $\frac{3}{8}$ inch in thickness the width shall not be more than $2\frac{1}{2}$ inches. In other respects the test pieces shall conform generally to the Standard Test Piece A of the British Engineering Standards Committee.

(*c*) (*i*) **Round bars.**—Bars may be tested full size as rolled, or they may be turned down to a convenient size, and if tested 1 inch in diameter or under, the test piece shall have a gauge length of 8 times the diameter. When enlarged ends are used, the length of the parallel portion shall be 9 times the reduced diameter (Standard Test Piece B of the British Engineering Standards Committee). The sectional area of the test piece shall be not less than $\frac{1}{4}$ square inch. Where bars are above 1 inch in diameter, and are tested full size as rolled, or have been turned down and the resulting test piece is above 1 inch in diameter, a gauge length of 4 times the diameter may be used at the option of the manufacturer, in which case an increased elongation will be required, as specified in Regulation 17. When enlarged ends are used, the length of the parallel portion shall be not less than $4\frac{1}{2}$ times the reduced diameter (Standard Test Piece F of the British Engineering Standards Committee).

(*ii*) Any straightening of test pieces which may be required shall be done cold.

16. Mechanical tests, and selection of test pieces.—Plates and bars for boilers shall comply with the following mechanical tests. All test pieces shall be selected by the Inspecting Officer and tested in his presence, and he shall satisfy himself that the conditions herein described are fulfilled.

17. Tensile tests.—(*a*) **Plates.**—The tensile breaking strength of steel plates for shells, gusset stays and girders, determined from Standard Test Pieces, shall be between the limits of 26 and 32 tons per square inch, but a range of not more than 4 tons per square inch shall be permitted in any one case. For plates intended for flanging or welding, and for combustion chambers and furnaces, the tensile breaking strength shall be between the limits of 24 tons and 30 tons per square inch. The elongation, measured on a standard test piece having a gauge length of 8 inches, shall be not less than 20 per cent. for material of $\frac{3}{8}$ inch in thickness and upwards required to have a tensile breaking strength between the limits of 26 tons and 32 tons per square inch ; and not less than 23 per cent. for material of $\frac{3}{8}$ inch in thickness and upwards required to have a tensile breaking strength between the limits of 24 tons and 30 tons per square inch.

(*b*) **Stay bars.**—(*i*) The tensile breaking strength of longitudinal stays shall be between the limits of 26 tons and 32 tons per square inch, with an elongation of not less than 20 per cent. measured on the Standard Test Piece B, but a range of not more than 4 tons per square inch shall be permitted in any one case. For steel bars for fire-box and combustion chamber stays the tensile breaking strength shall be between the limits of 24 tons and 30 tons per square inch, with an elongation of not less than 23 per cent. measured on the Standard Test Piece B.

(*ii*) Where Stay Bars are tested on a gauge length of 4 times the diameter (Test Piece F) the elongation shall be 24 per cent. and 28 per cent. respectively.

(*iii*) The tensile breaking strength of angle and tee bars shall be between the limits of 26 and 32 tons per square inch, with an elongation of not less than 20 per cent. measured on the Standard Test Piece A.

(*iv*) For material under $\frac{3}{8}$ inch in thickness the elongation may be 3 per cent., but not more than 3 per cent. below the above-named elongations.

(*v*) Wherever practicable the rolled surfaces shall be retained on two opposite sides of the test piece.

(*c*) **Rivet bars.**—The tensile breaking strength of rivet bars shall be between the limits of 24 tons and 28 tons per square inch of section, with an elongation of not less than 25 per cent. measured on the Standard Test Piece B or 30 per cent. measured on the Standard Test Piece F. The bars may be tested the full size as rolled.

18. Number of tensile tests.—(*a*) **Plates.**—One tensile test shall be taken from each plate as rolled. For plates exceeding $2\frac{1}{2}$ tons in weight one tensile test shall be taken from each end.

(*b*) **Angle, tee, rivet and stay bars.**—(*i*) One tensile test shall be made from each 15 or part of 15 bars rolled of each section or diameter from the same charge, but not less than two tensile tests shall be made unless the total number of bars rolled from the same charge is 8 or less than 8 and the bars are of the same section or diameter, in which case one tensile test shall suffice. For round bars of $1\frac{1}{2}$ inches diameter and under, the numbers 50 and 20 shall be substituted for 15 and 8 respectively for determining the number of tests required.

(*ii*) Should a tensile test piece break outside the middle half of its gauge length, the test may, at the maker's option, be discarded and another test be made of the same plate or bar.

19. Bend Tests.—(*a*) **Cold Bends.**—Test pieces shall be sheared lengthwise or crosswise from plates or bars, and shall not be less than $1\frac{1}{2}$ inches wide, but for small bars the whole section may be used. For rivet bars bend tests are not required.

(*b*) **Temper Bends.**—(*i*) The test pieces shall be similar to those used for cold bend tests. For temper bend tests the samples shall be heated to a blood-red colour and quenched in water at a temperature not exceeding 80 degrees Fahr. The colour shall be judged indoors in the shade.

(*ii*) In all cold bend tests, and in temper bend tests on samples 0·5 inch in thickness and above, the rough edge or arris caused by shearing may be removed by filing or grinding, and samples 1 inch in thickness and above may have the edges machined, but the test pieces shall receive no other preparation. The test pieces shall not be annealed unless the material from which they are cut is similarly annealed, in which case the test pieces shall be similarly and simultaneously treated with the material before testing.

(*c*) For both cold and temper bends the test piece shall withstand, without fracture, being doubled over until the internal radius is equal to 1½ times the thickness of the test piece and the sides are parallel.

(*d*) For small sectional material these bend tests may be made from the flattened bar.

(*e*) Bend tests may be made either by pressure or by blows.

20. Number of Bend Tests.—(*a*) **Plates.**—A bend test shall be taken from each plate as rolled. For plates exceeding 2½ tons in weight one bend test shall be taken from each end. The bend tests from shell plates, butt straps and other plates which have not to be flanged or worked in the fire or which when in use are not to be exposed to flame shall be cold bend tests. The bend tests from plates which have to be flanged or worked in the fire or which when in use will be exposed to flame shall be temper bend tests.

(*b*) **Angle, Rivet and Tee Bars.**—A cold or a temper bend test shall be made from each angle, rivet and tee bar rolled.

(*c*) **Stay Bars.**—A cold and a temper bend test shall be made from every 15 stay bars as rolled from each charge.

21. Tests for manufactured rivets.—Rivets selected by the Inspecting Officer from the bulk shall withstand the following tests:—

(*a*) The rivet shanks shall be bent cold, and hammered until two parts of the shank touch, without fracture on the outside of the bend.

(*b*) The rivet heads shall be flattened, while hot, in the usual manner, without cracking at the edges. The heads shall be flattened until their diameter is 2½ times the diameter of the shank.

22. Additional Tests before rejection.—Should the test pieces first selected by the Inspector or Inspecting Officer not fulfil the test requirements, two further tests of the same kind may be made, but should either of these fail, the plates or bars from which test pieces were cut shall be rejected. In all such cases further tests shall be made before any material from the same charge can be accepted.

23. Branding.—Every plate and bar shall be clearly and distinctly marked by the maker in two places with an approved quality brand indicating that the material has complied with the required tests; and also with the number or identification marks by which they can be traced to the charge from which the material was made.

24. Defacing of rejected material.—In the event of the material failing in any case to withstand the prescribed tests, the Inspector or Inspecting Officer shall see that the quality brand stamped on the material has been defaced by punch marks extending beyond the brand in the form of a cross, denoting that the material has been rejected.

25. Facilities for inspection.—The maker shall adopt a system of marking the ingots, billets, slabs, plates, bars, etc., which will enable all finished material to be traced to the original charge, and the Inspector or Inspecting Officer shall be given every facility for tracing all plates and bars to their respective charges, and for witnessing the required tests. When he is satisfied with the material and with the results of the tests, he shall be furnished with two copies of the advice notes of the material for his signature.

26. Steel not produced where rolled.—Where steel is not produced in the works at which it is rolled, a certificate in form IV shall be supplied to the Inspecting Officer deputed to witness the testing of the material, stating the Open Hearth Process by which it was made, the name of the Steel Maker who supplied it, also the numbers of the charges for reference to the books of the Steel Maker. The number of the charge shall be marked on each plate or bar for the purpose of identification.

27. Maker's certificate.—Before the mill sheets are signed, the maker shall furnish the Inspecting Officer with a certificate in Form IV guaranteeing that the material has been made by the Open Hearth Process acid or basic and that it has been subjected to, and has withstood satisfactorily, the tests above described in the presence of the Inspecting Officer. The following form of certificate will be accepted if printed

on each mill sheet with the name of the firm, and initialled by the Test House Manager :—

'We hereby certify that the material described below has been made by the Open Hearth Process, $\frac{\text{acid}}{\text{basic}}$, and has been satisfactorily tested in the presence of $\frac{\text{the Inspecting Officer}}{\text{our Test House Manager}}$ in accordance with the Standard tests.'

IRON PLATES, RIVETS AND BARS.

28. Specification and Tests.—Wrought iron plates, stay and rivet bars shall comply with the British Standard Specification for Wrought Iron, Report No. 51. (Revised August, 1913).

The tensile and elongation tests shall be as follows :—

29. Plates.—The tensile breaking strength shall be between 20 and 24 tons with the grain, with elongations of not less than 12 per cent. for plates up to $\frac{3}{4}$ inch thick and 10 per cent. for plates over $\frac{3}{4}$ inch thick. The tensile breaking strength of the plates across the grain shall be between 17 and 21 tons with an elongation of not less than 4 per cent. measured on the Standard Test Piece A.

30. Rivet Bars.—The tensile breaking strength shall be between 21 and 25 tons with an elongation of not less than 25 per cent. measured on the Standard Test Piece B (as rolled) or 30 per cent. measured on the Standard Test Piece F (as rolled).

31. Tests for manufactured rivets.—To be the same as for steel. (See Regulation 21).

32. Stay Bars.—The tensile breaking strength shall be between 21 and 25 tons with an elongation of not less than 22 per cent. measured on the Standard Test Piece B (as rolled) or 27 per cent. measured on the Standard Piece F (as rolled).

33. Special Iron for Screw Stays for Fireboxes and Combustion Chambers.—In order that iron screw stays may be approved of the same size as would be required for mild steel, the iron must withstand the following tests :—

(*i*) **Tensile Tests.**—The tensile breaking strength shall not be less than 21½ tons per square inch, with an elongation of not less than 25 per cent. measured on the Standard Test Piece B or 30 per cent. measured on the Standard Test Piece F.

(*ii*) **Bend Tests.**—Test pieces either of the bar as rolled, or turned down to 1 inch diameter, shall stand bending cold until the sides are parallel and the space between the two sides is not greater than the diameter of the test piece.

(*iii*) **Number of Tensile Tests.**—The bars as rolled shall be placed in batches of twenty, and one tensile test shall be taken from each batch. If this is unsatisfactory, two other bars shall be selected for test, and should either of these fail the batch shall be rejected.

(*iv*) **Number of Bend Tests.**—One ordinary bend test shall be taken from each batch, and a similar test piece from each batch shall be lightly and evenly nicked on one side with a sharp cutting tool and bent back at this point through an angle of 180 degrees by pressure or by a succession of light blows. The fracture must be clean, fibrous, free from slag or dirt or any coarse crystalline structure. If either of these is unsatisfactory, two other bars shall be selected for test, and should either of these fail the batch shall be rejected.

(*v*) In all cases the selection of the test pieces shall be made by the Inspecting Officers.

COPPER PLATES, STAY AND RIVET BARS.

34. Tensile Tests.—(*a*) **Plates.**—The tensile breaking strength of copper plates for fire-boxes determined from Standard test pieces shall not be less than 14 tons per square inch with an elongation of not less than 35 per cent. measured on Standard Test Piece A.

(*b*) **Stay and Rivet Bars.**—The tensile breaking strength of copper stay and rivet bars for fire-boxes shall not be less than 14 tons per square inch of section with an elongation of not less than 40 per cent. measured on the Standard Test Piece B.

35. Bend Tests.—Plates.—For either cold or red hot tests the test piece shall withstand being doubled over without fracture until the sides are touching and parallel.

36. Hammer Tests for Rods.—A piece of rod or bar 1 inch in length shall withstand, without cracking at the edges, being hammered endwise until the length is reduced to $\frac{3}{4}$ inch.

CAST STEEL.

37. Steel Castings.—Steel for castings may be made by any reliable process, acid or basic. All such castings shall be thoroughly annealed at a uniform temperature and be allowed to cool down prior to removal from the annealing furnace. If subsequently heated with the Inspecting Officer's approval, they shall again be similarly annealed if required by the Inspecting Officer.

38. Tensile and Bend Tests.—The tensile, elongation and bend tests for cast steel shall be as specified below. If full allowance for steel castings for fire-box or combustion chamber roof girders is required, they shall be tested as follows.

39. Number of Tests.—At least one tensile and one bend test shall be made from the casting from each charge, and when more than one casting is made from one charge, at least one tensile and one bend test shall be made from the castings run from one common pouring head; but separate tests shall be made from each casting or set of castings run from each separate pouring head.

Test pieces shall not be cut off until they have been stamped by the Inspecting Officer after the annealing has been completed.

40. Tensile Tests.—The tensile breaking strength of steel castings shall be between the limits of 26 and 40 tons per square inch, with an elongation of not less than 15 per cent. measured on the Standard Test Piece C, D or E (see Forms of British Standard Tensile Test Pieces).

41. Bend Tests.—Cold bend tests shall be made upon test pieces having a rectangular section of 1 inch wide by ¾ inch thick. The test pieces shall be machined and the edges rounded to a radius of $\frac{1}{8}$th inch. The test pieces shall be bent over the thinner section.

Bend tests may be made by pressure or by blows.

The test pieces shall withstand, without fracture, being bent through an angle of 60 degrees if the tensile breaking strength is between 35 and 40 tons per square inch, and in the case of other castings through an angle of 90 degrees, the internal radius of the bend being not greater than 1 inch.

42. If full allowance for steel castings is not required, only bend tests as above shall be taken.

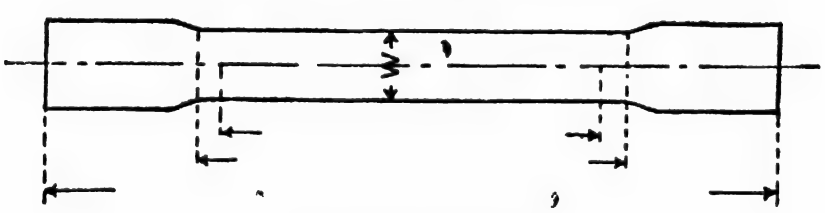
43. No tests shall be made from unimportant steel castings or from steel castings which are used for articles usually made of cast iron, if the scantlings are not materially reduced below what would be required if cast iron were used.

Forms of British Standard Tensile Test Pieces.

FOR PLATES AND OTHER STRUCTURAL MATERIAL.

TEST PIECE A.

For thicknesses over $\frac{1}{2}$" :—Maximum width allowed = $1\frac{1}{2}$ inches.
For thicknesses $\frac{3}{8}$" to $\frac{1}{2}$" :—Maximum width allowed = 2 inches.
For thicknesses under $\frac{3}{8}$" :—Maximum width allowed = $2\frac{1}{2}$ inches.

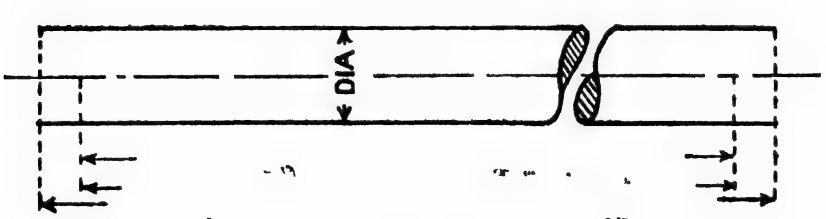


8" GAUGE LENGTH.

Parallel for a length of not less than 9 inches.

TOTAL LENGTH ABOUT 18 INCHES.

TEST PIECE B.

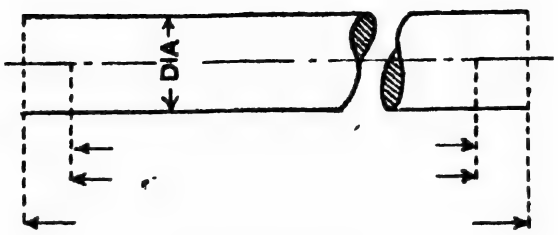


GAUGE LENGTH.

Parallel for a length of not less than 8 times the diameter

With enlarged ends : Parallel for a length of not less than 9 times the reduced diameter.

TEST PIECE F.



GAUGE LENGTH.

Parallel for a length of not less than 4 times the diameter.

With enlarged ends :—Parallel for a length of not less than 4½ times the reduced diameter.

CHAPTER III.

Regulations for determining the working pressure to be allowed on various parts of boilers.

44. The maximum pressure at which a boiler may be used shall be determined in accordance with the provisions of this Chapter.

CYLINDRICAL SHELLS.

45. Formula for working pressure of shell.—For cylindrical shells, barrels, steam and water drums, and domes of boilers the maximum working pressure per square inch to be allowed shall be calculated from the following formula :—

(*a*) Where parts of drums of water tube boilers are perforated for tubes, the working pressure shall be calculated by equation 55 under 'Tube Plates.'

$$W.P. = \frac{(t-2) \times S \times J}{C \times D} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (1)}$$

W. P. is the working pressure in lbs. per square inch,

t is the thickness of shell plates in 32nds of an inch,

S is the minimum tensile breaking strength of the shell plates in tons per square inch, or whatever strength is allowed under Regulation 5.

J is the percentage of strength of the longitudinal seams of shell or of a line of holes in the shell for stays, or rivets, or of an opening in the shell not fully compensated, whichever is least calculated by the methods hereafter described.

C is a co-efficient as follows :—

2·75 when the longitudinal seams are made with double butt straps and when small shells are formed from solid rolled sections ;

2·83 when the longitudinal seams are made with lap joints and are treble riveted ;

2·9 when the longitudinal seams are made with lap joints and are double riveted ;

3·0 when the longitudinal seams are welded and are fitted with a single butt strap ;

3·3 when longitudinal seams are made with lap joints and are single riveted ;

D is the inside diameter of the outer strake of plating of the cylindrical shell measured in inches.

The Factor of Safety shall in no case be less than 4.

The actual Factor of Safety in each case may be found from the equation : —

$F = 1{\cdot}4 \times C \times \frac{t}{t-2}$ with the best form of joint and least co-efficient (C) the Factor of Safety for shell plates, ½ inch to 1¼ inches in thickness, varies from 5·13 to 3·99.

An addition of 10 per cent. shall be made to the appropriate co-efficient for shells of boilers in which the longitudinal seams are lap jointed and are not accessible to close visual inspection and for shell plates of externally fired boilers exposed to the direct impact of furnace flame ; provided that this addition shall not apply to the steam and water drums of water tube boilers where the drums are not close to the fire-grate and there are tubes between the fire-grate and the drum.

(*b*) The above co-efficients are standard and shall be used only for boilers open to inspection by an Inspecting Officer during the whole period of construction and which are certified by him as having been constructed in accordance with the Standard Conditions laid down in these Regulations.

46. Boiler shells not in accordance with standard conditions.—When the standard conditions are not complied with, additions to the appropriate co-efficient as defined in the preceding regulation, shall be made as follows :—

(*a*) When there are no proofs of tests of steel, 15 per cent. of the standard co-efficient

(*b*) When a boiler has not been inspected during construction by an Inspecting Officer and certified by him, 10 per cent. of the standard co-efficient.

(*c*) When the workmanship is in any way doubtful and the Inspector is not satisfied that any of the foregoing additions to the co-efficient would be sufficient to meet the circumstances, such percentage of the standard co-efficient, as the Chief Inspector deems fit.

47. Cylindrical Shells.—(*a*) Shell plates shall not be less than ¼ inch in thickness.

(*b*) Cylindrical shells shall be as truly cylindrical as practicable.

(*c*) Welded end, or other circumferential seams, shall not be accepted, provided that in small wagon boilers and the like the fire-hole mouthpiece may be welded to the shell.

48. Position of Longitudinal Seams.—Each ring of plate forming the shell, barrel or drum shall, where practicable, be one piece and have its longitudinal seam well out of line with those of the adjoining rings. In Lancashire, Cornish, and other types of boilers, where parts of the shell are exposed to flame, the longitudinal seams shall be in the steam space, arranged alternately on each side of the crown and clear of the brick work.

49. Riveting of End Seams.—The riveting of the seams joining the end plates to the cylindrical shell shall be not less in strength than the 38 per cent. of the solid plate.

50. Other Circumferential Seams.—The circumferential seams joining the rings of shell plates shall have strength of joint not less than 50 per cent. of that of the longitudinal seam, and not less than that required of the end seams.

51. Welded Shell Plates.—Welded longitudinal seams in boiler shells shall not be passed, unless the weld is covered by a butt strap or straps securely riveted to the shell. For small steam domes where the welding is done by hammer and the plates do not exceed ½ inch in thickness the straps may be omitted. The strength of the weld shall be assumed to be 50 per cent. of that of the solid plate. The thickness of a single strap or combined thickness of double straps shall not be less than the thickness of the shell plate.

52. Butt Ends of Shell Rings.—The ends of shell plate rings where butted shall be given the same curvature as the rest of the ring. The setting shall not be done by hammering.

53. Butt straps.—Butt straps shall be cut from plates and not from rolled strip. They shall be bent in the rolls or pressed to the required curve. Thinning of the ends of butt straps which tuck under the shell rings shall be done by machine and not by heating and hammering.

54. Methods of calculating the strength of riveted joints.—(*i*) The percentage of strength of a riveted joint (J) shall be found from the following formulæ (*a*), (*b*), (*c*): (*a*) and (*b*) are applicable to any ordinary type of joint; (*c*) is applicable only to that type of joint in which the number of rivets in the inner rows is double that of the outer row. The lowest value given by the application of these formulæ is to be taken as the percentage of strength of the joint compared with solid plate.

$$(a)\ \frac{100\,(P - D)}{P} = \text{Plate percentage} \quad \ldots \quad \ldots \quad \text{Eqn. (2)}$$

$$(b)\ \frac{100 \times A \times N \times C \times S_1}{P \times T \times S} = \text{Rivet percentage} \quad \ldots \quad \text{Eqn. (3)}$$

$$(c)\ \frac{100\,(P - 2\,D)}{P} + \frac{100 \times A \times C \times S_1}{P \times T \times S} = \text{Combined plate and rivet percentage} \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (4)}$$

P is the pitch of rivets at outer row in inches,

D is the diameter of rivet holes in inches,

A is the sectional area of one rivet hole in square inches,

N is the number of rivets per pitch, (P),

T is the thickness of plate in inches,

C = 1 for rivets in single shear as in lap joints, and 1·875 for rivets in double shear as in double butt strapped joints,

S_1 is the shearing strength of rivets, which is taken generally to be 23 tons per square inch for steel and 18 tons per square inch for iron, and may, in each case, be 85 per cent. of the minimum tensile breaking strength of the rivet bars,

S is the minimum tensile breaking strength of shell plates in tons per square inch or whatever strength is allowed under Regulation 5 of Chapter I.

In the first formula (*a*) D is the diameter of the rivet holes in the outer rows and in the third formula D is the diameter of the rivet holes in the next rows. In the last formula A is the area of one rivet hole in the outer row.

(*ii*) When the sectional area of the rivet holes is not the same in all rows, and when some of the rivets are in double shear and others in single shear, the rivet sections per pitch of each size or shear shall be computed separately and added together to form the total rivet section.

55. When Pitch exceeds maximum allowed.—Should the pitch of the rivets exceed the maximum pitch allowed, the permissible pitch shall be used in place of the actual pitch in determining the percentage of plate section, and in such circumstances no greater percentage than 85 shall be allowed for any type of joint.

56. Butt Straps and spacing of rivets below requirements.—Should the spacing of the rows of rivets or the distance between edge of plate and rivet hole, or the thickness of butt straps be less than is specified in Regulations, 59, 60 and 61 the percentage representing the strength of joint shall be modified as prescribed in those regulations.

57. Percentage of Welded and Strapped Seams.—In determining the percentage of strength of a welded seam covered by a strap or straps the formulæ and allowances in Regulations 54, 55 and 56 shall be applied, but 50 per cent. shall be added to the rivet percentage for the weld.

58. Percentage to be allowed for Solid Rolled Shells.—When small shells are rolled from the solid, J in equation (1) shall be taken as 95 per cent.

59. Thickness of Butt Straps.—The minimum thickness of butt straps for the longitudinal seams of cylindrical shells shall be determined by the following formulæ, but all straps should be of sufficient thickness to permit of efficient caulking, and in any case shall not be less than $\frac{1}{4}$ inch in thickness.

Single butt straps having ordinary riveting :—

$$1{\cdot}125\ T = T_1 \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (5)}$$

Single butt straps having every alternate rivet in the outter rows omitted :—

$$1{\cdot}125\ T \times \frac{(P-D)}{(P-2\ D)} = T_1 \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (6)}$$

Double butt straps of equal width having ordinary riveting :—

$${\cdot}625\ T = T_1 \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (7)}$$

Double butt straps of equal width having every alternate rivet in the outer rows omitted :—

$${\cdot}625\ T \times \frac{(P-D)}{(P-2\ D)} = T_1 \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (8)}$$

Double butt straps of unequal width having ordinary riveting :—

$${\cdot}75\ T = T_1 \text{ (wide strap)} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (9)}$$

$${\cdot}625\ T = T_1 \text{ (narrow strap)} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (10)}$$

Double butt straps of unequal width having every alternate rivet in the outer rows omitted :—

$${\cdot}75\ T \times \frac{(P-D)}{(P-2D)} = T_1 \text{ (wide strap)} \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (11)}$$

$${\cdot}625\ T \times \frac{(P-D)}{(P-2D)} = T_1 \text{ (narrow strap)} \quad \ldots \quad \ldots \quad \text{(Eqn. 12)}$$

T_T is the thickness of the butt straps in inches. The other symbols have the same significance as in Regulation 54.

Single and wide butt straps shall, wherever practicable, be on the inside of the shell.

Should the thickness of butt straps be less than that above described, the least percentage of joint as determined under Regulation 54 shall be reduced in the proportion of the actual thickness to the prescribed thickness.

60. Maximum Pitch of Rivets in longitudal joints.—The maximum pitch of the rivets in the longitudal joints of boiler shells shall be :—

C × T + 1·625 = maximum pitch in inches ... ... Eqn. (13)

T is the thickness of the shell plate in inches.

C is a co-efficient as given in the following table :—

Number of Rivets per pitch.	Co-efficients for Lap Joints.	Co-efficients for single butt-strapped joints.	Co-efficients for double Butt-strapped joints.
1	1·31	1·53	1·75
2	2·62	3·06	3·50
3	3·47	4·05	4·62
4	4·14	...	5·52
5	...	...	6·00

61. Spacing of rows of rivets.

(*a*) In joints, whether lapped or fitted with butt straps, in which there are more than one row of rivets and in which there is an equal number of rivets in each row, the distance between the rows of rivets shall be not less than—

Zig-zag riveting,

·33 P + ·67D = distance between centre lines of rows (R) ... Eqn. (14)

Chain riveting,

2D = distance between centre lines of rows (R) ... ... Eqn. (15)

(*b*) In joints in which the number of rivets in the outer rows is one-half of the number in each of the inner rows, and in which the inner rows are chain riveted, the distance between the outer rows and the next rows shall be not less than as required by equations (14) and (15) whichever is the greater, and the distance between the rows in which there are the full number of rivets shall be not less than 2 D (R_1).

(*c*) In joints in which the number of rivets in the outer rows is one-half of the number in each of the inner rows, and in which the inner rows are zig-zag, the distance between the outer rows and the next rows shall be not less than—

·2P + 1·15 D = distance between centre lines of outer and next rows (R) ... ... Eqn. (16)

(*d*) The distance between the rows in which there are the full number of rivets shall be not less than—

·165 P + ·67 D = distance between centre lines of inner rows (R_1) ... Eqn. (17)

P is the pitch of the rivets in the outer rows,

D is the diameter of the rivet holes in inches or the mean of the diameters of rivet holes when the distance to be determined is between two rows of rivets of different diameters.

(*e*) Should the distance between rows of rivets be less than as prescribed above, the plate percentage determined by equation (2) shall be modified thus—

$$\frac{100\left[P-\left(2-\frac{\text{actual distance}}{\text{prescribed distance}}D\right)\right]}{P} = \text{distance of rows}$$

percentage ... ... Eqn. (18)

(*f*) In all cases the clear space between a rivet hole and the edge of a plate shall not be less than the diameter of the rivet holes, *i.e.*, the centre of the rivet hole shall be at least 1½ diameters distance from the edge of the plate (E)—

Provided that, if this condition be not observed, the strength value of the rivets affected shall be reduced in the proportion of the actual distance between the outer edge of the rivets and the edge of the plate to the prescribed distance.

HEMISPHERICAL AND DISHED END PLATES.

62. Complete hemisphere without stays or other support made of one or more plates and subject to internal pressure.—The maximum working pressure shall be determined by the following formula :—

$$\text{W. P.} = \frac{(t-2) \times S \times J}{C \times R} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (19)}$$

W. P. is the working pressure in lbs. per square inch,
t is the thickness of the end plates in 32nds of an inch,
S is the minimum tensile breaking strength of the end plates in tons per square inch, or whatever strength is allowed for them,
J is the least percentage of strength of the riveted joints of the plates forming the hemisphere or securing it to the cylindrical shell,
R is the inner radius of curvature in inches,
C for single riveting is 3·3,
C for double riveting is 2·9,
C for treble riveting is 2·83.

63. Dished ends subject to internal pressure.—(*a*) For unstayed ends of steam and water drums, tops of vertical boilers, etc., when dished to partial spherical form, the maximum working pressure shall be determined by the following formula—

$$\text{W. P.} = \frac{15 \times S \times (t-1)}{R} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (20)}$$

W. P. is the working pressure in lbs. per square inch,
t is the thickness of end plates in 32nds of an inch,
R is the inner radius of curvature of the end in inches, which shall not exceed the diameter of the shell to which it is attached.
S is the minimum tensile breaking strength of plate in tons per square inch, or whatever is allowed for it.

(*b*) The inside radius of curvature at the flange shall be not less than 4 times the thickness of the end plate, and in no case less than 2½ inches.

When the end has a manhole in it, $\frac{4}{32}$nds shall be added to the thickness of the plate in the formula.

(*c*) The total depth of flange of manhole from the outer surface in inches shall be at least equal to—

$$\sqrt{T \times W} = \text{depth of flange in inches} \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (21)}$$

where T is the thickness of the plate in inches and W is the minor axis of the hole in inches.

64. Dished ends subject to external Pressure.—In the case of unstayed dished ends, for the co-efficient 15 in equation (20) the co-efficient 12 shall be substituted, and R shall be the outer radius of curvature of plate. For plates exposed to furnace flame the co-efficient shall be 10·5.

65. Dished ends of Lancashire and Cornish type Boilers.—(*a*) For dished ends of Lancashire and Cornish boilers with external or internal flanges for furnaces formed in one piece, without stays and subject to internal pressure, the maximum working pressure shall be determined by the following formula :—

$$\text{W. P.} = \frac{22 \times S \times (t-1)}{R} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (22)}$$

W.P. is the working pressure in lbs. per square inch,
t is the thickness of the end plate in 32nds of an inch,
R is the inner radius of curvature of the end in inches which shall not exceed one and a half times the internal diameter of the shell to which it is attached,
S is the minimum tensile breaking strength of the plate in tons per square inch, or whatever is allowed for it.

(*b*) The inside radius of curvature at the flange shall be not less than 4 times the thickness of the plate and in no case less than 3½ inches. When the end plate has a manhole in it the total depth of the flange of manhole from the outer surface in inches shall be at least equal to—

$$\sqrt{T \times W} = \text{depth of flange in inches} \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (23)}$$

where T is the thickness of the plate in inches and W is the minor axis of the hole in inches.

66. Dished shell and fire-box crowns.—(*a*) In determining pressure in accordance with these Regulations, no account shall be taken of the influence of the uptake tube in vertical boilers. If dished crown plates having uptakes are fit for higher pressure, when considered as flat plates, such higher pressure shall be allowed.

(*b*) The radius R of the dished part may be found as follows—

$$R = \frac{C^2 + H^2}{2H} \quad \text{... ... ... Eqn. (24)}$$

C and H are the lengths in inches of half the base line or chord on which H is measured and the height at the dish or camber at the middle of the chord respectively.

FLAT PLATES.

67. Flat plates supported by solid screwed stays, marginal seams or flanges.—(*a*) For plain flat plates supported by solid screwed stays or riveted marginal seams or flanges, the maximum working pressure shall be as follows:—

$$W.P. = \frac{C\,(t-1)^2}{A^2 + B^2} \quad \text{... ... ... Eqn. (25)}$$

In this formula and in those following in the succeeding Regulations relating to "Flat Plates" unless otherwise specified—

W.P. is the working pressure in lbs. per square inch,

t is the thickness of the flat plate in 32nds of an inch,

t_1 is the thickness of the washers, strips, or doublings employed, in 32nds of an inch,

A is the distance apart of the rows of stays in inches,

B is the pitch of the stays in the rows in inches,

C is a co-efficient which varies in value with the method of fixing the stays and nature of the support.

Where the plates are exposed to the direct impact of flame the following values of C are to be reduced 12½ per cent.—

C = 60 for stays screwed into the plate with their ends riveted over,

C = 90 for stays screwed into the plate and fitted with nuts on the outside,

C = 100 for stays passed through the plate and fitted with nuts inside and outside,

C = 110 for a riveted seam or flange in the flat plate securing it to the shell, side plate, end plate, furnace or uptake.

The support of a riveted seam shall be assumed to be at the line through the centres of rivets in the nearest row and of a flange at the commencement of curvature. In the latter case, if the inner radius or curvature of the flange exceeds 2½ times the thickness of the plate, the support shall be assumed to be at a distance of 2½ times the thickness of the plate from the inner side of the flange.

(*b*) Where portions of plate are supported by stays or riveted seams or flanges having various values of support, the value of C shall be taken as the mean of the points of support concerned.

(*c*) For portions of plate where the stays are irregularly pitched D^2 shall be used instead of A^2+B^2, D being the diameter of the largest circle which can be drawn passing through not less than three points of support, viz., the centres of stays, or rivets or the commencement of the curvature of flanging, whichever is applicable.

(*d*) For the tops and sides of combustion chambers and fire-boxes the distance between the rows of stays nearest to the back tube plate, or the back or firehole plate respectively, and the commencement of curvature of these plates at their flanges, shall not be greater than A.

(*e*) For the tops of combustion chambers and fire-boxes where they are joined to the sides by curved portions, if the outer radius of the curved portion is less than half the allowable distance between the girders, the distance between the first girder and the inner surface of the side plates shall not exceed the allowable distance between the girders. If the radius of curvature is greater than half the allowable distance between the girders, the width of the flat portion measured from the centre of the girder shall not be more than half the allowable distance between the girders.

68. Flat plates supported by stays and nuts and large washers or strips or doublings.—(*a*) Where the plates are supported by stays passing through them and are fitted with nuts inside and washers and nuts outside, the diameter of the washers being at least 3½ times that of the stay, and their thickness at least two-thirds that of the plate, but not greater than that of the plate, the maximum working pressure shall be:—

$$W.P. = \frac{100}{A^2 + B^2}\left[(t-1)^2 + \cdot 15t_1^2\right] \quad \text{... ... ... Eqn. (26)}$$

(*b*) Where the washers have a diameter of at least two-thirds of the pitch of the stays and a thickness of at least two-thirds of the thickness of the plate, but not greater

than that of the plate, and are riveted to the plate in an efficient manner, the maximum working pressure shall be :

$$\text{W. P.} = \frac{100}{A^2 + B^2} [(t-1)^2 + \cdot 35t_1^2] \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (27)}$$

(*c*) Where the plate is stiffened by strips at least two-thirds of the pitch of the stays in breadth which have a thickness of at least two-thirds of that of the plate, but not greater than that of the plate, and are riveted to the plate in an efficient manner, the maximum working pressure shall be :—

$$\text{W. P.} = \frac{100}{A^2 + B^2} [(t-1)^2 + \cdot 55t_1^2] \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (28)}$$

(*d*) Where the plates are fitted with doubling plates having a thickness of at least two-thirds of that of the plate but not greater than that of the plate, and are riveted to them in an efficient manner, the maximum working pressure shall be :

$$\text{W. P.} = \frac{100}{A^2 + B^2} [(t-1)^2 + \cdot 85t_1^2] \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (29)}$$

69. Flat tube plates.—(*a*) For the portions of tube plates in the nests of tubes where stay tubes are required (see Regulation 97) and where the minimum thickness and cross section of tube plate are not less than as prescribed in Regulation 98, the maximum working pressure shall be :—

$$\text{W. P.} = \frac{C(t-1)^2}{P^2} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (30)}$$

P is the mean pitch of the stay tubes supporting any portion of the plate (being the sum of the four sides of the quadrilateral divided by four).

C=70 for stay tubes screwed and expanded into the plate and no nuts are fitted.

C=85 for stay tubes screwed and expanded into the plate and fitted with nuts.

(*b*) No nuts shall be fitted to stay tubes at the combustion chamber or fire-box end.

(*c*) Where the plates are exposed to the direct impact of flame, the co-efficient C shall be reduced by 12½ per cent., and where the thickness or cross section of tube plate between tubes is less than as prescribed in Regulation 98 the appropriate co-efficient shall be reduced in proportion to the deficit.

(*d*) For the wide water spaces of tube plates between the nests of tubes, and between the wing rows of tubes and the shell, the maximum working pressure shall be :—

$$\text{W. P.} = \frac{C}{A^2 + B^2} [(t-1)^2 + \cdot 55t_1^2] \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (31)}$$

A is the horizontal pitch of stay tubes in inches measured across the wide water space from centre to centre,

B is the vertical pitch of stay tubes in the bounding rows in inches measured from centre to centre,

C=60 for stay tubes screwed and expanded into the tube plates and no nuts are fitted.

C=80 for stay tubes screwed and expanded into the tube plates and fitted with nuts.

C=70 for stay tubes screwed and expanded into the tube plates and nuts are fitted only to alternate stay tubes.

t is the thickness of the flat plate in 32nds of an inch,

t_1 is the thickness of the washers, strips or doublings employed in 32nds of an inch.

(*e*) Where the plates are exposed to the direct impact of flame, the co-efficient C shall be reduced 12½ per cent.

70. Plates supported by gusset stays.—(*a*) For the end plates of Lancashire, Cornish, Vertical and Locotype boilers, and other flat surfaces supported by irregularly pitched gusset stays, the maximum working pressure shall be :—

$$\text{W. P.} = \frac{C(t-1)^2}{D^2} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (32).}$$

D is the diameter of the largest circle which can be drawn passing through not less than three points of support, viz., the centre lines of rivets or the commencement of the curvature of flanging, whichever is applicable,

C=100 for plates not exposed to flame,

C=88 for plates exposed to flame.

(*b*) Where such plates are stiffened by suitable tee or angle bars securely riveted to the plates within the circle D, the appropriate co-efficient may be increased thirty per cent. Such stiffening bars should be placed so as to transmit their load in a direct manner to the gusset stays or shell plate.

(*c*) For the part of the end plate containing the manhole in Lancashire boilers, the maximum working pressure shall be :—

$$\text{W. P.} = \frac{C}{D^2}[(t-1)^2 + (t_1-1)^2] \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (33)}$$

D is the diameter of the largest circle which can be drawn enclosing the manhole and passing through the centres of the rivets in end plates connecting the shell and gusset angles and furnaces, or to the commencement of curvature of flanging, whichever is applicable,

t is the thickness of the end plate in 32nds of an inch,

t_1 is the thickness of the base of the mouthpiece or flat ring in 32nds of an inch,

C=90 where the manhole mouthpiece is either of mild or cast steel, and has a turned-in flange of the depth, measured from inside of end plate, of not less than 4 times the thickness of the end plate, and a thickness not less than the thickness of the end plate,

C=70 where only a flat steel compensating ring is fitted,

C is to be taken as the mean of the points of support through which circle passes in accordance with Regulation 67 where there is no mouthpiece or flat ring and the end plate is flanged around the manhole to the depth required in Regulation 71.

71. Flanged manholes and mudholes in the flat plates.—Where a flat plate is flanged to stiffen it at a manhole or sight hole, to permit the same working pressure as would be allowed upon an unpierced plate, the depth of the flange measured from the outer surface shall be at least equal to—

$$\sqrt{T \times W} = \text{depth of flange in inches} \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (34)}$$

where T is the thickness of the plate in inches, and W is the minor axis of the hole in inches.

72. Flat crown plates of vertical boilers.—For the flat crown plates of vertical boilers either with or without bolt stays, equation (32) shall be used in determining the working pressure with C=80, when the plates are not exposed to flame, and 70, when they are exposed to flame. In this case D is the diameter of the largest circle that can be drawn passing through the centres of the rivets or bolt stays when fitted, or the commencement of the curvature of the flanging, whichever is applicable. Where bolt stays are fitted with washers of the same thickness as the plate securely riverted thereto, the circle shall pass through the centres of the washer rivets, but where the washers are not riveted or where none are fitted the circle shall pass through the centres of the stays. Where the crown plate is flanged the inside radius of curvature at the flange shall not be less than 4 times the thickness of the end plate.

73. Circular flat ends of drums, etc., supported only at edges.—For these ends C in equation (32) shall be taken as 140 when the plates are not exposed to flame, and 122·5 when they are exposed to flame. In this case the circle D of largest diameter shall pass through the centres of rivets or bolts securing the end to the shell or, where the end is flanged, through the commencement of curvature.

Where flanged the inside radius of curvature at the flange shall not be less than 4 times the thickness of the end plate.

74. Bar or bulb stiffened end plates and smokebox tube plates of locotype boilers.—Where such plates instead of being supported by stays are stiffened in the steam space by substantial tee or angle bars securely riveted to the plate and extending across the plate to within the margin allowed by equation (35), or where such plates are formed with a deep bulb extending across the plate to well within margin allowed, for the support thus given,

C shall be taken as equal to 80 and 70 for plates not exposed, and exposed, to flame respectively. The margin or pitch for such stiffening shall be measured from the centre line of rivets or commencement of curvature of bulb provided it is not more than 2 inches from the centre line of bulb.

For the flat plate above the stiffener or bulb, C shall be taken as the mean of the values appropriate for the points of support.

75. Flat plate margins.—The amount of support in relief of stays which may be credited to the sides of shells, furnaces, uptakes, fireholes and foundation rings, etc., to which flat plates are attached shall not exceed that found by the following formula :—

$$\frac{1}{3} \times \frac{\sqrt{C\ (t-1)^3}}{W.P.} = \text{width of margin in inches} \quad \ldots \quad \ldots \text{ Eqn. (35)}$$

W.P. is the intended working pressure in lbs. per square inch,
C=110 for plates not exposed to the direct impact of flame,
C=96 for plates exposed to the direct impact of flame.

Where the plates are flanged the margin shall be measured from the commencement of curvature or from a line 2½ times the thickness of the plate distant from the side of the flange next the inner radius of corner, whichever is less. In other cases the margin shall be measured from the centre line of rivets in the nearest row of the seam by which the flat plate is attached.

STAYS.

76. Solid screwed stays.—For screw stays to combustion chambers and fireboxes and for longitudinal and cross stays, the maximum working pressure for the stays is to be calculated from the appropriate one of the following two formulæ :—

$$W.P. = \frac{C}{A}\left(D-\frac{1{\cdot}28}{N}\right)^2 \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (36)}$$

$$W.P. = \frac{C \times D_1^2}{A} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (37)}$$

W.P. is the working pressure in lbs. per square inch,

D is the diameter of stay over threads in inches,

D_1 is the diameter of body of stay at its smallest part in inches,

N is the number of threads of stay per inch,

A is the area in square inches supported by one stay,

C=7100 for steel or special wrought iron screw stays to combustion chambers or fireboxes,

C=7500 for steel longitudinal or cross stays fitted with nuts,

C=4700 for copper screw stays to fireboxes.

Where stays are made with enlarged ends and the body of the stay is smaller in diameter than at the bottom of the thread the working pressure shall be calculated from the second formula.

77. Screw stays in water spaces.—Where the stays are not fitted with nuts, the ends shall be riveted over to form good substantial heads.

78. Longitudinal stays.—Longitudinal and similar solid screwed stays shall be efficiently secured with nuts at each end and not merely riveted over. Where they are over 12 feet in length, they shall be supported at or near the middle of their length.

79. Jointed stays.—Where jointed longitudinal stays are fitted, they shall, where practicable, be fitted with pins having an effective sectional area 25 per cent. in excess of that of the stay. If the pins are slack in the holes, the total slackness shall not be more than 1-16 inch. The pins shall be as close as possible to the shoulder of the eye forging. The shoulder of the forging shall be at least ½ inch wide all round, *i.e.*, the diameter at the shoulder shall be not less than the diameter of the hole plus 1 inch.

80. Diagonal bar or rod stays.—The sectional area of a diagonal rod or bar stay shall bear the same proportion to that of a direct stay as the length of the diagonal stay bears to the length of the perpendicular line from the end of the diagonal stay to the surface supported. The ends of diagonal stays shall not be bent, but shall be attached to the plate with bevelled washers and nuts or with riveted tee blocks or angles and shackle pins (see Regulation 79 for eyes and pins).

81. Stresses in steel jointed stays.—(*a*) The section of least strength whether of stay, rivets, shackle or pin shall be used in calculating the working pressure for the stay. For parts in tension a stress of 9000 lbs. per square inch of net section shall be allowed, and for parts in shear a stress of 8000 lbs. per square inch of net section.

(*b*) Parts in double shear shall be allowed a section of 1¾ times the single section.

82. Forged stays.—(*a*) No steel stays shall be welded. If plus threads are desired, the ends of the stay bars may be upset or the bars may be drawn down in the middle portions from bars originally of the size of the ends.

(*b*) Iron stays may be welded but the stress allowed on a welded stay shall not exceed 5000 lbs. per square inch of net section.

(*c*) Stays which have been fireworked shall be annealed.

83. Stay nuts.—(*a*) Nuts to screw stays in combustion chambers and fireboxes shall not be less than $\frac{7}{16}$ inch thick for stays up to 1$\frac{1}{4}$ inches diameter over threads, $\frac{1}{2}$ inch thick for 1$\frac{5}{16}$ and 1$\frac{3}{8}$ inch stays, 1 inch thick for 1$\frac{7}{8}$ and 2 inch stays and 1$\frac{1}{8}$ inch thick for stays over 2-inch in diameter.

(*b*) The nuts for longitudinal stays shall be not less than the thickness laid down in the British Engineering Standards Association Specification appropriate to the diameters of the stays, the outside nut having the thickness therein prescribed for ordinary nuts, and the inside nut having the thickness provided for lock nuts.

(*c*) The nuts shall be made of solid mild steel or of iron which shall be without weld if exposed to flame.

84. Stay tubes.—For stay tubes, whether of wrought iron or of solid drawn or lap-welded steel, the maximum working pressure shall be calculated from the following formula :—

$$W.P. = \frac{5900}{A}\left[\left(D - \frac{1{\cdot}28}{N}\right)^2 - D_1^2\right] \quad \ldots \quad \ldots \quad \text{Eqn. (38)}$$

D is the diameter of the tube over threads in inches,

D_1 is the internal diameter of the tube under the threads in inches,

N is the number of threads of stay per inch,

A is the area in square inches supported by one stay tube, measured from centre to centre of stay tubes. When the area contains tubes or parts of tubes their aggregate area, calculated from their smallest external diameter of body when in tension and smallest internal diameter when in compression, shall be deducted from the area of the containing figure and the remainder used as A in the formula.

85. Screw Threads of stay tubes.—Stay tubes shall be screwed at both ends with continuous threads, and the holes in the tube plates shall be tapped with continuous threads. The pitch of the threads shall not be finer than 11 threads per inch. The stay tubes shall be expanded by roller expanders and not made tight by caulking only.

86. Minimum thickness of stay tubes.—The minimum thickness of stay tubes in the body or at the ends under threads shall not be less than 5-32nds of an inch.

87. Thickened ends of stay tubes.—If stay tubes are required to have their thickness increased at the screwed ends so that the thickness at the bottom of thread is approximately the same as in the body of the tube, the thickening shall be attained by upsetting and not by any welding process, and the tubes shall be annealed after the upsetting.

88. Stays in tension and compression.—(*a*) The same stress shall be allowed in compression as in tension. The strength of short stays in compression and not liable to bending may be calculated on the net section of the stay at bottom of thread or in body, whichever is less.

(*b*) The stress to be allowed on any stay or part of a stay not provided for in the foregoing shall be the same as that allowed for stays or parts of stays of approximately like kind in similar conditions.

89. Measurements of stayed areas in the end plates of Locotype and vertical boilers.—When the areas supported by stays are semi-circular as in the upper parts of end plates and smokebox tube plates of locotype boilers, or annular as in the crown plates of vertical type boilers A, the area to be supported by stays, shall, in the first case, be the area of the plate contained within the margins credited to casing or barrel sides, screw stays, fire door ring or tubes stays as the case may be, and in the second case be the area of the annulus between the margins credited to uptake and shell. When bolt staying is necessary, the stays shall be properly distributed ; the aggregate stay section shall then be used in the formula for calculating the working pressure.

90. Gusset stays.—Gusset stays shall be attached to end and shell plates by double angles, not less in thickness than the gusset plates with properly spaced and formed rivets. The maximum working pressure for the stay when of ordinary form shall be calculated by the following formula :—

$$W.P. = \frac{8500 \times C}{A} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (39)}$$

C, the co-efficient, is the number representing the least of the following :—

(1) $N_1 \times A_1$.

(2) $N_2 \times A_2 \times 1{\cdot}75$.

(3) $N_3 \times A_3 \times 1{\cdot}75$.

(4) $N_4 \times A_4$.

(5) $(G - N_2 \times D_2) \times (t - 2) \times {\cdot}037$.

(6) $(G_1 - D_3) \times (t - 2) \times {\cdot}037$.

N_1, N_2, N_3 N_4, D_1, D_2, D_3, D_4, and A_1, A_2, A_3, A_4, are respectively the numbers, diameters and sectional areas of the rivets in the joints of each gusset stay, the order of the joints being (1), angles to end plate, (2), end plate angles to gusset, (3), shell angles to gusset, and (4), angles to shell,

G is the depth in inches of gusset plate measured through the line of rivets attaching it to the end plate angles,

G_1 is the depth in inches of gusset plate measured normal to the slant edge of plate through the rivet nearest to the end plate in the joint attaching gusset plate to shell angles,

t is the thickness of the gusset plate in 32nds of an inch,

A is the area in inches of flat plate supported by the gusset stay which, in the case of Lancashire and Cornish boilers, shall be determined as follows :—

(*i*) The margins allowed under flat plate regulations for shell and furnace shall be marked on end plates and the lengths of the centre lines of gussets between them measured, also the distance between each pair of gusset lines from the middle of the smaller in a direction normal to the greater. If L and L_1 be the lengths of two adjacent gusset lines and if the distance between them be W, the area contained by the gusset lines and the shell and furnace margin lines may be apportioned between the stays thus :—

$\frac{W(3L + L_1)}{8}$ = Portion of area in square inches apportioned to L line gusset ... ... Eqn. (40)

$\frac{W(3L_1 + L)}{8}$ = Portion of area in square inches apportioned to L_1 line gusset ... ... Eqn. (41)

(*ii*) The portion of the area on the other side of each gusset line shall, except when of triangular form, be found in like manner and its amount added to that already found to form the total.

(*iii*) For the triangular portions in the wing spaces the area shall be taken as half the product of the length of gusset line into the perpendicular distance between it and the intersecting point where the marginal curves meet.

91. Bolts and Studs.—(*a*) Bolts and studs connecting parts of boilers such as shell, end plates, tube plates, furnaces, uptakes, externally fitted manhole covers, etc., may be made either of steel or good quality wrought iron. For bolts and studs of flanges connecting mountings to boilers *see* Regulation 137.

(*b*) The maximum working pressure for the bolts or studs shall be calculated by the following formula :—

$$W.P. = \frac{N \times C}{A}\left(D - \frac{1{\cdot}28}{n}\right)^2 \quad \text{... ... ... Eqn. (42)}$$

D is the diameter of bolt or stud over threads in inches,

N is the number of bolts or studs securing the part,

n is the number of threads of screw per inch,

C = 4700 for steel bolts or studs where the diameter over threads is less than $\frac{3}{4}$ inch,

C = 5600 for steel bolts or studs where the diameter over threads is not less than $\frac{3}{4}$ and not greater than $\frac{7}{8}$ inch.

C = 7000 for steel bolts or studs where the diameter over threads is greater than $\frac{7}{8}$ inch.

When the material is iron, a reduction of 15 per cent. shall be made in the working pressure as calculated by the formula.

A is the area in square inches of the surface supported by the bolts or studs. For jointed flanges the area shall be taken to extend to midway between the pitch line of the bolts and the inner edge of the flange by which the part is secured.

FIREBOX AND COMBUSTION CHAMBER TOP SUPPORTS.

92. Girders supporting the tops of fireboxes and combustion chambers.—(*a*) For girders supporting the tops of fireboxes and combustion chambers the maximum working pressure shall be calculated from the appropriate one of the following two formulæ :—

(*i*) Solid or spilt girders of rectangular section supported at ends only :—

$$W.P. = \frac{C \times t \times D^2 \times S}{(L-P) \times D_1 \times L} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (43)}$$

(*ii*) Girders of I or other section supported at ends only :—

$$W.P. = \frac{C_1 \times S}{(L-P) \times D_1 \times L} \times \frac{I}{Y} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (44)}$$

t is the thickness of the girder at centre when a forging or casting, or the sum of the thicknesses of the plates where the girder is made of two plates, measured in 32nds of an inch,

D is the least depth of the girder at or near the middle in inches,

L is the distance in inches between the end or side plates which support the girders measured in the direction of the girders,

P is the pitch of the stays supported by the girder in inches,

D_1 is the distance apart of the girders, centre to centre, in inches,

S is the minimum tensile breaking strength of the plates forming the girder in tons per square inch, or whatever is allowed for them,

I is the moment of inertia of section round neutral axis expressed in inches,

Y is the distance in inches of the farther edge of section from neutral axis,

$C = \frac{N}{N+1} \times 21$, where the number of stays in each girder is odd,

and $\frac{N+1}{N+2} \times 21$, where the number of stays in each girder is even, N being the number of stays to each girder,

$C_1 = \frac{N}{N+1} \times 4030$, where the number of stays in each girder is odd,

and $\frac{N+1}{N+2} \times 4030$, where the number of stays in each girder is even, N being the number of stays to each girder.

(*b*) Where girders rest on end or side plates of fireboxes, etc., they shall be fitted and bedded directly to the edges and corners of the supporting plates.

(*c*) Where girders are supported in any other way than by the end or side plates of the firebox or combustion chamber, the calculations for determining the working pressure shall be made in accordance with the actual conditions of support.

In such cases the length of the strip of firebox or combustion chamber top plate to be supported by the girder shall, subject to the limit imposed on the distance of the nearest stay, be taken as equal to the product of the number of bolts carried by the girder into the pitch of the bolts. A maximum nominal stress of 14,000 lbs. per square inch on girder section shall be allowed for steel.

(*d*) Slings, links, pins, rivets and connections to shell of slung girders shall be sufficient to carry the whole load that would otherwise be carried by the girder, and each girder must be equally slung or supported.

(*e*) In the case of girders supported at the ends only by angle bars riveted to the casing crown, the length L may, when the girder extends over the full breadth of the angle face, be taken as the distance between the centres of the angle faces. When this distance does not exceed that of L in the formula, the pressure shall be determined in the ordinary way. The supporting angles and rivets shall of be sufficient section for the intended purpose.

93. Design of girders generally.—In dealing with girders generally the following principles shall be observed :—

(*a*) each girder shall be of sufficient strength to support its share of the load on the roof plate independently of the roof plate;

(*b*) the depth D and the thickness t to be used in calculation shall be respectively the effective depth and thickness at or near the middle of the length; projections which do not add to the longitudinal strength shall be disregarded;

(*c*) girders shall be properly attached to the roof plate by bolts or screws.

94. Spacing of end stays.—Allowance for curves, etc.—(*a*) For the tops of fireboxes and combustion chambers, the distance between the rows of stays nearest to the tube plate or firehole plate or back plate as the case may be, and the commencement of curvature of these plates at their flanges shall not be greater than A in the flat plate Regulation.

(*b*) Where the tops are joined to the sides by curved portions, if the outer radius of the curved portion is less than half the allowable distance between the girders, the distance between the first girder and the inner surface of the side plate shall not exceed the allowable distance between the girders. If the radius of the curved portion is greater than half the allowable distance between the girders, the width of the flat portion measured from the centre of the girder shall not be more than half the allowable distance between the girders. The working pressure for the supporting bolts and for the plate between them shall be determined in the ordinary way.

95. Cambered firebox tops.—For Messrs. Marshall Sons and Company's patent stayless roof for fireboxes of locotype boilers made of steel in which the centre lines of the corrugations meet the centre lines of the end riveted seams at points not farther distant from the side plates than one half the inner radius of curvature of the corner formed by the roof and side plate, in order to ensure that the thickness and height of the pressed diagonal corrugations of the camber are satisfactory, the working pressure shall not exceed the smaller of the values obtained from the following formulæ :—

$$W.P. = \frac{25000\,(t-1) \times H^2}{W \times L \times \sqrt{W^2 + L^2}} \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (45)}$$

$$W.P. = \frac{55\,(t-1)^3 \times (W + \sqrt{W^2 + L^2})^2}{W^3 \times L^3} \quad \ldots \quad \ldots \quad \text{Eqn. (46)}$$

t is the thickness of the roof plate in 32nds of an inch,
H is the height of the corrugation at its highest part measured perpendicularly on one side of the plate in inches,
W is the width of the roof plate between the flat of side plates at top less the inner radius of curvature of corner of roof and side plate in inches, *i.e.*, W + radius = internal width of firebox at top,
L is the length of the roof plate between centre lines of rivets in inches.

96. Corrugated firebox tops.—For Messrs. Richard Garrett and Son's corrugated stayless roof of fireboxes of locotype boilers made of steel in which the side corrugations are parts of true circles and the radius of the middle corrugation is not more than about $\frac{1}{4}$th of the radius of the outer corrugations and the corrugations are cambered longitudinally, the working pressure shall not exceed the smaller of the values obtained from the following formulæ :—

$$W.P. = \frac{C}{R} \times \frac{(t-1)^2}{(L + 24)} \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (47)}$$

$$W.P. = \frac{C_1}{R} \times [10\,(t-1) - L] \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (48)}$$

t is the thickness of the corrugated plate in 32nds of an inch,
L is the length of the roof plate between centre lines of rivets in inches,
R is the external radius of the side corrugations at the middle of the length in inches,
C = 363 where the roof and side plates are in one piece and 325 where they are riveted,
C_1 = 12·5 where the roof and side plates are in one piece and 11·25 where they are riveted.

TUBE PLATES.

97. Parts to be stayed.—(*a*) All flat tube plates, except those of locotype boilers and of other boilers in which the total gross area of surface occupied by tubes in any one plate, being the sum of one or more areas enclosed within lines touching the outsides of the outer rows of tubes, does not exceed 7 square feet, shall be stayed within the nests of tubes except as provided in Regulation 101.

(*b*) The parts of tube plates which lie outside the nests of tubes shall be stayed or supported wherever the size of the area of plate subject to steam pressure necessitates staying or support, either by marginal stay tubes or other means.

(*c*) Where stay tubes are required they shall be strong enough to support the load due to the steam pressure on the plate without taking account of any aid from the plain tubes contained in the areas.

(*d*) The stiffness of tube plates and pitch of stays within the nests of tubes where stay tubes are required and where marginal stay tubes are required in support of blank spaces adjacent to or between the nests shall be determined by flat plate rules under Regulation 69.

The requirements for stay tubes are specified in Regulations 84 to 88.

(*e*) Tube plates within the nests of tubes whether fitted with stay tubes or not shall comply with the requirements of Regulation 98 in regard to thickness and cross section between tubes.

98. Minimum thickness and cross section.—To provide a secure attachment for plain tubes in the tube plates the thickness and cross section of the plate between the tube holes shall not be less than :—

Steel tube plate,

·125 D + ·2 = minimum thickness in inches ... ... Eqn. (49)

·17 D + ·025 = minimum cross section in square inches ... Eqn. (50)

Copper tube plate,

·2 D + ·4 = minimum thickness in inches ... ... Eqn. (51)

·527 D − ·263 = minimum cross section in square inches ... Eqn. (52)

D is the diameter in inches of the tube at the part of attachment to tube plate.

99. Holding power of plain tubes.—(*a*) Where tube plates are not specially stayed in nests of tubes, the working pressure, based on the holding power of the tubes, shall not exceed that found by the following formula :—

$$\text{W. P.} = \frac{C \times D}{A} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (53)}$$

D is the diameter of tube at the part of attachment to tube plate in inches,

A is the area in square inches of tube plate supported by each tube, which generally may be taken as the product of the horizontal and vertical pitches of the tubes less the area of the tube itself,

= 470 for tubes expanded into parallel holes in steel or iron tube plates,

C = 530 for tubes expanded into taper holes in steel or iron tube plates.

For copper tube plates or copper or brass tubes, the appropriate co-efficient should be reduced 20 per cent

Where the thickness and cross section of the tube plates are less than the minimum prescribed in Regulation 98, the appropriate co-efficient shall be reduced in proportion to the deficit.

Where no stay tubes are fitted the tubes at the firebox end shall be beaded over or bellmouthed.

(*b*) In the unstayed tube plates of loco-type boilers and in other tube plates in which stay tubes are not required the support afforded by the plain tubes shall not be taken to extend beyond the lines enclosing the outer edges of the tubes. Parts of flat plate outside this line shall either lie in the plate margin or be separately supported. No account need be taken of the stiffness of tube plate in the nests of tubes when the above conditions are fulfilled.

Ordinarily the requirements of this clause are applicable only to expanded smoke and water tubes in flat continuous tube plates containing more than one row of tubes. See Regulation 102 for attachment of tubes of water tube boilers.

100. Tube plates, other than ends of vertical boilers forming parts of outer shell.—(*a*) When vertical boilers have a nest or nests of horizontal tubes so that there is direct tension on the tube plates due to the vertical load on the boiler ends, or to their acting as horizontal ties across the shell, the thickness of the tube plates and the spacing of the tubes shall be such that the section of metal taking the load is sufficient to keep the stress within that allowed on the shell plates.

(*b*) Each alternate tube in the outer vertical rows of tubes shall be a stay tube. The tube plates between the stay tubes shall be in accordance with the rules for tube plates and in addition, considered as part of shell, the maximum working pressure,—

$$\text{W. P.} = \frac{17{\cdot}24\ (t-2)}{R \times P} \times \frac{(P-D)}{P} \times S \quad \ldots \text{ Eqn. (54).}$$

t is the thickness of the tube plate in 32nds of an inch,

P is the vertical pitch of the tubes in inches,

D is the diameter of the tube holes in inches,

S is the minimum tensile breaking strength of the tube plates in tons per square inch, or whatever is allowed for them,

R is the radial distance of the centre of the outer row of tube holes from the axis of the shell in inches.

101. Curved tube plates of water tube boilers.—(*a*) For tube plates forming parts of cylindrical drums the maximum working pressure shall be :—

$$\text{W. P.} = \frac{33{\cdot}3\ (t - 4)}{D_1 \times P} \times \frac{(P - D)}{P} \times S \quad \ldots \quad \text{Eqn. (55)}$$

t is the thickness of tube plate in 32nds of an inch,
P is the pitch of tubes in inches in lines parallel with the axis of the drum,
D is the diameter of the tube holes in inches,
S is the minimum tensile breaking strength of the tube plate in tons per square inch, or whatever is allowed for it,
D_1 is the inside diameter of the drum in inches.

(*b*) Where the tube plates are reduced in thickness for the purpose of jointing either by lapping or by the fitting of butt straps or in order to receive the drum end flanges such reductions shall be gradual and be carefully machined to size.

102. Attachment of tubes of water tube boilers.—(*a*) All tubes shall be carefully drifted or roller expanded in the holes in the tube plates They shall project through the neck or bearing part in the holes by at least a quarter of an inch and be secured from drawing out by being bell mouthed at each end to the extent of 1-32nd inch for each inch in diameter *plus* 2-32nds inch.

(*b*) The tube holes in the tube plates of drums, pockets or headers shall be formed in such a way that the tubes can be effectively tightened in them. Where the tube ends are not normal to the tube plates, there shall be a neck or belt of parallel seating of at least ½ inch in depth measured in a plane through the axis of the tube at the holes.

(*c*) The tubes shall be arranged so that there is sufficient accessibility for cleaning them both internally and externally.

103. Compression of tube plates.—(*a*) For firebox or combustion chamber tube plates which are subject to compression due to the pressure on the roof plate the maximum working pressure shall be :—

$$\text{W. P.} = \frac{C \times (P - D) \times t}{L \times P} \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (56).}$$

t is the thickness of the tube plate in 32nds of an inch,
P is the pitch of the tubes in inches, measured horizontally where the tubes are chain pitched, and diagonally where the tubes are zigzag pitched and the diagonal pitch is less than the horizontal,
D is the internal diameter of the plain tubes in inches,
L is the internal length of the fire box or combustion chamber in inches measured at top between tube plate and firehole plate or back plate, or between tube plates in double ended boilers with combustion chambers common to two opposite furnaces,
C = 875 for steel and 437·5 for copper.

Provided that the above formula shall not apply in the case of fireboxes where the girders do not rest on the tube plates, or where the roof plate is stayed direct to the outer shell or to girders supported by the shell.

(*b*) Where girders rest on the side plates or the roof plate is so formed that the load is carried both by side and end plates, in no case shall the compressive stress on the plates exceed 14,000 lbs. per square inch for steel or 7,000 lbs. per square inch for copper.

BOILER TUBES, HEADERS, ETC.

Boiler tubes (water) subject to internal pressure.

104. Steel tubes.—(*a*) All tubes forming parts of boilers or of superheaters that are integral parts of boilers, subject to internal pressure of water or steam shall, except where 1 inch or less in external diameter, be solid drawn and made of steel produced by an acid or basic open-hearth process.

(*b*) The ultimate tensile breaking strength of the steel when in the billet or bar form shall not exceed 28 tons per square inch with an elongation of not less than 25 per cent. measured on the Standard Test Piece A.

(*c*) All tubes prior to being fitted in place shall be subjected to hydraulic test to at least 4 times the working pressure of the boiler into which they are to be fitted. The test pressure shall not be less than 1,000 lbs. nor more than 1,500 lbs. per square inch.

(*d*) The maximum working pressure for the tubes shall be :—

$$\text{W.P.} = \frac{140\ (t - 8)}{D} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (57)}$$

t is the thickness of tube in 100ths of an inch,
D is the external diameter of the tube in inches.

No tube 1 inch or more in diameter shall be less than 11 S.W.G. (·116") thick.

105. Copper tubes.—Copper tubes up to 1 inch in external diameter may be used for small boilers, such tubes shall not be less than 12 S. W. G. (·104") thick.

106. Headers and section boxes of water tube boilers.—(*a*) Rectangular sectioned headers, superheater boxes and mud boxes of water tube boilers may be of solid drawn or welded steel, or of cast steel complying with the requirements of Regulations 37 to 42.

(*b*) Each piece prior to being fitted in place shall be subjected to hydraulic test to double the working pressure of the boiler into which it is to be fitted.

(*c*) Where flat surfaces of headers or similar parts are unpierced for tubes the maximum working pressure for such parts shall be :—

$$W.P.= \frac{C\,(t-3)^2}{D^2} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (58)}$$

t is the thickness of the flat part in 32nds of an inch,

D is the diameter of the flat surface between supports inside in inches measured from commencement of curvature of corner,

C = 81 for wrought steel and 64 for cast steel.

Where the headers are corrugated or formed in such a way as to resist bulging or deformation arising from internal fluid pressure, the thickness generally may be as much as 3-32nds inch less than is required by the above formula but in no case shall it be less than 10-32nds inch, except that in small patches not exceeding half a square inch in area the thickness may be as low as 8-32nds inch.

(*d*) All headers exposed to radiation from the fire or to the impact of hot gases and which have only steam within them under working conditions, such as superheater boxes, shall be made of wrought steel and their thickness shall be 12·5 per cent. greater than that required by the above formula.

(*e*) The thickness of the headers at the tube holes shall not be less than—

$$3 \times \sqrt{D_1} + 8 = t \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (59)}$$

t is the thickness required in 32nds of an inch.

D_1 is the diameter of the hole in inches.

(*f*) Facings on headers for sighting doors must be machined to give a true and fair face for the door to joint upon. The thickness where machined may be 3-32nds inch less than given by the above formula, but shall not be less than 10-32nds inch.

(*g*) (*i*) The sighting hole doors shall be substantial and capable of being removed and replaced from time to time without loss of efficiency or safety.

(*ii*) The bolts by which they are held in place shall be fitted to them in such a way as to satisfy the above conditions.

(*iii*) The doors shall be so designed that they will not blow out in the case of the breakage of the bolt or otherwise.

(*h*) All flanges shall have a fillet with a radius of curvature at least equal to the thickness of the necks to which they are attached.

Boiler Tubes (Smoke) Subject to External Pressure.

107. Steel and Wrought Iron Tubes.—(*a*) Both plain and stay smoke tubes may be made either of wrought iron or of mild steel lap-welded.

(*b*) The maximum working pressure for the tubes shall be :—

$$W.P. = \frac{100\,(t-6)}{D} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (60)}$$

t is the thickness of the tubes in 100ths of an inch,

D is the external diameter of the tubes in inches.

(*c*) No tube shall be less than 12 S.W.G. (·104") thick.

108. Brass and Copper Tubes.—The thickness of tapered brass and copper smoke tubes for locomotive boilers shall, in the case of tubes of an external diameter of 1¼ to 1⅝ inches inclusive, be not be less than 12 S.W G. (·104 inch) at the smoke-box end and 10 S.W.G. (·128 inch) at the other ; and in the case of tubes of an external diameter of 2 to 2⅜ inches inclusive, the thickness at the smoke-box end shall not be less than 11 S. W. G. (·116 inch) and at the other end not less than 9 S. W. G. (·144 inch).

FURNACES.

109. Plain Furnaces of Horizontal Boilers.—For plain furnaces or furnaces strengthened by Adamson or other joints, and for the semi-cylindrical tops of fire-boxes and bottoms of combustion chambers where the sides are securely stayed the working pressure shall not exceed the smaller of the values obtained from the following formulæ :—

$$W.P.= \frac{C}{D} \times \frac{(t-1)^2}{(L+24)} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (61)}$$

$$W.P.= \frac{C}{D} \times [10\,(t-1)-L] \quad \ldots \quad \ldots \quad \ldots \quad \ldots \text{ Eqn. (62)}$$

D is the external diameter of the furnace or chamber top or bottom in inches,

t is the thickness of the furnace plate in 32nds of an inch,

L is the length of the furnace or other part in inches measured between points of substantial support, *i.e.*, centres of rows of rivets in end seams or commencement of curvature of flange, whichever is applicable,

C = 1450 where the longitudinal seams of steel furnaces are welded and 1300 where they are riveted.

C = 725 where the longitudinal seams of circular copper fire-boxes or furnaces are fitted with double butt straps and 650 where they are lapped,

C_1 = 50 where the longitudinal seams of steel furnaces are welded and 45 where they are riveted,

C_1 = 25 where the longitudinal seams of circular copper fire-boxes or furnaces are fitted with double butt straps and 22·5 where they are lapped.

110. Corrugated Furnaces of Horizontal Boilers.—The maximum working pressure to be allowed on corrugated furnaces shall be determined by the following formula :—

$$\text{W.P.} = \frac{C\,(t-1)}{D} \quad \ldots \quad \text{Eqn. (63)}$$

D is the external diameter in inches measured at the bottom of the corrugations,

t is the thickness of the furnace plate in 32nds of an inch measured at the bottom of the corrugation or camber,

C = 480 for the Fox, Morrison, Deighton, Purves and other similar furnaces, and 510 for the Leeds Forge Bulb Suspension Furnace.

111. Plain Furnaces of Vertical Boilers.—The same formulæ as for the plain furnaces of horizontal boilers shall be used, but where the furnaces are tapered, the diameter to be taken for calculation purposes shall be the mean of that at the top and of that at the bottom where it meets the substantial support from flange or ring. The length for the same purpose shall be the distance from the centre of the row of rivets connecting the crown and the body of the furnace to the substantial support at the bottom of the furnace, or to a row of screwed stays connecting the furnace to the shell, provided that the pitch of stays at the furnace does not exceed 14 times the thickness of the furnace plate when the stays are riveted at their ends, or 16 times when the stays are fitted with nuts. Such screwed stays shall be in diameter over the threads not less than twice the thickness of the furnace plate.

112. Hemispherical Furnaces of Vertical Boilers.—When furnaces are hemispherical in form and subject to pressure on the convex side and are without support from stays of any kind, the maximum working pressure shall be :—

$$\text{W.P.} = \frac{275\,(t-1)}{R} \quad \ldots \quad \text{Eqn. (64)}$$

t is the thickness of the top plate in 32nds of an inch,

R is the outer radius of curvature of the furnace in inches.

For the ogee ring which connects the bottom of the furnace to the shell and sustains the whole load on the furnace vertically :—

$$\text{W.P.} = \frac{140\,(t-1)^2}{D\,(D-D_1)} \quad \ldots \quad \text{Eqn. (65)}$$

t is the thickness of the ogee ring in 32nds of an inch,

D is the inside diameter of the boiler shell in inches,

D_1 is the outside diameter of the lower part of the furnace where it joins the ogee ring.

113. Furnaces in general.—(*a*) No furnace or fire-box top, whether plain or corrugated, shall exceed 26-32nds inch in thickness, and all circular sectioned furnaces when new shall be as near the truly circular form as the type of joint will permit.

(*b*) For new furnaces of circular section a difference of not more than the thickness of the plate in the cross dimensions of any one section shall be allowed. Rivet holes shall be drilled as in the case of shells.

(*c*) Where cross tubes are fitted they shall not be welded to the furnace tube. The longitudinal seams of cross tubes may be welded ; the weld shall not be exposed to the direct impact of flame. No allowance shall be made for cross tubes in calculating the strength of the furnaces in which they are fitted.

114. Uptakes of Vertical Boilers.—(*a*) The working pressure for uptake tubes of vertical boilers shall be determined by the formulæ for plain furnaces, but only half the least pressure so found is to be allowed for uptake tubes.

(*b*) When crown plates of vertical boilers are not fitted with smoke tubes, the uptake tubes in their capacity as stays shall be strong enough to satisfy the following rule :—

$$W.P. = \frac{A \times S}{A_1} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (66)}$$

A is the area of net section of tube or of rivets or bolts connecting uptake to furnace or shell crown plates in square inches, whichever is less,

A_1 is the area in square inches of the annular surface around the uptake tube which, when no bolt or other stays are fitted, may be taken as extending to midway between inside of shell and waterside of uptake, but for flat plates in no case beyond what would be allowed for margins under the regulations applicable to flat plates. Where bolt stays are fitted, the surface to be supported by the uptake may be taken as that within the inner circle of the annulus supported by the stays,

S is the stress allowed per square inch of net section of material which, for the tube itself, may be 4,000 lbs. and for rivets 7,000 lbs. in either shear or tension.

(*c*) These requirements apply equally either to flat or dished crown plates.

Manholes, doors and stand blocks.

115. Means for examination and cleaning.—Wherever the size of the boiler permits, there shall be means for ingress whereby examination and cleaning of the inner surfaces of plates and tubes exposed to flame may be thoroughly effected. When boilers are too small to permit of this, and the construction is such that they cannot readily be taken apart, there shall be manholes and sightholes sufficiently large and numerous to permit of the inside being satisfactorily cleaned.

116. Manholes and sightholes in vertical boilers.—Where large cross tubes are fitted there shall be a sighthole in the shell opposite at least one end of each tube sufficiently large to admit of the examination and cleaning thereof. The doors of such sightholes shall be in positions accessible for that purpose. In addition to the cross tube sightholes there shall be at least three mudholes round the base of the boiler.

117. Manholes mudholes and sightholes in locomotive type boilers.—Wherever the size of the boiler permits there shall be a manhole in the barrel. Barrels of 3 feet and upwards in diameter shall have a manhole not less than 14 inches by 10 inches in the clear. Barrels between 2 feet and 3 feet in internal diameter shall have a manhole not less than 13 inches by 10 inches in the clear. Barrels below 2 feet in internal diameter shall have either a manhole or a sighthole as large as practicable. The opening shall not be less than 9 inches by 6 inches. There shall also be a sighthole or handhole at the bottom of each corner of the fire-box casing. Wherever practicable the holes shall be in the rounded corner and shall be oval in shape with the major axis vertical. The holes shall not be less than $3\frac{1}{2}$ inches by $2\frac{1}{2}$ inches in the clear, wherever the size of the boiler permits.

118. Elliptical manholes.—In all large boilers the manholes in cylindrical shells shall have their shorter axes arranged longitudinally, but in the barrels of locotype boilers the axes may be arranged either way.

119. Mudholes and sightholes.—In all cases in which the covers are internally fitted, mudholes and sightholes shall be elliptical in shape.

120. Compensation rings to manholes.—(*a*) Compensation shall be provided in every case for the part cut out of a cylindrical shell for a manhole. The strength of the net section of compensating ring and of the rivets securing it to shell compared with that of the part of shell cut out shall not be less than the strength of the longitudinal seams.

The spacing of the rivets shall be such as not to reduce the strength of the shell plate below that of the longitudinal seams.

(*b*) The percentage of compensating section shall be determined by the following formulæ :—

$$\frac{200\ (W-D) \times Tr}{(L + 2D) \times Ts} = \text{percentage strength of compensating section} \quad \ldots \quad \text{Eqn. (67)}$$

$$\frac{80 \times A \times N}{(L + 2D) \times Ts} = \text{percentage strength of rivet section} \quad \ldots \quad \ldots \quad \text{Eqn. (68)}$$

W is the width of compensation ring in inches measured in the direction of the longitudinal axis of the boiler,

L is the length of opening in shell in inches measured in the direction of the longitudinal axis of the boiler,

D is the diameter of rivet holes in inches,

Tr is the thickness of compensation ring in inches,

Ts is the thickness of shell plate in inches,

A is the area of one rivet hole in inches,

N is the number of rivets on one side of the longitudinal line. When the rivets are in double shear twice the single rivet section may be allowed.

Parts of raised manhole mouthpieces within four inches of the shell may, in addition to the ring, be included in the compensating section.

120A. Compensation for cutting large holes in shells.—Where holes are cut in cylindrical shells for mountings, the diameters of the holes being greater than 2½ times the thickness of the shell plate *plus* 2½ inches, compensation shall be fitted as in the case of manholes. Where ordinary sized steel stand blocks or pad pieces are fitted and are securely riveted to the shell, no additional compensation for the hole cut in the shell shall be required. If, however, the net section of the stand block or pad within 4 inches of the shell is less than the section of the shell plate cut away a compensation ring shall be fitted. Where a large opening is cut in a cylindrical shell to receive another part of the structure, the sides where cut away shall be efficiently cross stayed or strengthened in some other effective manner.

121. Manholes and mudholes in flat plates.—Where a flat plate is flanged to stiffen it at a manhole or sighthole, to permit the same working pressure as would be allowed upon an unpierced plate, the depth of the flange measured from the outer surface shall be at least equal to—

$\sqrt{T \times W}$ = depth of flange in inches ... ... Eqn. (69)

where T is the thickness of the plate in inches, and

W is the minor axis of the hole in inches.

122. Stand blocks and pads.—Stand blocks and pad pieces for carrying mountings shall be of cast steel, wrought iron or mild steel, either pressed or welded, and of substantial proportions. They shall be carefully bedded on the shell and the riveting shall be pitched to ensure a tight joint. The jointing faces to which the mountings are to be bolted shall be machined and shall be level when the boiler is in its working position.

123. Doors, mouthpieces and cross bars.—(*a*) All internally fitted doors of manholes, mudholes and sightholes shall be of wrought iron or steel built up or pressed to shape and annealed, or made from one thickness of plate with a machined recess for the jointing material. Their spigot part or the recess shall not have a greater clearance than $\frac{1}{16}$th inch all round, *i.e.*, the axes shall not be less than $\frac{1}{8}$th inch smaller than the holes in which they are fitted.

(*b*) The studs or bolts of large doors shall be screwed through the plates. In the case of small doors the studs may be forged solid with the doors or, if screwed, be efficiently riveted to the doors.

(*c*) Covers of raised circular manhole mouthpieces of Lancashire type boilers and others shall be of mild steel; whether dished or flat, the cover at its thinnest part shall not be of less thickness than would be required under Regulation 73 for the intended pressure in the case of a flat plate. The bolts or studs securing the cover to the frame or mouthpiece shall also satisfy the requirements of Regulation 91.

(*d*) Manhole mouthpieces for cylindrical shells and end plates shall be made of steel or wrought iron either pressed out of the solid or welded. Circular manhole mouthpieces of Lancashire type boilers should not be less than 16 inches in internal diameter and ½ inch in thickness, and when welded the position of the weld shall be at right angles to the longitudinal line. Cross bars shall be of substantial proportions and either solid forgings of steel or iron or of cast steel.

Boiler mountings and fittings.

124. The requisite mountings and fittings.—Every boiler shall be fitted with the following :—

Two safety valves;

Two independent means of indicating the water level;

A steam pressure gauge;

A steam stop valve;

A feed check valve;

A blow down cock or valve;

An attachment for Inspector's test gauge;

A manhole, where the size and construction permit, and such mudholes or sightholes as are necessary for effectively cleaning the boiler.

125. Safety valves.—(*a*) Safety valves shall not be less than 1 inch in diameter except in the case of very small boilers, for which valves of ½ inch diameter are permitted.

(*b*) The minimum aggregate area of safety valves of ordinary type in each boiler whether coal fired or oil fired, and whether working under natural, forced or induced draught, shall be found by the following formula :—

$$A = H.S. \times \frac{C}{(W.P. + 15)} \quad \ldots \quad \ldots \quad \ldots \quad \ldots \quad \text{Eqn. (70)}$$

A is the aggregate area of safety valves in square inches,

H.S. is the total heating surface of the boiler in square feet,

(See Part II, Chapter I, Regulation 157).

W. P. is the working pressure in lbs. per square inch,

C=1·25 for coal fired boilers and 1·5 for oil fired boilers other than water tube,

C=1·1 for coal fired water tube boilers and 1·25 for oil fired water tube boilers.

(*c*) All the safety valves of a boiler may be fitted in one chest, but such chest shall be separate from any other valve chest, and shall be connected direct to the boiler or stand block or pad by a strong and stiff neck, the passage through which shall have a cross sectional area at least equal to one-half the aggregate area of the safety valves in the chest :
